

Bunker Hill Community College

Fall 2014 Credit Courses

 $\label{eq:conting} \textit{Day} \cdot \textit{Evening} \cdot \textit{Midnight} \cdot \textit{Weekend} \cdot \textit{Online} \cdot \textit{Distance Learning} \cdot \textit{Self-Directed Learning bhcc.mass.edu/courseschedules}$

PLANNING TO ATTEND BHCC?

APPLY FOR ADMISSION.

If you are planning to enroll in a degree or certificate program, complete an admissions application. There is a \$10 application fee for Massachusetts residents and a \$35 application fee for students from out of state. (Please refer to page 65-66 to qualify for Massachusetts resident rate.) Submit a copy of your official final high school transcript, diploma, or GED. (High school degrees earned outside of the U.S. must be translated and evaluated into U.S. equivalencies.) Submit official college transcripts(s) if you plan to transfer credit to BHCC. If you are not seeking a degree and just want to take classes, you do not need to complete this step. For further information you may attend one of our weekly information sessions and campus tours which are held every Wednesday evening at 5:00 p.m. at our Charlestown Campus. For more information contact the Admissions Office at 617-228-3398.

APPLY FOR FINANCIAL AID ONLINE.

Financial assistance is available to help you finance your education. Go to www.fafsa.ed.gov and fill out the FAFSA form. When completing the FAFSA online, be sure to list Bunker Hill Community College in the "Schools Information Section." BHCC's code is 011210. Once BHCC has received your FAFSA, you will be notified of any additional requirements. Please note that financial aid requires enrollment in a degree or certificate program, therefore applying for admissions is necessary. For additional information about financial aid, please go to: www.bhcc.mass.edu/inside/503

TAKE THE PLACEMENT TESTS.

Computerized Placement Tests (CPTs) in reading, math and English are required if you are planning to enroll in a degree or certificate program or if you are registering for a course that requires a prerequisite of reading, math, or English. Testing is done on a walk-in basis at the Assessment Center on the Charlestown Campus, 1st floor, room B118. There is no charge to take the CPT. If you have completed a math or English course with a grade of C or higher at an accredited institution, you may be eligible for exemption from testing. Call the Admissions Office at 617-228-3398 for further information. For hours, locations, information on preparing for the assessment, and details on assessment exemption, please go to: www.bhcc.mass.edu/assessments

REGISTER FOR CLASSES.

Accepted students will be invited to attend a special group advising and registration session, referred to as "START SMART ORIENTATION." Information about registering for a START SMART ORIENTATION Session will be mailed to you with your acceptance letter from the College. Non-degree seeking students may register during posted registration hours. At the beginning of each semester, accepted students are assigned to an Academic Advisor who will work with them to develop an academic plan. Advisors are also available to assist students in achieving their academic, vocational and personal goals.

PAY FOR CLASSES.

Fall courses must be paid for on or before August 6, 2014. If you register on or after August 6, payment will be due on the same day that you register. There are four ways to pay for courses: 1) have a financial aid award already pending on your BHCC account; 2) pay for the classes in full online; 3) Create a payment plan on BHCC online; or 4) submit a third-party commitment letter or purchase order to the Student Payment Office. If registering for 9 credits or more, students must pay for the College's Health Insurance (\$1,049) or if eligible, students may waive BHCC's Health Insurance. The following cannot be used to waive health insurance:

Commonwealth Care; Free care at a hospital; insurance policy of a foreign carrier; accident insurance; travel insurance; or Mass Health obtained as a dependent.

SUBMIT YOUR IMMUNIZATION DOCUMENTATION.

If you are registering full time or are in a health career program, you must complete an immunization record form and return it to the Admissions and Registration desk within 30 days of the date of registration. Immunization forms are available at the Admissions and Registration Desk in room B203.

OBTAIN YOUR BHCC IDENTIFICATION CARD.

BHCC students are required to carry a current BHCC OneCard while on campus. Bring a copy of your current class schedule and government issued photo ID to the Charlestown Campus ID station in the Library in room E300 or Chelsea Campus ID station in Room 202 to get your picture taken. For ID station hours visit http://bhcc.mass.edu/library/bhccidcard/

OBTAIN YOUR PARKING PERMIT.

If you wish to park on campus you must purchase a BHCC parking permit valid for the entire semester. Student permits are available for purchase early at any time by going online at onlineservices. bhcc.mass.edu. Click on Web Advisor for Students, and then click on Purchase a Parking Permit. Complete the application and payment. Permits will be mailed to the address entered on the application. Be sure to enter your address correctly as we are not responsible for lost or stolen permits. Allow seven (7) days for mailing. You may display your purchase receipt on your dashboard until permit arrives. To obtain a permit the following items are required:

- ◆ A BHCC College ID number
- ◆ A current BHCC registration
- ♦ A current driver's license
- ◆ Vehicle registration information
- ◆ Payment in the amount of \$30 payable by American Express, Discover, Master Card, Visa, and personal checks accepted online.

Only one permit per student will be issued. Note: Students whose accounts are in default will not be issued a permit. The cost for a replacement permit is \$50.

ONLINE SERVICES AND EMAIL.

BHCC offers all students secure, easy online access to academic/ financial records and course availability information. Currently enrolled students may access their online account, WebAdvisor, http://onlineservices.bhcc.mass.edu. Newly accepted degree/certificate students will receive information about their WebAdvisor account and their BHCC email account with their acceptance letter from the College. New non-degree students will have access to their online services account after completing their initial registration with the College. BHCC correspondence will be sent to your BHCC email account. Email accounts are assigned to all registered students. You will receive a letter from the college with your BHCC email address and initial password. Students are required to check their emails frequently for up to date information concerning your academic record.

Registration for Fall 2014 Courses begins on May 6, 2014

Currently Enrolled Students May Register on April 8, 2014

Registration Options

By Scheduled Group Sessions:

Accepted students including new to college, transferring from another accredited institution, or readmitting after an absence of two or more consecutive semesters, must attend a special group registration, referred to as "start smart orientation." Upon acceptance, you will receive information on scheduling a start smart orientation session for advising and registration. For questions concerning your acceptance, please contact the Admissions and Registration Office at 617-228-3398.

Online:

Currently enrolled students are required to register online using their myBHCC account. Registration for currently enrolled students begins April 8, 2014. To access online registration log in to our BHCC website (www.bhcc.mass.edu) and click on myBHCC or BHCC Portal. If you have a problem logging in, please contact the student help line at 617-228-3441. If you have problems registering for classes, please contact the Academic Records Office at 617-228-2403 or visit the Admissions and Registration desk, 2nd floor, main lobby, Charlestown campus or Enrollment Services on the Chelsea campus. Paper registrations will only be accepted at the Admissions and Registration desk for students with special circumstances as referred by an advisor.

By Fax:

Students registering by fax must complete the registration form on the inside back cover of this publication and fax the form with all required documents and full tuition payment (see payment information on page 3) to 617-228-3481 by the deadline listed in the Academic Calendar. Registrations received by the close of business (7:00 p.m.) will be processed the same day. Registrations received after the close of business (7:00 p.m.) will be processed the next business day. A confirmation will be mailed to you.

Continuous Walk-in Registration:

Non-degree seeking students may register at the Admissions and Registration desk, located in the main lobby of B-building on the Charlestown campus, and at the Enrollment Office on the Chelsea campus on the following days and times:

Mondays-Wednesdays: 8:30 a.m.-7:00 p.m.

Thursdays: 11:00 a.m.-7:00 p.m.

Fridays: 8:30 a.m.-4:00 p.m.

Community Education (Non-Credit Courses)

Students may register for Community Education courses throughout the semester. Community Education courses are non-credit classes taken to enhance computer skills, improve performance in the workplace, sharpen artistic skills, or for personal enrichment. Students who wish to register for a non-credit course may register in person at the Admissions and Registration desk on the Charlestown campus, 2nd floor, main lobby or by contacting the Community Education Office at 617-228-2462. Payment is required at the time of registration. The cost of each course is listed beside the title of the course. Contact the Community Education Office for further information at www.bhcc. mass.edu/ce.

All Students Registering for Fall 2014 Classes Must:

- 1. Show a government issued photo ID (if in person); and
- Provide or have provided a completed application for Massachusetts In-State Tuition form (pages 61-62) and all supporting documentation to receive the in-state tuition rate; and
- 3. Provide proof of meeting course prerequisites: Placement testing or completion of appropriate BHCC coursework; or provide a transcript from another accredited institution verifying completion of appropriate coursework with a passing grade.
- 4. Pay for courses by the payment due date or make payment arrangements.

Fall 2014 Semester Dates

Fall Semester September 2-December 21
$Mini\ Session\ I\ \dots\dots\dots September\ 15\text{-November}\ 2$
$\label{thm:minimum} \mbox{Mini Session II} \dots \dots \mbox{November 3-December 21}$
Late Start Web Courses September 15-December 14
Center for Self Directed Learning Courses
September 2-December 14

The Higher Education Opportunity Act (HEOA) Textbook Provision (Effective July 1, 2010)

What Does This Mean to Students?

Prior to or during registration, students will be provided with accurate course material information including the International Standard Book Number (ISBN) and retail price when available for each course listed in this course schedule booklet, or may otherwise indicate "to be determined."

Course material information is listed on the college bookstore web page at http://bhcc.bncollege.com. Students may click on the textbook tab at the top of the page and follow the directions.

Why is This Important to Students?

Students are given the convenience of buying their books at the same time they register with the added assurance that they are buying the right books for the right course;

Students are made aware of the total cost of the course: tuition, fees, textbook, and materials; Students are provided information on whether or not a book is required or recommended, giving students the option to purchase.

Tuition & Fees

Massachusetts Residents (MA)

\$141/credit

Per credit: \$24 Tuition/\$112 College fees/\$5 Technology fee.

To qualify for MA rate, complete the in-state tuition form on pages XX

Non-Massachusetts Residents & International Students

\$347/credit

Per credit: \$230 Tuition/\$112 College fees/\$5 Technology fee.

The New England Regional Student Program

\$153/credit

Per credit: \$36 Tuition/\$112 College fees/\$5 Technology fee. Available to students from RI, CT, NH, ME, & VT that are approved by the Academic Records Office.

High Cost Courses

Additional \$35/credit fee for all AHE, CTC, EMT, MAC, MIG, MLT, MRC, NUR, RTH, SGT, SON, or VSN courses.

Other Fees

Health Insurance Fee (subject to change) \$1,640

(May be waived) Massachusetts State law requires that all students taking 9 or more credits have medical insurance. There are no exceptions. If you are taking 9 or more credit hours, you are automatically charged. You may waive the coverage if you are not an international student and have comparable coverage. For those with comparable coverage, the waiver application will be available at www.commonwealthstudent.com. Waiver requests are subject to an audit therefore please ensure that your coverage is current and meets state requirement or it will be rejected.

Returned Check Fee	\$30
Stop Payment/Reissue Check Fee	\$20
Liability Insurance Fee	\$15
Photo ID Replacement Fee	\$20
Parking Permit Fee	\$30

Payment

Fall: Failure to meet your financial obligation by not making payment arrangements, not paying in full or not completing your financial aid package (including paying for or waiving health insurance) by August 6, 2014 will result in your courses being dropped.

Beginning August 6, 2014, payment is due at the time of registration. Failure to pay in full, make payment arrangements, or complete your financial aid package (including paying for or waiving health insurance) will result in your unpaid courses being dropped at the close of business on the day of registration. BHCC accepts personal check, money order, American Express, Discover, MasterCard or VISA.

You May Pay:

- online at http://onlineservices.bhcc.mass.edu (select Student Menu) and then select either Make A Payment (to pay in full) or set up an automatic payment plan to pay in monthly installments on the 5th of each month through automatic deduction from your account.
- by express drop box located outside the Student Payment Office Window, Room B219, for check and credit card payments using the envelopes provided. (Full Payment)
- by mail to 250 New Rutherford Avenue, Room B219, Boston, MA 02129-2925. Payment must be received prior to the payment due date. (Full Payment)

Payment/Billing for Current Students Who Register Online

Fall: For students registering on the web, payment is due by August 6, 2014. Students must check Account Summary to view the amount due. Students must pay in full by August 6, 2014 or have enrolled online in the monthly automatic payment plan otherwise unpaid courses will be dropped. Beginning August 6, 2013, payment is due at the time of registration. Failure to pay will result in your unpaid courses being dropped at the close of business on the day of registration. Hours of operation are M, T, and W 8:30 a.m.-7:00 p.m., TH 11:00 a.m.-7:00 p.m. and Friday 8:30 a.m.-4:00 p.m. Please check your academic and financial record before logging out to confirm that registration and payment was recorded; click on Account Summary to view your financial record and My Class Schedule. Please note it is your responsibility to continually check your BHCC email and your online billing account for information on any adjustments made to your account. It is important for you to check with the Financial Aid Office if registering for less than 12 credits as your aid will be adjusted.

Third Party Billing

Students may submit a third party commitment letter or purchase order from an employer, etc. which allows the College to bill that party directly with no restrictions. Documentation must be presented at the time of registration. Web registrants will need to present the third party information prior to registration to ensure that your financial account is credited or you may be dropped for non-payment. If your employer/sponsor has conditions such as grades before paying for your classes, you must pay your bill by the due date or at the time of registration and then submit a claim to your employer/sponsor.

Payment Plans

FALL or SPRING (no summer): The College offers an automatic installment payment plan. Students may enroll in the Payment Plan for a service fee, and make monthly payments for the upcoming semester. The first installment and the fee are due with the application. Budgets may be automatically adjusted to cover billed charges. Notification of changes will be sent to your email. Students who are delinquent will be subject to payment penalties, and may be denied the use of the payment plan in future semesters. Enroll online at the onlineservices.bhcc.mass.edu and select Setup an Automatic Payment Plan (NBS). Enter your User I.D. from your BHCC I.D. or from your registration form as well your password which is your date of birth including slashes (i.e. 01/22/91). Click on the E Cashier Logo and complete the form. Your payment will be automatically deducted from your checking, savings, or credit card account for the first and ALL subsequent payments. Payment plans are available online only. Be sure that funds are in your account on the 5th of each month. College will not be permitted to register. Delinquent accounts must be paid in full. Unpaid balances will be referred to state intercept and to a collection agency. This means that your state income taxes will be intercepted and you will not receive your state refund. Furthermore, additional fees will be assessed and can be as much as 33% of the balance due.

Outstanding Financial Obligations

Students who have any outstanding financial obligations to the College will not be permitted to register. Delinquent accounts must be paid in full. Unpaid balances will be referred for state and Federal intercept and to a collection agency. This means that your income taxes or other payments due to you will be intercepted to cover your outstanding balance. Furthermore, additional fees will be assessed and can be as much as 33% of the balance due.

INFORMATION PAGES Information Pages

Schedule Adjustments

Students who wish to make an adjustment to their schedule must make the adjustment online. Students who have difficulty and are unable to process a schedule adjustment online should seek assistance at the Admissions and Registration desk, B203. Students who adjust their schedule (including adding a waitlisted course) must make full payment or make payment arrangements at the time of the adjustment. Financial Aid recipients must notify the Financial Aid Office of any adjustments to their original registration and all adjustments must be made by the end of the schedule adjustment deadline, September 9, 2014. Failure to do so will result in the dropping of all unpaid courses. If you accept a seat in a course for which you are waitlisted you must make payment arrangements for that course immediately. If adjustments to your schedule result in your registration in 9 or more credit hours, you will need to pay for or waive the health insurance fee.

Refunds

Students may drop (cancel) a credit course and receive a 100% refund within the schedule adjustment period. There are no refunds after the schedule adjustment periods. Lack of attendance in a course does not constitute a drop. Students who register for a course and subsequently decide not to attend classes are responsible for officially dropping the course prior to the end of the schedule adjustment period by completing a schedule adjustment form at the Admission & Registration Desk.

- 100% tuition and fees will be refunded through September 9
- For Mini Session I 100% tuition and fees will be refunded through September 17
- For Web Late Start classes 100% tuition and fees will be refunded if course is dropped (cancelled) by September 22.
- For Mini Session II 100% tuition and fees will be refunded through November 5
- For Center for Self-Directed Learning courses (LC) 100% tuition and fees will be refunded if course is dropped (cancelled) within five (5) working days from the date of registration or five (5) days after the start of the semester.
- For Community Education courses (non-credit) 100% refund within two (2) working days prior to the start of the class.

No refunds are issued after the specified schedule adjustment period.

Registration Information

Assessment and Placement Testing

All students, planning to take math or English courses or a course with a math, English or reading prerequisite must complete the Computerized Placement Test (CPTs) unless they have successfully completed courses in these subjects at BHCC or another accredited institution. Those who have taken math or English at another institution must bring in or fax in a copy of their transcript. Testing is available at both the Charlestown and Chelsea campuses. In Charlestown: Monday-Wednesday 8:30 a.m.-7:00 p.m.; Thursdays from 11:00 a.m.-7:00 p.m.; Fridays from 8:30 a.m.-4:00 p.m.; and during April, May and August on Saturdays 9:00 a.m.-1:00 p.m. except holiday weekends. No appointment necessary. Contact 617-228-2100 for testing hours at the Chelsea Campus.

Auditing a Course

Students who wish to audit a course must obtain permission from the Associate Registrar. Students planning to audit a course must indicate their intention at the time of registration, must have the required prerequisites for the course, and are required to pay full tuition and fees.

Course Prerequisites:

Some courses require students meet certain conditions prior to registering, known as prerequisites. Prerequisites include the following: completion of lower-level courses with a passing grade; completion of computerized placement tests (CPTs); or admission to a specific program of study. Students must bring proof of course completion from other colleges or universities at the time of registration. Because we allow preregistration for BHCC students, it is the student's responsibility to drop the course if the final grade of the prerequisite course is a failing grade.

Developmental Courses

Courses with numbers below 100 are considered developmental, not college-level. Only college-level courses count toward an associate degree or certificate.

Financial Aid Eligibility

Bunker Hill Community College awards millions of dollars in federal, state and institutional financial aid each year to eligible students. Many students, however, miss out because they do not think they are eligible and do not complete the Free Application for Federal Student Aid (FAFSA). To apply for financial aid, students must complete the FAFSA available on the Federal Financial Aid Website at www.fafsa.ed.gov. When completing the FAFSA online, be sure to list Bunker Hill Community College in the "Schools Information Section." BHCC's code is 011210. Financial Aid can be used to pay for tuition, fees, books, transportation, and other educational expenses. We strongly encourage you to complete the FAFSA. Once BHCC has received your FAFSA, you will be notified of any additional requirements. Please note that financial aid requires enrollment in a degree or certificate program, therefore applying for admissions is necessary. If you need help with your financial aid application or college financial planning, our Financial Aid Office has counselors who can assist

Financial Aid Recipients-policy for adding courses

The deadline to be eligible for financial aid consideration for those semester classes that have not already met, mini sessions, home studies, and Center for Self Directed Learning classes, is the last day of the schedule adjustment (add/drop) period, September 10, 2013. For further information concerning financial aid eligibility, please contact Financial Aid at 617-228-2275.

Immunization Requirement

Massachusetts General Laws, Chapter 76, section 15C, requires that all full-time (12 or more credits) and all students in health programs (full and part-time) present evidence of immunity to measles, mumps, rubella, diphtheria, tetanus, and three doses of hepatitis B vaccine. Students in health career programs must also present evidence of immunity to Varicella and Mantoux testing for Tuberculosis. For measles, mumps, rubella, and Hepatitis B, serologic proof of immunity will be acceptable.

Students who fail to present the required information within 30 days from the date of registration will not be allowed to register for subsequent semesters or receive final grades until the immunization form is received by the Admissions and Registration desk, B203.

Residency Requirements

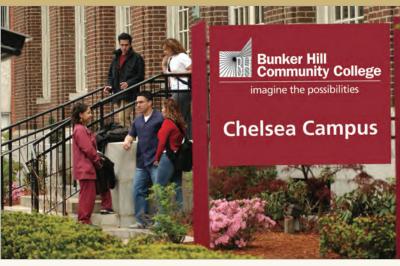

All students registering for credit courses at BHCC, who are claiming entitlement to in-state tuition privileges, must complete the Application for Massachusetts In-State Tuition Rates from (pages 65-66) and supply supporting documentation at the time of registration.

BHCC Chelsea Campus

Imagine the Possibilities

The Chelsea Campus, located in Bellingham Square, Downtown Chelsea, provides students with the knowledge and background necessary to compete in today's global economy. We offer foundation and elective courses leading to a college degree and or certificate plus a wide range of educational offerings including the Adult Basic Education Program, TRIO Program, CONNECT/ Achieve Program and Workforce Training. In addition, all Allied Health Certificate Programs are based at the Chelsea Campus. Central Processing, Pharmacy Technician, Surgical Technology, and Emergency Medical Technician (EMT) are examples of certificate programs that expand career options in the current economy.

BHCC requires all students check their BHCC email for important campus-wide notifications and announcements, as well as BHCConline course-related information.

Study at Neighborhood Locations

East Boston, Malden, and South End.

Come join many students like yourself who enroll in Bunker Hill Community College courses at three convenient locations. Courses are offered to meet resident needs for an exciting and affordable college education Evening classes, as listed below, allow students to work for an associate degree or certificate in a variety of fields offered by the College. You may register at the Admissions and Registration desk, located in the main lobby of B-building at the Charlestown Campus, and at the Enrollment Office at the Chelsea Campus.

BHCC Site Information

East Boston Satellite

LATE-NIGHT COURSES

BHCC is offering late-night courses. These courses are geared to students who work late hours and others who cannot attend day-time classes. The late-night courses also make it possible for students currently taking 6 p.m. courses to attend two courses in the same evening.

ALTERNATIVE LEARNING BHCConline & Distance Education

BHCConline & Dis

BHCConline Your Source for Distance Education

BHCConline has been a leader in developing innovative methods of instructional delivery by offering the convenience and flexibility of a large selection of distance education courses to facilitate student success. The BHCConline curriculum is comprised of:

- web courses available entirely via the Web (noted with "WB" in the course number)
- hybrid courses that rely on both the Web and traditional classroom instruction (noted with "HB" in the course number)

Studies indicate that successful distance education learners are usually self-motivated, independent learners with excellent time management skills. Students who require flexible schedules and do not require traditional lecture based classes are also excellent candidates. Distance education courses involve the same (and at times, greater) academic rigor as the traditional college class. Like traditional classes, they are fully accredited and transferable to other institutions.

Since learning in an electronic environment may be a new experience, students should consider discussing taking web courses with an academic advisor, faculty member, or a member of the BHCConline staff.

Distance Education courses do not require that the student be in a particular place at a particular time (also known as "synchronous"), or be physically located where the instructor happens to be. These conditions present both opportunities and challenges for students and instructors engaged in the educational process. Students engaged in Distance Education courses are required to establish and maintain weekly dialogue with instructors through various methods such as email, discussion forums, chat rooms, messaging and web conferencing – and all these communication tools are integrated within web courses.

- **Web Course Orientations**
- Students new to online courses should participate in one or more of the following orientation options to learn about using technology, expectations for completing courses and guidelines to becoming a successful online student.

- Participate in one of the "live" virtual computer-based orientations from your home or work on Friday, August 29, 2014, beginning at 12:00 noon; or on Tuesday, September 2, 2014 beginning at 3:00pm. Go to www.bhcc.mass.edu/ bhcconline for login information. Note: access to a telephone or a microphone is required to speak; webcams are also encouraged.
- 2. Listen to a prerecorded video orientation (see link on the BHCConline website).
- 3. Join the online student orientation "Prep Course," which begins on Tuesday, August 26, 2014 (one week prior to the start of the semester, which is Tuesday, September 2, 2014). This course is highly recommended and provides students with the opportunity to practice with Moodle (the Learning Management system that contains our web courses) before their actual credit course begins. The Prep Course is available through Monday, September 1, 2014.

For more assistance, and for further information about orientations, along with general information regarding BHCConline, please email our office at onlinehelp@bhcc.mass.edu, call 617-228-2466, visit the BHCConline Office in Room H134, and/or review all the information on the BHCConline website.

BHCC requires all students check their BHCC email for important campus-wide notifications and announcements, as well as BHCConline course-related information.

BHCConline Course Registration and Information

Students Enrolling in Web, Hybrid and Web Enhanced Courses

Students register for web and hybrid courses the same way that they do for in-class courses.

Accessing Moodle: Your username and password for Moodle (our Learning Management System) are the same as the credentials you use for Web Advisor and the BHCC Portal.

Moodle web and hybrid courses are accessible to students for preview purposes one week prior to the start of classes. The instructor has the prerogative to delay access to a specific course until the official start date, which for the Fall semester is Tuesday, September 2, 2014.

To log in, go to the BHCC Portal at www.bhcc.mass.edu/portal or to the BHCConline site at www.bhcc.mass.edu/bhcconline. Students must begin their coursework during the first week of classes. Students should email onlineservices@bhcc.mass.edu or contact the BHCConline office (617-228-2466) if they are experiencing technical difficulties accessing their course.

Bunker Hill Community College partners with a number of community colleges in the state of Massachusetts with regard to additional transferable course offerings outside of our own college. Please visit http://www.mco.mass.edu for more information, and then please contact Mei Driscoll (mdriscol@bhcc.mass.edu) at the BHCConline Office for assistance with registering for any of these courses.

Academic Requirements and Expectations

It is highly recommended that students complete RDG095 and ENG095 or place out of these courses through the college's incoming placement tests before enrolling in a web or hybrid course. New online students should complete one of the BHCConline orientations.

Distance learning courses are not self-paced; students are required to maintain a consistent pace in submitting coursework and are expected to complete their course in a semester's time. Distance learning courses are rigorous. Students should expect to spend between 6 and 10 hours of study/participation each week, per course.

Distance Education Exam Requirement

Some courses may require that the student come to the H building of the Charlestown campus to take an actual proctored, paper midterm or final exam. In extreme cases, or if you are located out-of-state, you may arrange to have exams proctored at other colleges or testing locations, subject to the approval of the BHCConline. Call 617-228-2466 for more information.

Technical Skills Needed to Take BHCConline Courses

- Students must possess basic computer skills such as navigating the Web, sending and receiving email, word processing, attaching documents, and toggling back and forth between applications and pages.
- An updated Windows or Macintosh computer with at least 4GB of RAM is required. Macintosh computers may not be used for CIT-110.
- A recent version of Microsoft Office (2007 or better, with Word, PowerPoint and Excel) is recommended.
- Access to the Internet with broadband connectivity (DSL, FiOS or Cable) is required.
- Browser requirements: Mozilla Firefox or Chrome (latest version) is recommended for Moodle (Windows or Mac). Safari for Mac and Internet Explorer for Windows may be used but are not fully compatible.
- All students must know how to access and use their BHCC email (https://webmail.bhcc.edu or visit the BHCC Portal). Your username and password for accessing email are the same as that for accessing Web Advisor and Moodle.
- Access to a printer (black and white or color) is also required.

For more information about Web Advisor, go to www.bhcc.mass.edu and click "mybhcc". Click "Students." There you will also find information on accessing your BHCC username and password.

Earn an Associate Degree or Certificate at BHCC's Weekend College

Weekend College is designed for busy adults who want to earn college credits in an ACCELERATED approach on the weekends. Degree programs are available in: General Concentration, Business, Education, Computers, Psychology, History and Government, and Nursing. Certificate programs are available in Paralegal and Culinary Arts.

Classes are scheduled in various formats to provide students with flexible options and the opportunity to complete their program of study by attending only on the weekends.

Course schedules include:

- Web courses
- Hybrid courses (which combine classroom instruction with online instruction)
- Saturday mini-session classes
- Individualized, self-paced courses through the Center for Self-Directed Learning
- Traditional sixteen week courses available on Friday evenings, Saturdays and Sundays.

Students interested in enrolling in a weekend degree program should contact the Admissions office at 617-228-3398. All students are required to complete assessment tests (CPTs) that assess skill levels in Mathematics, English, and Reading before registering for classes. CPTs are administered in the Assessment Center, located in room B118 on the Charlestown Campus. Please call 617-228-2468 for a schedule of testing sessions. Students may receive a testing exemption if they provide transcripts of completed courses in Math and Writing from any other accredited institution.

ALTERNATIVE LEARNING Weekend College Courses

All Weekend College students are encouraged to attend a Weekend College information session, or see an Advisor in the Advising Counseling Center located in the LifeMap Commons (Room E235) before registering.

Advisors are available:

Monday-Wednesday: 8:30 a.m.-7 p.m. Thursday: 11 a.m.-7 p.m. Friday: 8:30 a.m.-4 p.m.

Advisors are also available on:

Saturdays and Sundays: 8:30 a.m.-4 p.m. during the fall and spring semesters.

Online advisors are available at onlineadvising@bhcc.mass.edu.

For more information, please call:

617-228-3396 (Monday-Friday) 617-228-2345 (Saturday)

or e-mail onlineadvising@bhcc.mass.edu.

BHCC requires all students check their BHCC email for important campus-wide notifications and announcements, as well as BHCConline course-related information.

CENTER FOR SELF-DIRECTED LEARNING

The Center for Self-Directed Learning (CSDL) provides a unique program of study for Bunker Hill Community College students. This program allows students to complete coursework without attending regular class meetings, working independently according to their own schedule and educational needs. CSDL students work under the guidance of a course facilitator, who will be available to answer questions and offer advice, also evaluate, respond to, and grade student work. Facilitators are assisted by trained professional and peer tutors, who work closely with students in a one-on-one setting, or in small groups. Through the

use of traditional material and multimedia resources as well as the required hours at the Center, students remain active and engaged. Students are able to set their schedules based on their own needs. For more information, please visit our website at www.bhcc.mass.edu/csdl, call 617-228-2225, e-mail us at csdl@bhcc.mass.edu, or visit in room H165.

Fall Semester hours:

Monday-Thursday: 8:30 a.m.-9:00 p.m. Friday: 8:30 a.m.-1:00 p.m. Saturday-Sunday: 8:30 a.m.-4:00 p.m.

MINI SESSIONS

BHCC offers students the option of taking courses in a seven-week accelerated format. Mini Sessions are perfect for those students who may have missed the traditional registration period. Mini Sessions also give the student an opportunity to register for a course they may have been closed out of during the traditional semester.

Courses marked with a leaf symbol are part of BHCC's ongoing efforts to integrate sustainability into the College's curriculum. These courses emphasize the importance of environmental responsibility and contribute significantly to students, understanding and practice of sustainability. Not all sections may be sustainable, please check with the Academic Records Office if you have questions.

ACCOUNTING

ACC-101 Principles of Accounting I 3 credits After a brief consideration of the meaning and purpose of accounting, this course explores the basic statements of an accounting system: the balance sheet, the income statement and the statement of owner's equity. Students will examine the accounting cycle with an emphasis on the methods of accumulating and summarizing data generated by business transactions. Students will apply their manual accounting skills to an automated accounting system using general ledger software. Areas of concentration will include adjusting entries, closing process, inventory analysis, merchandising, transactions, cash control procedures, receivables, and payables. Prerequisite: Academic Reading III

(ESL098) or Reading Skills II (RDG095).

ACC-102 Principles of Accounting II 3 credits This course will expand upon the basic concepts and theories that students learned in the Principles of Accounting I course. Students will be expected to apply their knowledge in a managerial decision-making mode. Areas studied include, but not limited to, the following: examine long-term assets and liabilities; financial statement analysis; transactions unique to the corporate business structure; bonds payable; planning and controlling using master budgets and cost behavior recognition utilizing cost-volume analysis as well as gaining exposure to accounting for manufacturers. Prerequisite: Principles of Accounting I (ACC101).

ACC-105 Accounting Information System 3 credits

www.bhcc.mass.edu/mvcourseaccess

This course introduces students to Accounting Information Systems. The course focuses upon integrated systems, set up, and applications. The modules covered include, among other topics: general ledger, report writing, invoicing, purchasing, inventory control, accounts receivable, accounts payable, cash receipts, cash disbursements, payroll, and spreadsheet application. Prerequisites: Principles of Accounting I (ACC101), Writing Skills II (ENG095) or placement and Academic Reading III (ESL098) or Reading Skills II (RDG095).

BUSINESS

BUS-101 Introduction to Business This course is a survey of the purpose, role, and responsibility of business in a capitalistic society, including an introduction to the major areas of business such as: Finance, Management, Economics, and Marketing. This course provides a basic foundation for the student who will specialize in some aspect of business in college, and it also provides the opportunity for non-business majors to learn about the business in which they will someday be both producers and consumers. This course will also enable students to explore career options in business, define a career path, and make connections between classroom learning and the larger business community. This course will fulfill the Learning Community Seminar requirement for first time, full-time students, to assist the student in making a successful transition from our unique urban community into an academic environment. The course will aid students in learning insights, skills, and attitudes necessary to develop academic success strategies for personal and career goals achievement. Prerequisites: Grade of C or better in Academic Reading I (ESL098) and Academic Writing III (ESL099) or Reading Skills II (RDG095) and Writing Skills (ENG090) or exemption by placement testing.

COMPUTERS

CIT-101 Computer Essentials 3 credits

This introductory course is intended for students with little to no computer experience. Students in developmental mathematics, reading and English as well as English as a Second Language (ESL) should consider this for their first computer course. This course starts with an introduction to the Windows environment and covers operating system topics appropriate for beginners, keyboarding, document processing and productivity skills necessary to function in today's electronic office environment. The course teaches students other skills necessary to use a personal computer as a tool for academic success. Utilizing the college's computer laboratories students get extensive "hands-on" personal computer experience in MS WORD as well as E-Mail, INTERNET, and World Wide Web (WWW) access and use. Students emerge from this course with an understanding of essential computer concepts and terminology, use and application of the INTERNET, keyboarding proficiency, and a high degree of competence with personal computer hardware and software. All Learner Outcomes and Competencies in this course are based on accepted, published ICT Industry Standards. For additional information and/ or a course syllabus contact CITDepartment@bhcc.

CIT-113 Information Technology **Problem Solving** 3 credits

This course will give students "hands-on" experience in a wide-range of modern information technology. Several IT concepts will be introduced that will provide a basis for further study in Information Technology. Students will work on a number of projects that will give perspectives on areas of IT including but not limited to: visual and/or robotic programming, social networking tools, web design and networking. Issues of security, privacy and ethics will also be examined. Students will leave the course with an understanding of the components of modern IT systems and the scope of knowledge needed to become an IT professional. Students are expected to have access to computer with internet access outside of class as there is a major web component to the course. Designed for first-time, full-time Computer Technology students, this course will fulfill the Learning Community Seminar requirement for the Computer Information Technology Department. First year students registering for this course should not register for Computer Applications/Concepts (CIT110). This course is not for Computer Science Transfer, Gaming or Web majors. Prerequisites: Grade of C or better in Reading Skills I (RDG090) and Writing Skills I (ENG090) or placement.

CIT-118 Principles of Internet & Information Security 3 credits This is a course in Internet and Information Security

which introduces students to all major areas related to securing both personal and organizational information in the "Internet Age". Beginning with an introduction to physical and electronic security issues, students proceed to explore the legal, ethical and professional issues in information and Internet security. Topics covered include, but are not limited to, identity theft, phishing and other email scams, personal and corporate firewalls, spyware and virus scanning software, chat rooms, Internet crimes against children, cyber predators, digital computer forensics, wired and wireless home & organization networks, cyber terrorism, and cyber vandalism. Students gain practical experience in Internet security considerations through a capstone Security Project. Students completing the course also attain the i-SAFE.Org certification. Prerequisite: Applications/Concepts (CIT110) or IT Problem Solving CIT113) or Introduction to Computer Science & OOP (CIT120), equivalent experience or permission of the department chairperson. For additional information and/or a course syllabus contactCITDepartment@ bhcc.mass.edu.

CIT-120 Introduction to Computer Science & Object Oriented Programming 4 credits

This is a first course in Object Oriented Programming (OOP) theory, logic and design. Taught in the College's "hands-on" computer classrooms, College's "hands-on" computer classrooms, this course emphasizes the program design and development process including concepts of variables and flow control, objects, classes, methods, and polymorphism. Students will use an Object Oriented Programming language as they design code, debug and implement several programs covering the topics presented. Students taking this course are expected to have solid knowledge of basic computer terminology,

internet navigation and email, operating system and file management skills. Strong analytical skills are recommended for students enrolling in this course. Please note that this course is a four credit course with six contact hours and analogous homework. This course fulfills the Learning Community Seminar requirement for students in AA Computer Science, AS Computer Science, and AS Computer Engineering areas of study. Other departments may allow this course to be used as a learning community seminar for their students. Students in majors other than the ones listed above should obtain their advisor or the leading faculty members approval before registering in the course. Prerequisites: Intermediate Algebra (MAT099), Writing Skills II (ENG095), and Reading Skills II (RDG095) or placement. Pre/corequisite: College Algebra-STEM (MAT194). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-121 Introduction to Computer Forensics 3 credits

This is an introductory course in Computer Forensics. Forensics Computing, Digital Forensics, or Computer Forensics is the name for a newly emerging field of study and practice that incorporates many areas of expertise. Some of these areas have been called network security, intrusion detection, incident infrastructure protection, recovery, continuity planning, software engineering, cyber security, and computer crime investigation. It is an area of practice in public law enforcement at the federal, state and local levels that deals with cyber crime, cyber vandalism, cyber predators, and cyber terrorism. In the private sector, it deals with critical infrastructure such as business, hospitals, utilities transportation, finance, education, and other key institutions. Taught in the College's hands-on laboratory students will gain an in-depth knowledge of the principles, procedures, and techniques used in digital forensic analysis. Prerequisite: Computer Applications/Concepts (CIT110), Applications/Concepts (CIT10), Information Technology Fundamentals (CIT112), IT Problem Solving (CIT113), or Intro to Computer Science & Object Oriented Programming (CIT120) or permission of the department chair.

M1 LEC M 5:30 p.m.-8:15 p.m. TBA WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess.

CIT-125 Python Programming 3 credits This is an introductory course designed for any student interested in learning computer programming concepts and hands on computational thinking, all in the context of the Python programming language. No prior experience in programming is necessary. Students will use their own problem solving abilities to implement programs in Python. This course will show the student how to create basic programming structures including decisions and loops. Further, students will explore unique Python data structures such as tuples and dictionaries. Students will also learn to perform basic debugging techniques. At the end of this course, the student will have learned enough concepts in computer science and programming to be able to write Python programs to solve problems on their own. This course will prepare the student to move on to the Advanced Python Programming course. Pre-requisite: Applications and Concepts (CIT110) or IT Problem Solving (CIT113) or Intro to Computer Science and Object Oriented Programming (CIT120) or Maya Foundations (CMT121) or permission of the Department Chair. For addition information and/or a course syllabus contact CITDepartment@bhcc.mass.edu. All prerequisites must be completed with a C or better.

LEC M,W 1:00 p.m.-2:15 p.m. D121B J L'Heureux

COURSE DESCRIPTIONS & Section Listings

CIT-128 Database Design with MS Access

3 credits

This is a comprehensive course in the use and application of computers in database applications based on the most current version of Microsoft Access. The course covers all aspects of database design including entity relationship modeling, tables, reports, queries, forms and other database objects. All key MS Access functionality including Internet applications, integration with the Web and other software programs are covered. Students gain some experience using Structured Query Language (SQL) and Visual Basic for Applications (VBA) in the final component of the course. Microsoft Corporation has approved this course material as courseware for the Microsoft Business Certification (MBC) Program and students may choose to take the MBC ACCESS Certification Examination upon completion of this course. Prerequisite: Applications/Concepts (CIT110) or IT Problem Solving (CIT113) or Introduction to Computer Science & OOP (CIT120), equivalent experience or permission of the department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass. edu.

CIT-133 Introduction to Microsoft Office 3 credits

This introductory course covers the use and application of integrated PC applications software based on the most current version of Microsoft Office. The course initially covers the MS Windows skills necessary to complete the course. Using the hands-on college computer laboratory, the course covers the following applications in detail: Word Processing, Spreadsheet, Database, Presentation Graphics, and Desktop Information Management. The course emphasizes Internet applications relating to MS Office. It also covers integration among the MS Office Applications. Microsoft Corporation has approved this course material as courseware for the Microsoft Business Certification (MBC) Program and students may choose to take the MBC Certification Examination(s) upon completion of this course. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-162 Introduction to Networking 3 credits This course introduces students to fundamental networking concepts and technologies. material in this course encompasses a broad range of technologies that facilitate how people work, live, play, and learn by communicating with voice, video, and other data. First, you will examine human versus network communication and see the parallels between them. Next, you will be introduced to the two major models used to plan and implement networks: OSÍ and TCP/IP. You will gain an understanding of the "lavered" approach to networks and examine the OSI and TCP/IP layers in detail to understand their functions and services. You will become familiar with the various network devices, network addressing schemes and, finally, the types of media used to carry data across the network. In this course, you will gain experience using networking utilities and tools, such as Packet Tracer and Wireshark, to explore networking protocols and concepts. These tools will help you to develop an understanding of how data flows in a network. A special "model Internet" is also used to provide a test environment where a range of network services and data can be observed and analyzed. Prerequisite: Computer Applications/Concepts (CIT110) or Information Technology Fundamentals (CIT112) or IT Problem Solving (CIT113) or Intro to Computer Science & Object Oriented Programming (CIT120) or permission of the department chair. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-167 Routers and Routing Basics 3 credits The primary focus of this course is on routing and routing protocols. The goal is to develop an understanding of how a router learns about remote networks and determines the best path to those networks. This course includes both static routing and dynamic routing protocols. By examining multiple routing protocols, you will gain a better understanding of each of the individual routing protocols and a better perspective of routing in general. Learning the configuration of routing protocols is fairly simple. Developing an understanding of the routing concepts themselves is more difficult, yet is critical for implementing, verifying, and troubleshooting routing operations. Each static routing and dynamic routing protocol chapter uses a single topology throughout that chapter. You will be using that topology to configure, verify, and troubleshoot the routing operations discussed in the chapter. The labs and Packet Tracer activities used in this course are designed to help you develop an understanding of how to configure routing operations while reinforcing the concepts learned in each chapter. Prerequisite: Introduction to Networking (CIT162). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

PC Hardware & Software CIT-182 This course provides an excellent, interactive exposure to personal computers, hardware, and operating systems. Students completing this course will be able to describe the internal components of a personal computer, assemble a system, install an operating system, and troubleshoot using system tools and diagnostic software. They will also be able to connect computers to the Internet, share resources in a networked environment and develop greater skills and confidence in working with desktop and laptop computers. Students participate in "hands-on" activities and lab-based learning to become familiar with various hardware and software components and discover best practices in maintenance and safety. Topics covered include: laptops and portable devices, wireless connectivity, security, safety and environmental issues. Stand alone virtual learning tools supplement classroom instruction and provide opportunities for interactive "hands-on" learning. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-216 Visual Basic 3 credits

This course covers an introduction to computer programming using Visual Basic. The course provides students with "hands-on" exposure to object-oriented programming techniques and emphasizes programming logic, using the event-driven components of Visual Basic. Using laboratory case assignments, students plan, design, and create their own Windows applications. They learn how to create a user interface, set control properties, design the logic structures of the project and write the associated Visual Basic code. Topics covered include variables and mathematical operations, decision and looping structures, procedures and functions and single level arrays. Prerequisite: Applications/ Concepts (CIT110), IT Problem Solving (CIT113) or Introduction to Computer Science & OOP (CIT120). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-218 Intermediate Visual Basic 3 credits Expanding on the principles of object oriented and visual programming contained in Visual Basic (CIT216), this intermediate-level course provides students with additional in-depth use of the Visual Basic language. Students gain experience working with VB arrays and data interfaces, combination controls and functions, menu design and database interfaces. Multiple Classes and Inheritance will be covered as part of the continuing exposure to object oriented programming. The course emphasizes the incorporation of databases within a Visual Basic Project. Prerequisite: Visual Basic (CIT216) or permission of the instructor and/or department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess.

CIT-219 Information Security and Assurance

3 credits

Emphasis in this course in Information Security and Assurance will be placed on understanding the key issues associated with protecting information, the technologies behind securing information and the subsequent detection and response to security incidents. Topics will include inspection of information assets, detection of and reaction to threats to information assets, and examination of preand post-incident procedures, technical responses and an overview of the Information Security Planning functions. There will be a "hands-on" lab component required for this course. Students taking this course will be required to sign The White Hat Oath, a Code of Ethics form the International Information Systems Security Certification Consortium, Inc.(www.isc2.org). Prerequisite: Windows Operating Systems (CIT268). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess.

CIT-221 Advanced Computer Forensics

3 credits

This course provides advanced work in computer and digital forensic analysis. Emphasis in this course will be placed on file system forensic recovery, analysis and reporting, intrusion detection and analysis, and advanced use of computer forensics tools. Topics covered in Introduction to Computer Forensics (CIT121) will be expanded upon especially in the areas of file system analysis, drive imaging and backup,

COURSE DESCRIPTIONS & Section Listings

email and mobile devices forensics and the impact these analyses have upon investigations Prerequisite: Introduction to Computer Forensics (CIT121).

LEC T 6:00 p.m.-8:45 p.m.

CIT-230 Help Desk Techniques 3 credits This course provides students with an overview of the design, implementation, and management of a computer help desk or customer support center. Course topics include customer service skills, troubleshooting tools and methods, problemsolving strategies for common support problems, the incident management process, and user needs analysis and assessment. The course also covers industry certifications, professional associations, and standards of ethical conduct for help desk personnel. Prerequisites: Applications/Concepts or IT Problem Solving (CIT113)or Introduction to Computer Science & Object Oriented Programming (CIT120), Writing Skills II (ENG095), Reading Skills II (RDG095) and one additional completed CIT course. For additional information and/or a course syllabus contact CITDept@bhcc.mass.edu.

CIT-234 **Decision Support** Using MS Excel 3 credits

This comprehensive course covers the use and application of Decision Support using spreadsheet software based on the most current version of Microsoft Excel. The applications include basic spreadsheet operations, charting, web queries, multiple sheet workbooks, macros, advanced functions, and data base features. The course emphasizes applications involving financial decisionmaking, financial planning and "what-if" analysis as they relate to various business and organizational models. Internet applications of MS Excel and integration of the other MS Office programs are also covered. Microsoft Corporation has approved this course material as courseware for the Microsoft Business Certification (MBC) Program and students may choose to take the MBC EXCEL Certification Examination upon completion of this course. Prerequisite: Applications/Concepts (CIT110) or Introduction to Computer Science & OOP (CIT120) or equivalent experience or permission of the department chairperson. For additional information and/or a course syllabus contact CITDepartment@ bhcc.mass.edu.

CIT-236 SQL Programming This course introduces students to the fundamentals and functions of Structured Query Language (SQL), including relational database, table creation, updating, and manipulation concepts. Using a live data base, students learn SQL basics and then move on to the more sophisticated and challenging aspects of SQL. Students get in-depth knowledge of the language through extensive use of Internet based. industry standard SQL programming and certification testing engines. Upon completion of this course, students have the skills and competencies required to program in SQL and the background necessary to continue to intermediate and advanced courses in database procedural programming and database administration. Prerequisite: Computer Applications/ Concepts (CIT110) or IT Problem Solving (CIT113) or Introduction to Computer Science and Object Orient Programming (CIT120), or permission of the department chairperson. For additional information and/or a course syllabus contactCITDepartment@ bhcc.mass.edu.

CIT-237 C++ Programming 4 credits In this course, students who already have been exposed

to programming and Object Oriented thinking, develop the ability to correctly analyze a variety of problems and generate appropriate algorithmic solutions using the C++ Programming Language. The course emphasizes the principles of top-down structured design and Object Oriented thinking. Topics include but are not limited to branching and looping mechanisms; arrays, functions and function overloading, arguments by reference and by value as well as optional arguments; recursion; pointers, creating libraries and namespaces, structures and classes, constructors and other methods, overloading operators; file I/O; inheritance and polymorphism. Strong analytical skills are recommended for students enrolling in this course. Prerequisite: Writing Skills II (ENG095), College Algebra-STEM (MAT194) and Introduction to Computer Science & Object Oriented Programming (CIT120) with grade C or better or equivalent experience with permission of the department chairperson. For additional information and/or a course syllabus contact CITDepartment@ bhcc.mass.edu. All prerequisites must be completed with a C or better.

M1 LEC/LAB M,W 6:00 p.m.-8:15 p.m. D116

CIT-239 JAVA Programming 4 credits In this course, students who already have been exposed to programming and Object Oriented thinking, develop the ability to correctly analyze a variety of problems and generate appropriate algorithmic solutions using the Java Programming Language. The course emphasizes the principles of top-down structured design and Object Oriented thinking. Topics include but are not limited to branching and looping mechanisms; arrays, functions and function overloading, arguments by reference and by value as well as optional arguments; recursion; creating packages, structures and classes, constructors and other methods, file I/O; inheritance and polymorphism. Strong analytical skills are recommended for students enrolling in this course, plus familiarity and experience working with the Internet and basic HTML tags. The course covers creating both Java Applications and Java Applets including event handling, animation, and audio. Prerequisite: Writing Skills II (ENG095), College Algebra-STEM (MAT194) and Introduction to Computer Science & Object Oriented Programming (CIT120) with grade C or better or equivalent experience with permission of department chairperson. For additional information and/or a course syllabus contact CITDepartment@ bhcc.mass.edu.

T1 LEC/LAB T,TH 6:00 p.m.-8:15 p.m. TBA

CIT-242 Data Structures

3 credits This course prepares students to understand the fundamentals of data structures with an emphasis on software engineering. Topics include multidimensional arrays, records, dynamic memory allocation, stacks, queues, lists, trees, graphs, and allocation, stacks, queues, lists, trees, graphs, and others. The department strongly recommends that students achieve a grade of B- or better in Java Programming (CIT239). Prerequisite: Java Programming (CIT239) and Precalculus (MAT197). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

LEC F 5:00 p.m. 7:45 p.m.

CIT-250 Collaboration, Communication & Integrating * 3 credits

This is a course in modern office technology which introduces students to all major areas of personal and organizational collaboration, communication and integration of MS OFFICE applications. Building on students' basic knowledge of the most current version of the core MS OFFICE applications, the course proceeds to cover in detail, the integration among OFFICE applications including Object Linking & Embedding (OLE), On-Line Meeting, document sharing, and the other collaboration features of MS OFFICE. Using WORD as the "core" application, students gain practical experience in moving and linking data among all applications: WORD, EXCEL, ACCESS, POWERPOINT and OUTLOOK. Advantages and limitations of Voice over IP (VoIP) and video conferencing, along with the importance of security and other considerations involved in implementing these technologies are also covered. Students also gain experience in web enabling and publishing as well as knowledge of the principles, best practices, procedures and techniques used in implementing all of these applications in offices large and small. Microsoft Corporation has approved this course material as courseware for the Microsoft Business Certification (MBC) Program and students may choose to take the MBC Certification Examination(s) upon completion of this course. Prerequisite: Computer Applications/Concepts (CIT110) or IT Problem Solving (CIT113) or equivalent course or experience or permission of department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. M Puopolo

CIT-262 Wireless Technology This course introduces students to the fundamentals of planning, installing, maintaining and troubleshooting

a network supported by unbound media. It is assumed that students have no prior knowledge of wireless networks and devices. Hence, this course permits students to learn how to apply and support wireless technology in personal, LAN, MAN, CAN and WAN networks. The course is divided into two sections, one that teaches the wireless skills required to take and pass your Certified Wireless Network Administration (CWNA) exam and the other educates students on how many different wireless devices work. Prerequisite: Introduction to Networking (CIT162).

01HB HYB T 2:30 p.m.-3:45 p.m. D103 D Akerley-Procopio Web component required

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. D Akerley-Procopio

CIT-264 Networking Security The goal of this course is to provide you with a fundamental understanding of network security principles and implementation. You will learn about the technologies used and principles involved in creating a secure computer networking environment. You will learn about the authentication, the types of attacks and malicious codes that may be used against your network, the threats and countermeasures for e-mail, Web applications, remote access, and file and print services. A variety of security topologies are

discussed as well as technologies and concepts used for providing secure communications channels, secure internetworking devices, and network medium. Further, you will learn about intrusion detection systems, firewalls, and physical networking security concepts. In addition, security policies, disaster recovery, and computer forensics are covered. Aside from learning the technologies involved in security, you will get to understand the daily tasks involved with managing and troubleshooting those technologies. You will have a variety of hands-on and case project assignments that reinforce the concepts you read in each chapter. Prerequisite: Introduction to Networking (CIT162)

LEC T 6:00 p.m.-8:45 p.m.

CIT-267 Switching Basics/ Intermediate Routing 3 credits

The goal of this course is to develop an understanding of how switches are interconnected and configured to provide network access to LAN users. This course also teaches how to integrate wireless devices into a LAN. The primary focus of this course is on LAN switching and wireless LANs. The goal is to develop an understanding of how a switch communicates with other switches and routers in a small- or medium-sized business network to implement VLAN segmentation. This course focuses on Laver 2 switching protocols and concepts used to improve redundancy, propagate VLAN information, and secure the portion of the network where most users access network services. This course will go to great lengths to explain the underlying processes of the common Layer 2 switching technologies. The better the underlying concepts are understood, the easier it is to implement, verify, and troubleshoot the switching technologies. Each switching concept will be introduced within the context of a single topology for each chapter. The individual chapter topologies will be used to explain protocol operations as well as providing a setting for the implementation of the various switching technologies. The labs and Packet Tracer activities used in this course are designed to help you develop an understanding of how to configure switching operations while reinforcing the concepts learned in each chapter. Prerequisite: Routers and Routing Basics (CIT167). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-268 **Windows Operating** 3 credits Systems

This course provides students with in-depth, handson experience with the most commonly used versions of the Windows operating systems. Students gain experience using system file managers, utilities, setup procedures, and other major components of the operating systems. In addition, the course emphasizes gaining an understanding of device drivers, link libraries, memory management, multi-tasking requirements, and multi-media considerations. Upon completion of the course, students have a high degree of competence in the application and use of these Windows operating systems such as Windows, DOS, and Linux. Prerequisites: Computer Applications/Concepts (CIT110), IT Problem Solving (CIT113) or Intro to Computer Science/Object Oriented Programming (CIT120) or permission of the department chairperson. For additional information and/or a course syllabus contact CITDept@bhcc. mass.edu.

Batch File Programming CIT-271 1 credit

This course teaches students how to create batch files to automate a sequence of commands, to write and use batch files for complex tasks, to use batch file subcommands, to halt the execution of a batch file and to write batch files using replaceable parameters and environment variables. Prerequisite: Linux Administration/Lab (CIT270). Pre/corequisite: Windows Operating Systems (CIT268). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. J Fernandes

CIT-274 WAN Technologies 3 credits

The primary focus of this course is on accessing wide area networks (WAN). The goal is to develop an understanding of various WAN technologies to connect small- to medium-sized business networks. The course introduces WAN converged applications and quality of service (QoS). It focuses on WAN technologies including PPP, Frame Relay, and broadband links. WAN security concepts are discussed in detail, including types of threats, how to analyze network vulnerabilities, general methods for mitigating common security threats and types of security appliances and applications. The course then explains the principles of traffic control and access control lists (ACLs) and describes how to implement IP addressing services for an Enterprise network, including how to configure NAT and DHCP. IPv6 addressing concepts are also discussed. During the course, you will learn how to use Cisco Router and Security Device Manager (SDM) to secure a router and implement IP addressing services. Finally, students learn how to detect, troubleshoot and correct common Enterprise network implementation issues. The labs and Packet Tracer activities used in this course are designed to help you develop an understanding of how to configure routing operations while reinforcing the concepts learned in each chapter. Prerequisite: Switching Basics & Intermediate Routing (CIT267). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-275 Information Security

Seminar

This course enables the security specialist to employ the various methodologies, tools, and techniques acquired in earlier course curriculum in protecting, hardening and attacking a network in a Capstone course. The student will be introduced to projects/ problems/or scenarios which will require hands on engagement to address. The course will emphasize problem solving, critical thinking, and use of multiple skills, techniques, and tools because of the complex nature of the projects/problems/scenarios. Students are expected to have access to computer with internet access outside of class as there is a major web component to the course. Pre/corequisite: Ethical Hacking (CIT273) or permission of the Department

D102 J L'Heureux 01HB HYB T 2:30 p.m.-3:45 p.m. Web component required

CIT-277 Health Information

Networking 3 credits

The Cisco Health Information Networking course, offered through the BHCC Cisco Networking Academy, is a technology-focused curriculum primarily designed for students who are looking for career-oriented, entry-level healthcare focused skills that can be applied toward entry-level specialist careers in healthcare networking. Health Information Networking is a blended curriculum with both online and classroom learning. The program aims to develop an in-depth understanding of principles and practicalities needed for information technology professionals wishing to specialize in healthcare network implementations. Topics include: basic information on healthcare settings, Principles of security and privacy in healthcare, fundamentals of information technology in healthcare, fundamentals of electronic health records systems, basic information on medical practice workflows, how to adjust workflows for electronic medical record implementations, and designing, securing and troubleshooting a network to support a medical group. Prerequisites: Routers and Routing Basics (CIT167) or CCNA Certification, equivalent experience or permission of the CIT department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. DAkerley-Procopio

CIT-279 CCNA Security 3 credits

This course equips students with the knowledge and skills needed to prepare for entry-level security specialist careers and prepare for the CCNA Security certification. This course is a hands-on, careeroriented e-learning solution that emphasizes practical experience. CCNA Security aims to develop an indepth understanding of network security principles as well as the tools and configurations available. The following tools are covered: Protocol sniffers/ analyzers; TČP/IP and common desktop utilities; Cisco IOS Software; Cisco VPN client; Packet Tracer (PT); and Web-based resources. Prerequisite: Routers and Routing Basics (CIT167) or CCNA Certification, equivalent experience, or permission of the department chair. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. D Akerley-Procopio

MS Windows Network CIT-282 Administration/Lab 4 credits

This course provides students with the necessary knowledge and hands-on skills required to manage the most current and industry-accepted version of Microsoft Windows. The course tailors information to requirements necessary to complete the Microsoft Certified Professional (MCP) exam required by industry. Topics include, but are not limited to, installation, managing users and groups, managing domains via an overview of the Active Directory Services feature, print services, disk storage, remote access, managing and monitoring the network, the Registry and troubleshooting techniques. Course labs challenge students to piece together new and old networking concepts that reinforce each topic. Prerequisite: Introduction to Networking (CIT162). Pre/corequisite: Windows Operating Systems

CIT-285 Advanced Java **Programming** 3 credits

This course thoroughly examines many of the sophisticated features of the Java programming language, including interfaces, advanced graphics, some data structures, file I/O techniques, multithreading, advanced JDBC Servlets, and Java Server Pages. Students demonstrate their mastery of the material through a series of graded projects and examinations that challenge at an extremely high level. The course not only instructs in the preparation of applications and applets that focus on business-related topics, but also teaches JAVA in an internet-based, integrative environment that utilizes cross-platform tools. Prerequisites: Java Programming (CIT239) and Precalculus (MAT197). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

S1 LEC S 9:00 a.m.-11:45 a.m.

CIT-287 Survey of New Popular

OOPL for Programmers 3 credits This course is for students who already have deep knowledge of an object Oriented Language (Advanced java or Advance C++). This course will cover in depth three of the most commonly requested OOPL in the job market, C#, Visual Basic.NET and Python (languages covered may change depending on the current job market needs). The course will focus on the idiosyncrasies of the different new languages. Knowledge of programming structures and ability to implement lengthy and complex programming solutions, use of the debuggers and ease to adapt in deferent IDEs is assumed. Long capstone-like projects will be required for each language examined and students will be responsible to analyze and solve the problems by applying the good programming practices and styles already learned in prior semesters. Prerequisites: Grade of C or better in Advanced Jav programming (CIT285) or Advanced C++ (CIT284), and Precalculus (MAT197).

LEC S 12:00 p.m.-2:45 p.m.

CIT-502 IT Career Explorations

This is a workshop class that is designed to provide you with the tools to evaluate your own career development and to explore the Information Technology job market. Each week students will engage in classroom activities and assignments designed to assess and to evaluate your values, skills and interests as they relate to the world of work. Students will utilize resources on the BHCC portal and beyond to explore careers, research employers and to navigate the local job market in the IT industry. All assignments and activities will culminate in each student having a thorough understanding of characteristics that make up available career plan that enhances their success in becoming employed. This class is open to anyone with an interest in guided career exploration and a desire to be employed within the field of Information Technology.

FT LEC W 6:00 p.m.-8:30 p.m. M Silcott WBFT WEB For username and password, go to

www.bhcc.mass.edu/mycourseaccess.M Silcott

CIT-521 Healthcare IT Concepts I

This course will provide students with the knowledge and skills to successfully understand the Healthcare IT industry and to adequately prepare for the CompTIA Healthcare IT Technician certification exam. Topics include the operational, regulatory and security concepts necessary to provide hardware and software support in healthcare environments where Electronic Health Record (EHR) systems are being deployed and maintained. Students will understand healthcare terminology and practical workflow concepts while adhering to code of conduct policies and security best practices. Hands-on activity labs, virtual labs and web-based simulation will provide a practical understanding of the material. Prerequisite: Applications/Concepts (CIT110). Pre/co-requisite: PC Hardware and Software (CIT182) or permission of department chair.

01HB HYB M 3:55 p.m.-5:10 p.m. Web component required

CIT-529 Configuring and

Troubleshooting Hardware 3 credits This course is a companion 'hands-on' lab course to CIT182-PC Hardware and Software. This course is an introduction to the installation, maintenance and repair of Personal Computers and related equipment. Students will develop an understanding of PC environments including operating systems, the motherboard, power supply, switch setting, I/O cards, memory, and storage devices as well as connecting peripherals. In the lab, students will gain hands-on experience by problem solving using various diagnostic tools and skills.

FT LEC F 9:00 a .m.-3:00 p.m. M104 W Cronin Class meets 10/24/14-12/05/14

EPU-101 DC Circuit Theory & Lab This course provides an introduction to the nature of electricity in general, in-depth coverage of direct current electrical theory and laboratory practices. Topics covered include static electricity, the Bohr

Atom, Ohm's Law, Kirchhoff's Law, network theorems, and magnetism. Course meets: 3 hrs. lecture: 3 hrs. lab. Pre/corequisite: Topics of Algebra/Trigonometry (MAT193) or may be taken concurrently.

01 LEC T,TH 8:30 a.m.-11:15 a.m. M104

EPU-151 Fund of Single **Phase Metering**

4 credits

This course introduces students to the fundamentals of Single Phase & Polyphase Metering, such as terminology and basic principles of meters. Students review basic math specific to metering, and gain knowledge of basic electricity and magnetism principles. Students will be introduced to meter testing equipment, meter diagrams and standards, and learn technical data and how to read watt-hour and demand meter schematics. They will also learn about power factor analyzers, high amperage current transformer cabinets, meter demand theory and demand registers. Students are introduced to various instrument transformers, their design, application and troubleshooting. They learn about high voltage metering equipment and how to safely install the equipment. In addition all students will learn how to connect electrical secondary services up to 600 volts from the pole to the house working off a ladder. Prerequisite: Admittance into the Electric Power Utility Program.

LEC F 7:00 a.m.-2:00 p.m.

EPU-203 Introduction to

Underground Operation 4 credits

This course introduces students to the basic operation Through classroom of underground systems. instruction and extensive hands-on experience, students will become familiar with the underground network electrical system and the various job responsibilities of underground personnel. Students will learn how to use the power formula to determine wire sizes. Correct manhole entry/exit procedures will be demonstrated. Underground safety issues including emergency rescue procedures will be covered. The sizing, installing and splicing of underground cables will be taught. An equipment orientation will be performed to provide students with a basic understanding of all underground apparatus. (Note: This course covers many of the same topics as EPU153, Underground and Substation Operations, but in greater detail and with more depth and handson practice.) Prerequisite: Acceptance into Electric Power Utility Program General Worker Option.

01 LEC TH 7:00 a.m.-2:00 p.m.

EPU-257 Power and

Distribution Systems 3 credits

This course introduces the basic concepts of electrical power systems. Subject areas include on electrical power generation, transmission, and distribution. Distribution system layout, distribution transformers, transmission line fault calculations and transmission line protection will also be covered. Prerequisite: AC Circuit Theory (EPU104).

01 LEC M,W 8:30 a.m.-9:45 a.m. M104 TRA

COMPUTER MEDIA TECHNOLOGY

CMT-101 Game Development Essentials

3 credits

This course will present the principles, concepts, and components all of games and the gaming industry's processes, methodologies, and principles associated with the design, development, and distribution of computer-based games and computer-based simulations. This course is designed to provide the student with an overall comprehension of all the precepts and building blocks that are essential to every computer-based game and simulation. This course fulfills the Learning Community Seminar requirement for students in Computer Media Technology. Prerequisites: Writing Skills II (ENG095) and Reading Skills II (RDG095) or placement.

LEC T,TH 11:30 a.m.-12:45 p.m. D115 B Craven

CMT-103 Managing Game Development

This course will cover the concepts and application of management tools and philosophies incorporated in today's game development climate for the purposes of effectively managing game production scenarios. The student will be introduced to the tasks associated with the development of a game or simulation projects and the constraints, effects, and ramifications affecting the project components. Additionally, the student will be taught critical project management analysis techniques such as resource allocation, estimating obstacles and opportunities and how to exploit them to the project's advantage. Prerequisites: Writing Skills II(ENG095) and Reading Skills II (RDG095).

LEC M,W 1:00 p.m.-2:15 p.m. D115 M Royle

CMT-111 HTML & Dreamweaver 3 credits

This course teaches the student the principles and concepts of designing and creating WEB pages in an HTML format. The course is designed to expose the student to the constructs of HTML tags, the attribute modification of HTML tags, the incorporation of CSS tags, CSS pseudo tags, dynamic effects using styles, and class assignments. Additionally, the course will teach the student the utilization of graphics and dynamic graphics used in Web design. Also included will be content presentation control via HTML tables, HTML layers, and HTML frames. The course will explore the requirements, tools and controls used in WEB page development by lecture, in-class practical exercises, and home study exercises. The course will also teach the student to create WEB sites using Dreamweaver as a state-of-the-art web authoring tool to enable rapid deployment of WEB development projects.

01HB HYB M 10:00 a.m.-11:15 a.m. D115 B Craven Web component required

CMT-113 Javascript 3 credits

This course teaches students the concepts and practical application of JavaScript programming language as a WEB authoring tool. Students learn to program WEB pages to perform such tasks as forms and form validation, image swapping, auto-scrolling text, browser detection and control and time and date extraction and conversion. The course explores designing and developing JavaScript functions using iteration loops, conditional statements, switch statements, parameter passing, location redirection, in-line JavaScript and remote access JavaScript utilization. Prerequisites: Computer Applications/ Concepts (CIT110) and HTML & Dreamweaver (CMT111).

01 LEC M,W 11:30 a.m.-12:45 p.m. D115 B Craven

CMT-119 The Human Character

3 credits This course will present concepts in the creation of 3D human character and object modeling using detailed structures based on polygon modeling design tools such as patch modeling, image planes, planar projections, and curve projections. This course will also cover in-depth NURBS modeling of 3D characters and conversion from NURBS to polygonals. These skills are requisite skills for the successful design and implementation of 3D game design and computer simulation projects. Most of these techniques were employed in the Sony Pictures animated whort film "The ChubbChubbs". Prerequisite: Game Development Essentials (CMT101).

01 LEC T,TH 7:00 a.m.-8:15 a.m. B Craven

3 credits

CMT-121 Maya Foundations

This course will present the principles of designing gaming and computer simulation using the same Autodesk Maya techniques and principles as were used in the Sony Pictures feature film "Open Season". The course will cover the fundamentals of three dimensional (3D) object creation, 3D object shading, shape texturing, scene and object lighting, and simple animations. Prerequisite: Writing Skills II (ENG095) or placement and Academic Reading III (ESL098) or Reading Skills II (RDG095).

01 LEC T,TH 10:00 a.m.-11:15 a.m. D115 M Bovle W1 LEC W 6:00 p.m.-8:45 p.m.

CMT-125 Cascading Style Sheets 3 credits

This course will cover the incorporation of modern web design controls for the formatting, placement, dynamics, interactive functionality, and animation web page content with CSS. CSS is the primary technology in use today in the fast paced world of web design and is used to present web content in a standardized manner that far exceeds the capabilities of the HTML language. CSS is in use in almost every one of the millions of web pages published in today's world and is a multi-browser, multi-language coding technology. CSS is found at all levels of the web design process and lends itself being incorporated as an in-line component, and embedded component, and a remote component on every HTML, JavaScript, XML, ASP.net, PHP, and Ruby pages written. It is prevalent and used in IE Explorer, Firefox, Mozilla, Safari, Opera, and Netscape browsers. CSS can be used to create amyriad of functions from the simple coloring of text content to the dynamics of drop-dow expandable menus to the inclusion of voice content. It is a technology that has rapidly replaced the traditional name-pair attribute coding scheme of the previous web design technology. Corequisite HTML & Dreamweaver (CMT111).

01HB HYB W 10:00 a.m.-11:15 a.m. D115 B Craven Web component required

WB WEB For username and password, go to

www.bhcc.mass.edu/mvcourseaccess.B Craven

CMT-211 XSLT 3 credits

This course is designed to add a new dimension to the students XML Web Design learning foundation by introducing them to the XSL style sheet and transformation language. XSL is a specialized formatting and manipulation that is uniquely applicable to the XML markup language which enables the developer of XML Web content to perform such tasks as contextual formatting, conditional selection of Web content from a data source, sorting of content on a Web page, dynamic counting, dynamic summarization, attribute processing, and creating dynamic document-wide numbering schemes. Prerequisites: HTML & Dreamweaver (CMT111) and XML (CMT117).

01 LEC M,W 2:30 p.m.-3:45 p.m. J Selia

CMT-215 ASP.NET

This course will teach the student the concepts and practical applications of the web-to-database interface. ASP.net is a powerful web technology that permits the construction of web sites that extract data from server side databases and present the data to the user dynamically. The ASP.net language is comprehensive and incorporates SQL server and scripting languages as part of its construction. ASP.net technology is widespread in use and is the technology behind many on-line-commerce sites today. Prerequisite: JavaScript (CMT113).

T1 LEC T 6:00 p.m.-8:45 p.m.

CMT-217 3D Modeling and Sculpting 3 credits This course will teach the student the processes and techniques of modeling and sculpting 3D characters and objects using Autodesk Mudbox software. The student will be taught the skills required to create production-ready 3D digital artwork for the game, film, television, and design industries. The student will be taught how to paint directly onto high-resolution 3D models, paint multiple material channels, execute texture baking, create accurate normal, displacement, and ambient occlusion maps, render quality results

integration with other 3D software applications. Prerequisite: Maya Foundations (CMT121). LEC T,TH 2:30 p.m.-3:45 p.m. M Boyle

directly in the viewport, and to employ seamless

CMT-223 Maya Character Animation 3 credits This course will present advanced concepts in the creation of 3D character animation from simple joint movement to complete synchronized character movement. This course will also cover blend shaping, skinning techniques, joint constraints and their effect on skinning. These skills are requisite skills for the successful design and implementation of 3D game design and computer simulation projects. Most of these techniques were employed in the Sony Pictures animated short film "The Chubb Chubbs".

Prerequisite: Maya Character Modeling (CMT123). 01 LEC T.TH 8:30 a.m.-9:45 a.m.

CMT-229 Creating 3-D Special Effects 3 credits

This course will present advanced concepts in the creation and implementation of special effects, shadings, caustics, global illumination, mental ray rendering, and lighting, shadows, and cameras. These skills are requisite skills for the successful design and implementation of 3D game design and computer simulation projects. Most of these techniques were employed in the Sony Pictures animated short film "The Chubb Chubbs". Prerequisite: Maya Foundations (CMT121).

01 LEC M.W 8:30 a.m.-9:45 a.m. M Boyle

CMT-231 Mel Scripting in Maya 3 credits

The course will cover the process of using Maya Embedded Language to manipulate and animate characters, objects, and object interactions into a complete animation scenario. MEL scripting incorporates traditional programming constructs such as loops, conditionals, functions, expressions, and nodes. In addition to traditional constructs this course will introduce specific animation and gaming constructs such as particle dynamics control, user input selection dialogs, solid body dynamics, and crowd systems. Prerequisite: Creating 2-D Special Effects (CMT229).

01 LEC M,W 7:00 a.m.-8:15 a.m. D115 B Craven

CMT-233 Game Programming 3 Cradits The course will cover the beginning phases of programming content and movement as a component of the entire game development and managed code process. The course will be taught using the C++ programming language and will be developed in the Microsoft Video Studio.Net Code development environment. The student will learn the fundamentals of C++ programming as they are applied to the creation and control of computer games. Prerequisite: Mel Scripting in Maya (CMT231).

01 LEC F 8:30 a.m.-11:15 a.m. D115

CMT-241 PHP/My SQL

3 credits

3 credits

PHP/MySql is a web development programming language that is used to provide dynamic interaction between web content pages and databases. PHP technology permits web developers to retrieve and maintain real-time information for presentation across the web delivery medium. The objectives of this course are to teach the student the skills required to effectively construct real-time web sites for the purposes of e-commerce and real-time information delivery. The student will learn how to design and publish web pages that interact with push/pull actions that interact directly with on-line databases. Prerequisites: HTML & Dreamweaver (CMT111) and SQL Programming (CIT236).

H1 LEC TH 6:00 p.m.-8:45 p.m. D115 TRA

CRIMINAL JUSTICE

CRJ-101 Introduction to **Criminal Justice**

3 credits

A survey of the history, development and the role of American Criminal Justice System are presented. Included are the organizations and jurisdictions of the various agencies, a review of the court process, professional orientation, and the current trends in the criminal justice system. The course will offer students the ability to use state of the art technology and interactive instruction. It stresses the application of knowledge learned to real-life situations. Ethical behavior issues will be raised and students will develop strategies to set boundaries, understand differences among people, develop professional codes of conduct and behavior, and develop a professional moral code of conduct. The course fulfills the Learning Community Seminar requirement for students in AS Criminal Justice. Prerequisites: Writing Skills II (ENG095), Academic Reading III (ESL098) or Reading Skills II (RDG095), or placement.

CUL-241 Chocolate and Sugar Artistry 3 credits

This course is designed to familiarize students with how to work with chocolate and sugar using various techniques. Students will practice these techniques in the production of chocolate confections, such as truffles and molded chocolates. Sugar artistry, such as poured, pulled and blown sugar will be demonstrated and applied. Students will also work with pastillage, marzipan, and gum paste. Additional expenses may include supplies, equipment, and/or uniforms. Prerequisite: Advanced Desserts (CUL145).

LEC T 2:30 p.m.-5:10 p.m. E426 J Krystofolski

CUL-243 Hot and Cold Desserts

This course is designed to introduce students to the production of chilled and frozen desserts. Students will also be introduced to the production of hot desserts, as well as to the production of desserts using both hot and cold components. Students will design menus for a bakeshop or pastry operation and develop an understanding of the various management tools required for the operation. Students will learn to analyze and forecast sales. An emphasis is placed on plating and garnishing techniques of dessert production. Students will also be introduced to molecular cooking techniques. Additional expenses may include supplies, equipment, and/or uniforms. Prerequisite: Advanced Desserts (CUL145).

LEC T 9:00 a.m.-1:00 p.m. E426 J Krystofolski

CUL-249 Baking for Health

This course will explore the options available for meeting the needs of the customer with dietary restrictions. The student will be introduced to lactosefree, gluten-free, and dairy-free, sugar-free baking. Students will also work with vegan recipes, as well as honey-free and egg-free recipes. Students will also be introduced to the production of pastries using substitute ingredients for health purposes. Healthy and low fat dessert alternative will be introduced. Additional expenses may include supplies, equipment, and/or uniforms. Prerequisite: Advanced Desserts (CUL145).

EDU-102 Becoming a Teacher- A Learning Community Seminar 3 cree

This learning community seminar is designed for education majors who are interested in making a difference in today's public schools. Inspired by the movie Waiting for Superman, this seminar looks at some of the pressing issues in today's public schools:

COURSE DESCRIPTIONS & Section Listings

overcrowding, lack of funding, outdated curriculum, classroom chaos, and shortage of good teachers (among many others). Sign up for this seminar and join students who want to join the next generation of super teachers. (Requirement: Must be an Education Major to enroll and should be in first two semesters of study at BHCC with 16 college credits or less

SEM W 2:30 p.m.-5:10 p.m. H149 A Reyes Class meets in the H Building

EDU-140 Practicum in Instruction 3 credits

This course exposes students to various techniques of learning through the experience of tutoring. Faculty develops supervised tutoring placements in specified $subject areas. The placements \, may \, be \, in \, the \, classroom, \,$ computer lab, Tutoring and Academic Support Center, the Center for Self-Directed Learning, and/or other areas on campus. Students must participate in a weekly on-campus seminar, in addition to two hours of tutoring per credit, per week. The seminar relates the field experience to students' objectives through discussions of learning styles, modes of instruction, cross-cultural awareness, tutoring techniques, and study habits. Students gain experience in tutoring, the evaluation process, and management of instructional operations. Prerequisites: Introduction & Foundations of Education (EDU101).

LEC TH 1:00 p.m.-2:15 p.m. A Reves

EMERGENCY MEDICAL TECHNICIAN

EMT-103 Emergency Medical Technician

7 credits

This course covers the rendering of emergency care to the sick and injured promptly and efficiently. It conforms to the EMT-B national standard curriculum, as adopted by the Commonwealth of Massachusetts, and is a prerequisite for taking the state EMT Exam. Students are responsible for taking the certification examination for EMT. Additional expenses may include supplies, equipment, and/or uniforms.

ENERGY & SUSTAINABILITY MANAGEMENT

ENV-110 Sustainability & Resource

Conservation/Lab 4 credits

This course is an introduction to fundamental concepts of sustainability and resource conservation as related to the human environment. Through laboratories and dialogue, students develop literacy in sustainability topics found in local, regional and global spheres and study a collaborative approach to reducing ecological impact of individuals and organizations. The course provides an opportunity for in-depth exploration of three topics related to sustainability: energy and conservation, renewable energy sources and climate action planning. Assigned readings illustrate the impact of resource conservation on quality of life. Laboratory work demonstrates concepts such as heat transfer principles and technologies such as solar, wind and fuel cells. Assignments support the College's pursuit of climate neutrality. This course meets the General Education Requirement Area 5 Course meets 3 hours lecture; 1.5 hours lab. Prerequisites: Foundations of Algebra (MAT097), Writing Skills II (ENG095), Reading Skills II (RDG095) or placement equivalency.

ENV-111 Survey of

Renewable Energy * 3 credits

This course investigates the potential of renewable energy technologies to help solve environmental and economic problems within society. Areas of investigation include solar energy, wind power, hydropower, geothermal, fuel cells, biomass, ocean wave power, and alternative transportation options. Also addressed are conventional energy sources including oil, coal, natural gas, and nuclear energy. Consideration will be given to related usues such as costs, externalities, system efficiencies, emissions and other environmental impacts, financing incentives, and the regulatory and market forces impacting the alternative energy industry. Students will learn how to assess the viability of incorporating renewable technology, such as solar or wind power, for residential and commercial applications. Course meets 3 hours lecture; 1.5 hours lab. This course meets General Education "Science and Technology" Area 5 requirement. Prerequisites: Foundations of Mathematics (MAT093), Writing Skills II (ENG095), Reading Skills II (RDG095) or placement equivalency.

01 LEC W 1:00 p.m.-2:15 p.m. B337 K Frashure LAB TH 8:30 a.m.-11:15 a.m.

ESM-105 Green Buildings *

This course provides a framework for making practical design and construction decisions that are environmentally responsible by focusing LEED environmentally responsible by locustring LELL (Leadership in Energy and Environmental Design) building standards. After completing the course, students will have the ability to sit for the LEED Green Associate Exam. Topics include trends in green building, costs and benefits of green buildings, third party certifications and rating systems, site selection and orientation, sustainable landscapes, storm water management, water efficiency, energy demand, energy efficiency, renewable energy in buildings, ongoing building performance, waste management, building materials, and indoor air quality. Prerequisites: Foundations of Mathematics (MAT093), Writing Skills II (ENG095), Reading Skills II (RDG095), or placement equivalency.

M1 LEC M 5:30 p.m.-8:15 p.m. B216 M Yanowitz

ESM-115 Sustainable Facilities

Management *

This course highlights the responsibilities, policies, and practices involved with managing the built environment to achieve sustainable goals. Students will gain an understanding of facilities operation, maintenance, architectural blueprint interpretation, health & safety awareness, and occupant engagement. Students will learn how to select and engagement. Students will learn now to select and assess energy usage of HVAC systems, electrical systems, lighting systems, and heating systems. Course content will center on facilities management as a process, and its relationship to other functions within an organizational setting. Students will explore the most current strategies and issues in the industry today, including sustainability, productivity, green buildings, as well as human and environmental factors. This course will utilize a combination of classroom techniques (presentation, discussion, team projects, case studies, and guest speakers) to give the students a full understanding of the issues and complexities of sustainable facilities management. Prerequisites: Foundations of Mathematics (MAT093), Reading Skills II (RDG095), and Writing Skills II (ENG095).

T1 LEC T 5:30 p.m.-8:15 p.m. J Herald

ESM-211 Project Management and Finance for Energy 🌞

This course examines the theory and practice of Project Management as applied to renewable energy and energy efficiency projects. The course also explores financial considerations for sustainable energy projects, as well as a variety of funding mechanisms. Special focus will be applied to project life-cycles, planning, controlling, and coordinating efforts of multiple individuals and/or working groups. Students will gain an understanding of financial measures of project performance, budgeting, feasibility, and explore various funding mechanisms including government incentives, specialized loans, and performance contracts through case studies. Prerequisite: Survey of Renewable Energy/Lab (ENV111).

01 LEC F 1:00 p.m.-3:45 p.m. B337 K Richert

ESM-299 Energy & Sustainability Internship *

3 credits

This course provides relevant field and/or research experience integrating theory and practice while providing opportunities to develop skills, explore career options, and network with professionals and employers in the clean energy and sustainability management fields. Prerequisites: Enrollment in the Energy and Sustainability Management Program, have completed a minimum of 10 credits in ESM courses with a B average or higher, or approval or EMS program directors. Students who do not meet attendance standards for the ESM program may not be eligible to participate in the internship.

01 LEC Days and Times to be Arranged TBA TRA

ENGLISH

ENG-005 IP Completion 0 credit

This course provides an organized, scheduled opportunity for students to satisfy the requirements of the IP Contract in English. Individualized support is provided through small group lectures and tutorial assistance. The original instructor is responsible for changing any grades. This course does not remain on transcript. Prerequisite: IP contract in English or permission of the instructor

LEC M,W 10:00 a.m.-11:15 a.m. A300 TMcLaughlin Restricted for students with an IP grade in ENG111

LEC T 6:00 p.m.-8:45 p.m. B104 F Brown

ENG-090 Writing Skills I

3 credits The first part of a two-semester basic writing sequence, this course develops writing skills needed to begin work in the College Writing program. The course places primary emphasis on the development of good sentence writing skills through frequent practice. Such practice may take the form of writing journals, paragraphs, and short essays. Faculty provide attention to difficulties with grammar, punctuation, and spelling primarily on an individual basis. The course does not satisfy any part of the College Writing requirement for graduation. Placement is determined by assessment testing or faculty referral. Upon completion of Writing Skills I (ENG090) with a grade of C or better, students enroll in Writing Skills II (ENG095).

COURSE DESCRIPTIONS & Section Listings

ENG-241 Journalism I

3 credits

This course combines class discussions of journalistic principles with practice in writing news stories. The course then shifts emphasis to field work for a newspaper. In this phase, students follow news leads, evaluate them, compose better ones, and check copy for accuracy and clarity. The course encourages students to proofread, edit, sell ads, and lay out final copy for the printer. Prerequisite: Writing Skills II (ENG095).

01 LEC T,TH 10:00 a.m.-11:15 a.m. D117 WB WEB For username and password, go to

www.bhcc.mass.edu/mycourseaccess. C Daniel

ENG-503 Fiction Writing Workshop This course presents the fundamentals of short story writing: plot structure, narrative voice, character development, as well as point of view, dialogue, description and significant detailing. Through short story reading assignments, class discussions and writing exercises, students will gain a deeper understanding of the fiction process while sharpening their own unique voice in writing the short story form. The majority of class time is devoted to the workshop process, reading and responding to the creative work. LEC T,TH 2:30 p.m.-3:45 p.m. E140

ENGLISH AS A SECOND LANGUAGE/BASIC

To register for any non-credit Basic English as a Second Language course, students must first take a placement test in the Assessment Center, Room B118. Classes begin September 8, 2014 and will end December 21, 2014

BLL-001 Basic Speak/Listen

This course is for beginners who wish to improve their conversation and pronunciation skills. Students will practice their conversation skills by speaking about interesting topics and improve their pronunciation skills with pronunciation drills. This course should be taken with Basic Read/Write (BLL002).

M1	LEC	M,W 7:30 p.m8:45 p.m. Class meets in the H Buildin		TBA
S1	LEC	S 9:00 a.m11:45 a.m. Class meets in the H Buildin	H156	TBA
SU	LEC	SU 9:00 a.m11:45 a.m. Class meets in the H Buildin	H120 ng	TBA

BLL-002 Basic Read/Write

This literacy course is for non-native speakers of English. Students learn basic writing and reading skills such as letter and word recognition, spelling, comprehending main ideas from short readings related to employment, education, and everyday life. Students learn introductory grammar structures. This course should be taken with Basic Speak/Listen (BLL001).

M1	LEC	M,W 6:00 p.m7:15 p.m. Class meets in the H Buildi	H156 ng	TBA

BSL-012 Grammar & Vocabulary II \$229

This course is for BSL010 and BSL011 students who wish to improve their conversation and pronunciation skills. Students will practice their conversation skills by speaking about interesting topics and improve their pronunciation skills with pronunciation drills.

LEC T 6:00 p.m.-8:45 p.m. TBA Class meets in the H Building

Before BSL students can enter academic ESL courses, they must take a placement test in the Assessment Center, Room B118.

ENGLISH AS A SECOND LANGUAGE/ACADEMIC

Low-Intermediate Level I Courses:

ESL-074 Listening Comprehension & Discussions

In this low-intermediate course students develop academic listening skills and participate in small group and whole class discussions based on articles, lectures, and multi-media sources. Students will learn grammar and vocabulary in the context of the materials used for listening, speaking, reading, and writing activities. Students must earn a C or better in order to pass the course. Prerequisite: Placement into ESL level I.

ESL-075 Grammar Structures & Editing

This low-intermediate course focuses on improving grammar and editing skills through weekly grammar lessons, writing assignments, class discussions and assessments. Students will develop their ability to compose grammatically correct and comprehensible sentences and short writings. Students receive individual feedback that targets their needs. Students must earn a C or better in order to pass the course. Prerequisite: Placement into ESL Level I.

3 credits

ESL-078 Academic Reading I 3 credits In this low-intermediate course, students learn pre-reading skills, organizational styles, academic vocabulary, dictionary use, referents, critical reading, basic verb tenses and parts of speech, and how to summarize, paraphrase, and identify main ideas and supporting details. Students will learn to complete homework assignments in basic MLA format. Students must earn a C or better in order to pass the course. Prerequisite: Placement into ESL Level I.

ESL-079 Academic Writing I In this low-intermediate course, students learn to write paragraphs and short essays through an academic writing process in a variety of rhetorical styles using basic MLA format. Student will write from personal experience and respond to reading by paraphrasing and quoting. Students will learn to write different sentence types, using coordinators and subordinators. Punctuation and grammar will be taught, and students will apply their knowledge by revising and editing their papers. Students must pass the ESL079 Writing Competency Exam and earn a C or better in order to pass the course. Prerequisite: Placement into ESL Level I.

High-Intermediate Level 2 Courses:

ESL-083 Pronunciation for Academic and Professional Success

This course for non-native speakers of English focuses on the pronunciation, rhythm and intonation of the English language to enable clearer, more effective, and native-like pronunciation in English. The course is designed for students who have a least intermediate fluency in English, but who require considerable accent reduction for academic and professional purposes. Students may be required to complete assignments in the Language Lab. Prerequisites: placement in Academic ESL Level I or higher.

ESL-085 Intermediate Grammar & Editing

This course is an integrated skills course for intermediate ESL students and focuses on improving grammar and editing skills. Instruction focuses on clauses and sentence variety in paragraphs and essays. Students receive individual feedback that targets their needs. Students must earn a C or better in order to pass the course. Prerequisite: a grade of C or better in ESL075 or placement.

ESL-086 Academic Listening & Note-Taking

This high-intermediate course focuses on listening and note-taking skills. Students develop a system for note-taking and learn how to use their notes to answer comprehension questions as well as to complete writing assignments. All listening and note-taking activities include reading and writing exercises. Students learn grammar in the context of the materials used for listening activities and student generated writing. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL074, ESL075, ESL078, and ESL079, or placement.

ESL-087 Contemporary Issues & Conversations

3 credits In this high-intermediate course, students practice and demonstrate effective speaking functions in small-group and whole-class discussions of academic reading materials. Students develop a method for delivering an oral presentation to a large group. All speaking activities are organized around reading and writing exercises. Students learn grammar and build their level-appropriate academic vocabulary in the context of speaking, in the context of the reading materials, and in the context of student generated writing. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in

ESL074, ESL075, ESL078, and ESL079, or placement.

ESL-088 Academic Reading II 3 credits In this high-intermediate course, students increase their level-appropriate vocabulary and develop their reading skills and strategies as they analyze, discuss, and write about longer readings. Students are also introduced to critical thinking skills such as drawing inferences, understanding idioms and figures of speech, and recognizing purpose and perspective. Students learn grammar in the context of the reading materials and in student generated writing. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL074, ESL075, ESL078, and ESL079, or placement.

ESL-089 Academic Writing II In this high intermediate course, students develop their writing skills with a focus on the process of college writing from planning and drafting to revising and editing. Students demonstrate their critical thinking skills by writing paragraphs and essays from their personal experience and from readings of moderate complexity. Students practice correct grammar and mechanics in the context of the readings and their own writing. Students must pass the ESL089 Writing Competency Exam and earn a grade of C or better in order to pass the course. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL074, ESL075, ESL078, and ESL079, or placement.

COURSE DESCRIPTIONS & Section Listings

Advanced Level 3 Courses:

ESL-095 Advanced Grammar & Editing

This course is for advanced ESL students and focuses on improving and refining grammar and editing skills. Students review points covered in lower-level grammar courses and further develop their ability to compose grammatically correct and comprehensible sentences, paragraphs, and essays. Topics include various clause types, conditionals, indirect speech, passive voice, and perfect modals. Students receive individual feedback that targets their needs. Students must earn a C or better in order to pass the course. Prerequisite: Grade of C or better in ESL085 or placement.

ESL-096 Lecture Comprehension

& Academic Vocabulary 3 credits
In this advanced course, students develop an academic note-taking system as they listen to lectures and authentic sources. Students practice using their notes to answer comprehension questions, write summaries of sources, and compose responses to critical thinking questions. Students learn advanced academic vocabulary and grammar in the context of advanced level readings, websites, and lectures. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL086, ESL087, ESL088, and ESL089 or placement.

ESL-097 Academic Discussions & Presentations

This advanced course focuses on the communication skills necessary in an academic setting. Students develop and improve a method for delivering an oral presentation to a large group using effective delivery, visual aids, secondary sources, and level-appropriate academic vocabulary. Students practice comprehensible pronunciation along with stress and intonation patterns. All speaking activities are organized around academic reading materials which students will write about and discuss in small groups. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL086, ESL087, ESL088, and ESL089 or placement.

ESL-098 Academic Reading III 3 credits This advanced course focuses on the critical and analytical reading skills necessary for success with college level materials. Students demonstrate comprehension of level-appropriate readings through class discussions, writing assignments, and other assessments. Students also develop critical (higher order) thinking skills by interacting with the readings and by summarizing, paraphrasing, quoting, responding to, and evaluating readings. Students do extensive work on understanding and analyzing main ideas and supporting details of articles and essays. Students learn grammar and academic vocabulary in the context of the reading materials. Students must earn a C or better in order to pass the course.

Prerequisites: Grade of C or better in ESL086, ESL087,

ESL088, and ESL089, or placement.

ESL-099 Academic Writing III 3 credits This advanced course focuses on the academic writing skills necessary for success in college content courses. Students develop their abilities with sentence structure, paragraph writing, and essay writing through extensive practice with multiple drafting, revising, editing, and proofreading. Students write from personal experience, answer essay questions from readings of substantial complexity, and write essays using research sources. Students learn grammar in the context of the readings and student generated writing. Students must pass the ESL099 Writing Competency Exam and earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL086, ESL087, ESL088, and ESL089 or placement.

FIRE SCIENCE

FPS-107 Fire Company Officership 3 credits This course examines the scope and functions of the fire company officer. Topics include the role of the fire service, departmental organization, administrative and management procedures, training, public relations, tactics and strategy, and fire prevention.

01 LEC W 3:00 p.m.-5:45 p.m. H156 W Barry Class meets in the H Building

FPS-111 Fire Service, This Century and the Next,

What Should We Expect 3 credits
This course provides the student with the history of the
fire service and its culture. The student will research
the ways that the fire service has changed over the
past century and how it is expected to change in the

The service and its culture. The student will research the ways that the fire service has changed over the past century and how it is expected to change in the next century. Topics will include the history for the fire service, changes in the fire service past and future, the evolution of equipment in the fire service, firefighter deaths and statistics as they pertain to the National Fallen Firefighters Foundation and its 16 Firefighter Life Safety Initiatives, as well as a field trip to the NFPA (National Fire Protection Association) and the role of the state training centers and a field trip to the Massachusetts Firefighting Academy in Stow, MA. These topics will be discussed with particular focus on the National Fire Administration's Fire and Emergency Services Higher Education (FESHE) Professional Development Model and its explanation of how education, training, experience and individual development is needed for a successful job in the

fire service. This course incorporates the learning outcomes of BHCC's Learning Community Seminar and fulfills the Seminar's requirements for first-time, college students.

SEM T 6:00 p.m.-8:45 p.m. D120

FPS-119 Principles of Fire and Emergency Services Safety and Survival 3 credits

This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavior change throughout the emergency services. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess.G Mahoney

FPS-123 Principles of **Emergency Services** 3 credits

This course provides an overview to fire protection and emergency services; career opportunities in fire protection and related fields; culture and history of emergency services; fire loss analysis; organization and function of public and private fire protection services; fire departments as part of local government; laws and regulations affecting the fire service; fire service nomenclature; specific fire protection functions; basic fire chemistry and physics; introduction to fire protection systems; introduction to fire strategy and tactics; life safety initiatives. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

W1 LEC W 6:00 p.m.-8:45 p.m. B127 P Mahoney Jr.

FPS-125 Hazardous Materials Chemistry 3 credits

This course provides basic chemistry relating to the categories of hazardous materials including recognition, identification, reactivity, and health hazards encountered by emergency service. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. W Barry

FPS-133 Fire Protection Systems 3 credits This course provides information relating to the features of design and operation of fire alarm systems, water-based fire suppression systems, special hazard fire suppression systems, water supply for fire protection and portable fire extinguishers. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

LEC TH 3:00 p.m.-5:45 p.m.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess W Barry

FPS-135 Fire Behavior and Combustion

3 credits

3 credits

This course explores the theories and fundamentals of how and why fires start, spread, and are controlled. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess M Smith

FPS-139 Fire Prevention 3 credits

This course provides fundamental knowledge relating to the field of fire prevention. Topics include: history and philosophy of fire prevention; organization and operation of a fire prevention bureau; use and application of codes and standards; plans review; fire inspections; fire and line safety education; and fire investigation Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Writing Skills II (RDG095).

LEC TH 6:00 p.m.-8:45 p.m.

FPS-221 Strategy and Tactics 3 credits

This course provides the principles of fire ground control through utilization of personnel, equipment, and extinguishing agents. Prerequisites: Principles of Emergency Services (FPS123) and a grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. ABeardsley

FPS-223 Building Construction for Fire Protection

This course provides the components of building construction related to firefighter and life safety. The elements of construction and design of structures are show to be key factors when inspecting buildings, preplanning fire operations, and operating at emergencies. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing and Principles of Emergency Services (FPS123) or instructor approval.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. A Beardsley

FOREIGN LANGUAGE

ARB-101 Elementary Arabic I 3 credits This course is a beginning class in modern standard

Arabic. The course begins with exposure to the alphabet, basic vocabulary, and expressions of greetings. The course then focuses on the spoken and written language used in contemporary life in Arab countries. The course works on all skill areas: listening, speaking, reading, and writing presenting pertinent grammar in context. The course is not intended for native speakers or students who have studied this language within the last three years.

LEC TH 6:30 p.m.-9:15 p.m. R Hassan

CHN-101 Elementary Mandarin I 3 credits A beginning level course in modern standard Mandarin Chinese, mainly for students with no experience in the language. The goal of the course is to develop in the students through a multi-approach the four basic skills in the Mandarin language: listening, speaking, reading, and writing. The course content is geared to use in real life, and the teaching method emphasizes mutual understanding and appreciation of cultures that differ from one's own and draws on the experiences and backgrounds of both the instructor and students. After a semester's study in this course, students are expected to have achieved a general understanding of the speaking and writing systems of the Mandarin language, and be able to communicate, both in oral and writing

forms (speaking, listening, reading, and writing), with LEC F 11:30 a.m.-2:15 p.m.

some simple and daily Mandarin.

CHN-102 Elementary Mandarin II 3 credits The course builds on the basic skills learned in Mandarin I. It is designed for students who might be planning to visit China for business, pleasure or for further study, and it will teach students some of the unique cultural practices of the country, from the forms of courtesy to the way of asking questions. The objective of the course will be to sharpen students' oral and written communication skills. We will focus on everyday situations and combine practice in speaking

with exercises in writing. The course will stress clarity in writing, and the course will teach students how to think critically in formulating statements and understanding meaning. Prerequisite: Grade of C or better in Elementary Mandarin I (CHN101) or by permission of instructor.

LEC F 2:30 p.m.-5:10 p.m. X Shen

FRE-101 Elementary French I 3 credits This course introduces students to the sounds and structures of French with emphasis on the acquisition of a limited but useful vocabulary and is offered for

students with little or no previous knowledge of French. The course is not intended for native speakers or for students who have studied this language within the last three years.

INTERDISCIPLINARY STUDIES

INT-101 Introduction to Yoga Studies

3 credits

This course explores yoga, a diverse form of artistic human expression through an interdisciplinary perspective-from its origins to present day therapeutic applications for the mind, body, and spirit. Students will also examine multi-cultural beliefs on healing and healing traditions. Through writing assignments students will reflect critically on their own practice and on topics introduced in the readings/discussions. The course will include an in-class yoga practice that will allow students to integrate course concepts with their yoga practice "on and off the mat" as students will apply yogic principles to their lives through selfreflection, civic engagement and service. This course is geared to students with no prior yoga experience. Students need to wear clothing that allows for freedom of movement as there will be a physical practice in each class meeting. Prerequisites: Grade of C or better in Academic Reading III (ESL 098) or Reading Skills II (RDG095) and Writing Skills II (ENG 095) or exemption by placement testing.

01 LEC F 8:30 a.m.-11:15 a.m. B224 J Kerstner

INT-110 American Culture 3 credits

This interdisciplinary course focuses on the historical evolution of American beliefs and values and is designed for students from other cultures. Students study the way these values have shaped U.S. contemporary institutions such as education, business, the government, and the family. The course examines extensive cross-cultural comparisons with the students' native cultures. Materials include film, music, and short works of literature. The course meets General Education "Humanities" Requirement Area 6. Prerequisite: Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption from reading requirement by placement testing.

LEARNING COMMUNITY CLUSTERS

Learning Community Clusters enable students to take two or more courses together, and learn and study with the same group of students. In Clusters, faculty members have planned their courses together around common themes. Clusters offer small class sizes and hands-on activities such as field study and team projects.

Accelerated English Cluster: Consumable Planet

6 credits

This six-credit learning community integrates ENG095 and ENG111 enabling you to complete both courses in one semester. Explore the world of sustainability while you will examine the realms of food, clothing and shelter through the lens of sustainability management. Patterns of consumption and systems of local, sustainable food production as well as big agriculture will be considered. You will study green and sustainable design that reduces energy usage and causes less environmental degradation. Through reading, writing, speaking, listening and hands-on

learning, you will build a strong foundation for further study in sustainability or related fields. Please see an advisor if you are interested in enrolling in this Cluster. Students must co-enroll in the following courses:

ENG111-18C LEC T,TH 10:00 a.m.-11:15 a.m. H148 R Whitman Class meets in the H Building

ENG095-10C LEC T,TH 8:30 a.m.-9:45 a.m. H148 R Whitman

Accelerated English Cluster: Crash 6 credits

This six-credit learning community integrates ENG095 and ENG111 enabling students to complete both courses in one semester. In this cluster, students will examine the origins and effects of the world recession led by the crash of the U.S. financial and housing sectors of the economy in 2008 and the social $\,$ and economic impact of this crash on the daily lives of millions of Americans. Through reading, writing, speaking, listening, and hands-on learning activities, students will explore the "new normal" of the U.S. economy and prospects for jobs, prosperity, and a middle class in the coming decades of the early 21st century. Please see an advisor if you are interested in enrolling in this Cluster. Students must co-enroll in the following courses: ENG095-26C LEC T,TH 2:30 p.m.-3:45 p.m. B132 R Whitman ENG111-59C LEC T,TH 3:55 p.m.-5:10 p.m.

Accelerated English Cluster:

Making Dreams Real 6 credits This six-credit learning community integrates ENG095 and ENG111 enabling students to complete both courses in one semester. Making Dreams Real is a writing-intensive, community-oriented class in which students collaborate with each other and the instructor to make each student's dreams come true. This class is the ultimate "pay-it-forward" in which each individual's ability to help transform the lives of others bears a direct relationship on the community is transformed as a whole. Invest in yourself by investing in your peers - and write about it every step of the way. Please see an advisor if you are interested in enrolling in this Cluster. Students must co-enroll in the following courses:

ENG095-13C	LEC M,W 10:00 a.m11:15 a.m.	H148	T Nefer

Hot Topics and Big Stories: What's in the News

Explore the hot topics and big stories in the media that capture society's attention and impact how people live. This learning community for students placing into ENG095 and RDG095 allows students to develop academic reading and writing skills while analyzing print and broadcast media. Activities include the use of newspapers and newsmagazines to analyze the formats used for writing news, features, and editorials. Students must meet reading exit requirements or pass a department reading final in order to earn a passing grade of C in RDG095. Students must pass the basic Writing Competency Exam in order to receive a passing grade for ENG095. The course does not satisfy the College Writing requirement for graduation. Students must co-enroll in the following courses:

RDG095-07CLEC F 8:30 a.m.-11:15 a.m. B109 R Gormley ENG095-34C LEC F 11:30 a.m.-2:15 p.m. B113/D120 R Gormley

Introduction to ESL

for Business Students 6 credits

This course, for students placing into ESL098, is a survey of the purpose, role, and responsibility of business in a capitalistic society, including an introduction to the major areas of business such as: Finance, Management, Economics, Accounting, and Marketing. This course provides a basic foundation for the student who will specialize in some aspect of business in college, and it also provides the opportunity for non-business majors to learn about the business in which they will someday be both producers and consumers. This course will also enable students to explore career options in business, define a career path, and make connections between classroom learning and the larger business community. This course will fulfill the Learning Community Seminar requirement for first time, full time students, to assist the student in making a successful transition into an academic environment. The course will aid students in learning insights, skills, and attitudes necessary to develop academic success strategies for personal and career goals achievement. Students must co-enroll in the following courses:

ESL098-10C LEC T,TH 3:55 p.m.-5:10 p.m. D211 M Rodriguez BUS101-08C LEC T,TH 2:30 p.m.-3:45 p.m. D211 H Jean-Gilles

Language and the Mind

6 credits This learning community for students placing into ENG095 enables students to learn the fundamental principles of psychology as they develop the language skills needed to communicate effectively in college study. Students explore the human brain and behavior, research methods, learning, consciousness, motivation, emotion, human growth and development, personality, abnormal behavior and psychotherapy, and social cognition in a community that fosters critical thinking and analysis. Prerequisites: Grade of C or better in Writing Skills I (ENG090) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or placement. Students must co-enroll in the following courses:

ENG095-21CLEC M,W 1:00 p.m.-2:15 p.m. B127 F Brown PSY101-17C LEC M,W 2:30 p.m.-3:45 p.m. B127 L Schyrokj

Letter to Unknown Artists

Using personal perception of the human creative endeavor, students will analyze and write unified, coherent, and well developed essays on art and architecture from the Paleolithic to the Middle Ages. Writing assignments will be based on presentations, group projects, and museum visits. The course meets

General Education "College Writing" Requirement Area 1. Prerequisite: Grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or placement. Students must co-enroll in the following courses:

Reading and Writing Learning Community:

Building a Strong Foundation 6 credits

This learning community for students placing into ENG090 and RDG090 integrates the study of reading and writing. Students develop the reading skills necessary for success with college level material as they begin to develop the writing skills needed to work in the College Writing program. This Cluster does not satisfy any part of the College Writing requirement for graduation. Placement is determined by assessment testing or faculty referral. Upon completion of Writing Skills I (ENG090) with a grade of C or better, students enroll in Writing Skills II (ENG095). Students must meet reading exit requirements or pass a department reading final in order to earn a passing grade of C in RDG090. Students must co-enroll in the following

ENG090-06PLEC T,TH 11:30 a.m.-12:45 p.m. B222 D Fuller RDG090-06PLEC M,W 11:30 a.m.-12:45 p.m. B222 D Fuller

Reading and Writing **Learning Community:**

Crossing Borders 6 credits

This learning community for students placing into ENG095 and RDG095 provides a rich opportunity for students to develop advanced reading and writing skills while learning about immigration in the United States. Students read about key aspects of immigration, including historical material, personal narratives, and fiction, as well as use the internet and view films. Students write about how immigration relates to their own lives or to their families. In addition to being a Learning Community Cluster, this course is also designated as a Community Engagement Action Research class. For the Action Research Project, students will examine current issues related to immigration, learn about advocacy organizations that work on these issues, and write an essay and letter in support of one of the issues we learn about. Students must meet reading exit requirements or pass a department reading final in order to earn a passing grade of C in RDG095. Students must pass the basic Writing Competency Exam in order to receive a passing grade for ENG095. The course does not satisfy the College Writing requirement for graduation. Students must co-enroll in the following courses:

ENG095-12C LEC M,W 10:00 a.m.-11:15 a.m. B221 J Stark RDG095-04C LEC M,W 8:30 a.m.-9:45 a.m. B221 J Stark

Power in Actions, Passion in Words: Western Psychology Meets

African American Studies 6 credits

This learning community for students placing into ENG111 will provide an overview of African American Studies to engage two powerful academic disciplines - Psychology and English. Students will explore key historical and literary movements in African American Studies, including The Middle Passage, Slavery and Reconstruction, the Harlem Renaissance, The Jazz Era, the Civil Rights Movement, and Hip Hop to develop an understanding of fundamental psychological concepts and to hone their critical reading and writing skills. Students will explore key and critical areas in the study of psychology, including learning, human growth and development, the brain, human sexuality, social psychology and psychological disorders. The course emphasizes cross-cultural awareness and the creation of "Community" to achieve these goals. Prerequisites: Grade of C or better in Writing Skills II (ENG095) and Reading Skills II (RDG095) or Academic Reading III (ESL098) or placement. Students must coenroll in the following courses:

PSY101-16C LEC M,W 1:00 p.m.-2:15 p.m. B222 L Johnson ENG111-36C LEC M,W 2:30 p.m.-3:45 p.m. B222 LSantos Silva

Yours, Mine, & Ours: Peoples, Movements and a Globalized World

6 credits

This learning community explores how the world got to be as it is today. Students will consider reasons why groups of people trade with and migrate to different parts of the world and examine the similarities, differences and conflicts among the major world civilizations in the modern era. Topics will include governance, art, religion and philosophy, technology, family structure, and everyday life. The research process will be employed as students work with primary and secondary sources to support investigations. Prerequisite: Grade of C or better in College Writing I (ENG111). Students must co-enroll in the following courses:

ENG112-16C LEC T,TH 2:30 p.m.-3:45 p.m. B133 J Cohn HIS112-02C LEC T,TH 8:30 a.m.-9:45 a.m. D211 K Mapstone

Community Seminars explore academic topics of interest as they orient students to the College environment. First-timeto-college, full-time students pursuing Associate degrees are required to take a Seminar in their first year. Students in Learning Community Seminars enjoy small class sizes, integrated support services, and hands-on activities such as field study and team projects.

LCS-101A Careers in Health Care This course offers answers to the following questions.

"What do the various health professions do"? What are the qualifications for the various health professions? What credentials are needed? The seminar will explore health professions such as nursing, medical imaging, occupational therapy, physical therapy, respiratory therapy, and surgical technology. Current issues facing health care will be discussed, including patient interactions, end of life issues, health disparities and workforce shortages. Open to first year students interested in pursuing a career in health.

LCS-101AB Voicing Your Future

This course inspires students to tap into their creative skills, build strength and confidence in their writing, and go forth into higher education with a more clear connection to their life goals and vision. Students examine the art of poetry, song, and hip hop and through reflection develop a better understanding of personal identity, purpose, and potential. Through an exploration of career and life shaping strategies, students in this class design blogs and ePortfolios

a professional online presence. Open to first-year students. WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess A Jeglinski

to present and share expressive ideas and build

LCS-101AC Happiness 101

3 credits

What makes people happy? This course examines the perennial question of happiness in the 21st century. Students in this class explore the concept of happiness from a philosophical, psychological, and sociological perspective. Through reading assignments, classroom activities and participation in a service learning project students develop a greater awareness and appreciation for their talents and skills and explore ways to connect happiness with their academic pursuits, career goals and personal life.

Open to first-year students.

SEM T,TH 2:30 p.m.-3:45 p.m. 207J Piantedosi Class meets at the Chelsea Campus

LCS-101AD Freedom Rising On January 1, 1863, President Abraham Lincoln signed the Emancipation Proclamation, signaling a turning point in the American Civil War, a re-definition of the meaning of freedom in the United States, and the recruitment of the first black troops from the North to serve in the conflict, the Massachusetts 54th Regiment. In this course, students will explore these momentous events of 1863 and the important role of Boston's powerful black and white abolitionists in helping freedom rise in America. Learn how Boston's vibrant African American community of men, women and children – ministers masons, entrepreneurs, community organizers, abolitionists, political activists, educators, and more - pushed for the full realization of freedom as early as the American Revolution through the Civil War. This course is offered in partnership with the Museum of African American History and will include field trips to the Museum and visits to local historic sites and monuments. Open to first-year students.

SEM F 10:00 a.m.-12:45 p.m. B217 S Gibson

LCS-101AE Batarangs and Kryptonite 3 credits More than simply enduring, super heroes like Batman, Wonder Woman, and Spider-Man have earned their places in literature. The ongoing strength of Superman, who celebrates his 75th anniversary this year, dismisses any notion that this slice of pop culture is disposable. This seminar will examine the history of comic book heroes as well as the themes their adventures have long illustrated: heroism, identity, morality and self-improvement. Through readings, writing, classroom activities and field study, students will explore the world of comic books and reinvent themselves as comic book heroes. Open to first-year students.

LEC M 2:30 p.m.-5:10 p.m. B335 G Wagget

LCS-101AF The Theory of Everything 3 credits The Theory of Everything is a single theory, which tries to have an all-encompassing explanation of reality and existence. For centuries, scientists have searched for a single grand model that explains all of reality and existence in the universe. Today, that hope is projected on a complicated theory called string theory, which sounds simple enough until we hear that the "strings" in this case vibrate in 10 or 11 dimensions. Through reading, writing, hands on classroom activities and field study, this seminar will explore the connections between Physics and reality. Open to first-year students.

LEC T,TH 2:30 p.m.-3:45 p.m. D215 J Shahbazian

LCS-101AG Hip Hop:

The American Experience In this course, students will explore the world of Hip Hop through listening, reading, writing and interactive group projects. Students will trace the origins of Hip Hop from the Bronx in the 1970's through to the global phenomenon this genre has become today. Topics will include: the intersection between Hip Hop and issues of race, gender, and class, urban politics, and the dual dichotomy of the American experience. Open to first-year students interested in Hip Hop music and culture.

01HB HYB T 8:30 a.m.-9:45 a.m. G140 T Clark Web component required

LCS-101AH Exploring the

Biology of Disease

What are the educational and career paths available to students in biology, biotechnology, and health related programs? This course is designed to help incoming students explore the various disciplines within the biological sciences. The course will use familiar infectious and genetic diseases as the framework for understanding the basic science behind disease progression, epidemiology, diagnostics and treatment. Topics will include: cell structure and function, DNA structure, the chromosomal basis of inheritance, histology and pathology, vaccinations, and innovative biotechnological techniques. Open to first-year students interested in biological sciences.

01 LEC T 8:30 a.m.-11:15 a.m. D302 B Kadambi/NGuilmette

LCS-101Al To the Top

Through the exploration of mountaineering literature and film, this class will examine the themes of taking risks and overcoming adversity. By looking at accounts of various mountaineers in books, articles, and movies, students will study the reasons for the expeditions' successes and failures. Students will consider how risk taking and overcoming adversity connect with their academic success, career goals and personal experience. Coursework will include reading assignments, movies, classroom activities, online journals, oral presentations, a research project, and participation in a service learning project. Open to first-year students.

LEC W 8:30 a.m.-11:15 a.m. B127 E Seabury

LCS-101AJ Hot Couture

3 credits

3 credits

As Coco Chanel stated, "Fashion is not something that exists in dresses only. Fashion is in the sky, in the street, fashion has to do with ideas, the way we live, what is happening." In this course, students will engage in the study of fashion as it reflects changing perspectives in society. Students will survey major influences in global fashion capitals including: New York, Paris, Tokyo and Dubai among others. In addition, students will critically examine the impact of fashion on the global economy, while exploring different career paths within the fashion industry. Through presentations, classroom activities, and community projects students will reflect on how fashion affects their everyday lives. Open to first-year

T1 LEC T 6:00 p.m.-8:45 p.m. N Cesar

LCS-101AL Do the Right Thing 3 credits In his classic movie "Do the Right Thing," Spike Lee raised profound questions about urban race relations, social exclusion/inclusion, injustice, and the ambiguity inherent in moral choice. In this course students will identify themes from Lee's film to explore further in other texts, American history, and their own experiences. Students will examine the influences of cultural role models and heroes, and America's history of racial violence. Through reading, writing, viewing and interactive group assignments, students will challenge one another to think critically about

urban conflict, self-empowerment, and what it means to "do the right thing." Open to first-year students. 01 LEC M,W 2:30 p.m.-3:45 p.m. F140

LCS-101AM Leadership for Social Change 3 credits This course offers students the opportunity to

develop their leadership capacity and translate their values and ideas into action to create the change they want to see in their community. Through a combination of classroom discussions and hands-on projects, students will practice the art of community organizing and leading with others by crafting their public narrative, building teams, and moving their others to take action on the issues that they care most about. This is a practice-based leadership course; students should expect to commit about 5 hours a week over the course of the semester to lead an organizing project in their community on or off campus. Open to first-year students.

01 LEC F 1:00 p.m.-3:45 p.m.

LCS-101AN Standing Down: Making Sense of Military Experiences

Through reading, writing, viewing films, and reflection on personal experiences, this course will explore some issues faced by veterans from ancient Greece to the present day. Topics will include: veterans returning from World War II, Vietnam, and Iraq; combat; family relationships; grieving; women and war; and patriotism. The classroom environment will be one of mutual respect and free inquiry. Vigorous debate will be encouraged and all students will be expected to contribute. Open to first-year students and designed for veterans.

W1 SEM W 6:00 p.m.-8:45 p.m.

LCS-101D Motivations and Movements: Exploring Careers in Behavioral Science 3 credits

This course examines what it means to be a psychologist and sociologist. Students will have the opportunity to stand on the spot where the Boston Massacre occurred, cheer on Boston sports teams, and explore what motivates individuals and groups of people to participate in these and other actions. Career options in the behavioral science field will be explored. Open to first-year students interested in the behavioral or social science fields.

Who Are We? Exploring LCS-101F

Cultural Traditions & Identity 3 credits

This course considers the diverse cultural traditions that help to form our individual and collective identities. Through readings, writings, discussion and field study, students will gain self-awareness and explore the significance their primary culture plays in their relationships, perceptions and aspirations. The course encourages students to understand, appreciate, and honor historic rituals and family traditions which are common to all cultures. Open to first-year students.

SEM F 10:00 a.m.-12:45 p.m. B222 H Allen Jr.

LCS-101FF History in the Making: **How Current Events**

Shape Your World 3 credits

This course will expose students to the local and global events that are shaping the world in which they live. News stories and headlines will be analyzed in order to assess their political, social and economic effects. From domestic politics to international affairs, from development to war, this course will explore the greater history behind each story. Events from all regions of the world will be analyzed, with an emphasis on the roots of each issue, conflict and resolution. Students will be required to conduct research, write editorials and present their ideas during in-class discussions and debates. Open to firstvear students.

LCS-101G Voices from the Margins:

Readings in Contemporary Gay & Lesbian Literature in America 3 credits

The course will introduce students to a variety of gay and lesbian authors who write from marginalized positions. Their voices represent how diverse this country truly is in respect to race, ethnicity, and sexual orientation. The course will concentrate on works written since 1980 to explore how each of these distinct voices comes to define itself in the face of social ostracism, denial, and even violence. Students will keep reading journals and write essays that explore relationships between their own experiences and those of the writers we examine. Open to firstyear students.

SEM T,TH 10:00 a.m.-11:15 a.m. B224 LSantos Silva

LCS-101GG Exploring Issues of

Women of Color 3 credits

This seminar will consider the cultural heritage, history, and media representations of women of color in America. Students will examine society's perceptions of women of color, self-perceptions, and the issues that contribute to these perceptions. The course will encourage students to make decisions that lead to academic, career and personal success. This Seminar is designed for women interested in exploring issues of women of color and is open to first-year students.

SEM T,TH 10:00 a.m.-11:15 a.m. B222 J Spinola Taylor

LCS-101H Connecting to your Inner Orange Line- Next Stop:

Community College 3 credits
Using Boston subway's "Orange Line" as a metaphor for life, this course explores the many critical issues faced by urban males. Drawing on the traditions of the Yoruba of Africa, the Buddhist of Asia, the Natives of America, and the Judeo-Christian foundations of American religious thought, students will engage in a variety of activities designed to create community and foster personal transformation. Open to first-year students. This course is designed for urban males.

SEM T,TH 8:30 a.m.-9:45 a.m. B125 L Johnson SEM T,TH 10:00 a.m.-11:15 a.m. B217 L Johnson

LCS-101J Parents as First Teachers 3 credits Students in this seminar will explore methods of incorporating literacy into children's lives. Topics will include reading with children and best practices for developing a print-rich environment at home. This course is appropriate for parents and prospective parents, child-care providers, elementary education majors, early childhood majors, nursing or medical field majors, social work majors, and anyone interested in modeling good reading habits for children. Open to first-year students.

SEM T,TH 10:00 a.m.-11:15 a.m. B221 D Fuller

LCS-101JJ Got Art? 3 credits

What is art? Is it public? Is it personal? Is it only in museums? This Seminar is about learning to look at our created visual environment in ways that enhance art appreciation. Art is not just for artists; art is political, social, personal, and it is everywhere. Students will explore, assess and develop responses to the arts through class activities, visits to the BHCC gallery, field trips, and participation in a service learning project. This Seminar will introduce a fundamental art vocabulary and provide a basic understanding of artistic media and techniques. Students will work together to design virtual museums and galleries that will represent their philosophies of art. Open to firstyear students.

01 SEM F 1:00 p.m.-3:45 p.m. B223 D O'Malley

LCS-101KK Red, White, Blue and Islam Given that Islam is the largest religion in the world and one in every five individuals identifies themselves as Muslim today, our understanding of Islam is crucial. In this Seminar, students will examine various aspects of Islam: Islamic religious beliefs, diversity in Islamic culture, the status of women in Islam, and the concept of Jihad. A brief historical overview of the relationship

between Islam and the west will provide the context for study. Class activities will include visiting a local Mosque and experiencing Muslim culture though tasting traditional foods, exploring clothing, listening to music, and examining art . Open to first-year students.

01 SEM M,W 11:30 a.m.-12:45 p.m. C. Shah

LCS-101L **Haunting Lessons:**

Exploring Cultural Beliefs

about the Supernatural 3 credits From classics such as Dracula, Frankenstein, and A

Christmas Carol to the modern sensation of Harry Potter, our society continues to be captivated by the supernatural. Through readings, writing, discussion, field study, and a group project, students will examine cultural beliefs in the supernatural and analyze these beliefs as a metaphor for many of the desires and fears in our lives - power, eternal life, and the duality of human nature and unbridled science. Open to firstyear students.

01 SEM M,W 10:00 a.m.-11:15 a.m. B110 M Dubson

LCS-101LL Sports Psychology:

Success in Sports & Life 3 credits

Success in college and success in sports are the result of similar efforts. This course examines the factors behind successful athletes and how those factors translate to successful academics. The course discusses how student and professional athletes manage the demands of athletics and academics and/or outside commitments. We also examine a wide range of sports related topics such as health and fitness, college eligibility, community engagement and education through sports; and how sports can reflect the aspirations and attitudes of a community. Open to first-year students. This course is designed for student athletes.

SEM F 1:00 p.m.-3:45 p.m. B222 S Benjamin

LCS-101MM Financial Literacy for All

This course provides students with the skills and knowledge to make informed and effective financial decision. Students explore the basics of financial literacy, from balancing a checkbook to investing in a 401k. They engage in activities that help them set financial goals while learning to manage debt, understand their credit score, evaluate alternative modes of financing and plan for retirement. Open to first-year students.

SEM T,TH 11:30 a.m.-12:45 p.m. B221 W Nouchrif

LCS-1010 Exploring Gender Identity & Self Image

3 credits

This course considers gender and racial identity in America from a number of personal and critical perspectives. Elements of modern media and popular culture are examined to help illustrate the sociocultural contexts of each work. Through engaging in discussions, critical reflection, writing, students will collaborate with each other to better understand the role that gender and race play in the modern world. This course provides a supportive environment to discuss critical and controversial issues surrounding modern day culture and gender and race dynamics. Open to first-year students.

B217 L Schyrokyj SEM T 6:00 p.m.-8:45 p.m.

LCS-10100 Sustainable Ocean Habitats This course explores habitats in the world's oceans

such as coral reefs, salt marshes, estuaries, the open ocean, and the deep sea. Students learn about the vital connection that people have with the goods and services that ocean habitats provide. The course investigates the impacts of human activity, including: aquaculture, climate change, invasive species, mineral extraction, overfishing, and pollution. Sustainability concepts and management strategies that better conserve and protect ocean resources are considered. Students have the opportunity to participate in a field trip to the New England Aquarium. Open to first-year students.

W1 SEM W 6:00 p.m.-8:45 p.m.

LCS-101PP Getting Fit Together

What are the challenges and rewards to living a healthy lifestyle? In this course, students will stay abreast of health issues and set personal health and wellness goals. A broad range of issues will be explored including nutrition, physical fitness, stress management and social and emotional wellness. Students will learn about the importance of knowledge, attitude and awareness related to health and wellness. Each week one hour of class will be spent in the College's Fitness Center. Open to firstvear students.

SEM M,W 10:00 a.m.-11:15 a.m. 02 SEM TH 3:55 p.m.-6:45 p.m. E419 K Spicer

LCS-101Q The Balancing Act:

Juggling Work, School & Life 3 credits

This course provides a supportive environment for students facing the challenges of juggling work, school and life responsibilities. Students will practice the skills needed to overcome barriers to learning and achieve personal, college, and career goals. Open to first-year students who face significant responsibilities outside of school.

01 SEM F 2:30 p.m.-5:10 p.m. B217 K Abukhidejeh B129A W Nouchrif SEM S 9:00 a.m.-11:45 a.m.

LCS-101R Learning for Success 3 credits

This course provides an understanding of the learning process, the role learning styles play, how memory works, and the impact of attention on learning. Students will discover their learning styles and practice strategies for maximizing learning potential, improving attention, and helping memory work more efficiently. Open to first-year students.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. L Schyrokyj

LCS-101RR Beyond East and West:

Asians in the U.S.

Asians are one of the fastest growing populations in the United States, yet there are few opportunities to discuss the Asian American experience. In this course, students explore the social, historical and structural contexts defining the experiences of Asian Americans, with a particular focus on local communities in Boston and Massachusetts. Topics such as immigration, labor, community development, politics, gender and family dynamics, and race relations are examined. Through reading, writing, classroom discussion and field study, the class learns about the challenges, achievements and contributions of Asians in the United States. Open to first-year students and designed for Asian and Asian American students.

SEM T 6:00 p.m.-8:45 p.m. B224 C. Chear

LCS-101SS Politically Incorrect

3 credits What does it mean to be politically correct or politically incorrect? Society has trained us to be politically correct, but we rarely examine what exactly this means and how it affects us. This class is designed to create a safe environment where students can explore the social dynamics around race, gender, religion and sexual orientation, and the policies and movements that have influenced these social constructions. Through readings, writing assignments, collaborative projects, and filed study, students will consider and reconsider what it means to be politically correct. Open to first-year students.

SEM T,TH 11:30 a.m.-12:45 p.m. B129A L Cooper-Sarpy

LCS-101TT Life & Light: The Intersection of

Optical Technology & Biology 3 credits

In this course, students explore concepts and principles of the study of life, Biology, and the applications of light, Photonics. Enrolled students learn about this emerging scientific area that is used to study and understand the inner workings of cells and tissues in living organisms. Students in this class examine the fundamental principles of Biology and Photonics through a combination of laboratory and classroom exercises, and apply these ideas to real-world devices that are used to answer or ask questions that address pharmaceutical, biomedical

and biological issues. Open to first-year students interested in the sciences.

01 SEM W 10:00 a.m.-12:30 p.m. C202 P Kasili/J Shahbazian

LCS-101WW Where in the Digital World Are You? Marketing in the 21st Century 3 credits

In this course, students consider what it means to have an effective marketing campaign in the era of Google, Facebook, and Twitter. The digital marketing revolution has changed the way businesses approach every phase of the buying process. Through the examination of case studies, students identify challenges faced by companies and explore ways in which businesses have adapted traditional approaches to marketing to reach the 21st century consumer. Open to first-year students.

01 SEM F 1:00 p.m.-3:45 p.m. B113 S Muller

LCS-101X Military: Before, During, & After 3 credits The course will offer strategies to help the military student succeed in college, work, family and other social settings, with emphasis on academic and interpersonal skills and techniques for managing readjustment and transition. Military students will have the chance to work and study with others who have had similar life experiences. Through readings, writing, and discussion, students will explore how military experiences change us. Texts will include Homer's The Odyssey, Jonathan Shay's Odysseus in America, and Tim O'Brien's The Things They Carried. The course is designed to support military members in making a positive transition from military to civilian life.

01 SEM W 2:30 p.m.-5:10 p.m. D209 B Craven/S Cassara

LCS-101XX Telling Our Stories 3 credits
Students in this class learn about the significant role
stories and storytelling play in society. From bedtime
stories, gripping newspaper headlines, history, to
stories inherited from one generation to another,
stories are imbedded in the fabric of people's lives.
This class explores the art of storytelling through
writing exercises, reading assignments, classroom
discussions and museum visits. Throughout the
course, students examine short stories and creative
nonfiction by master storytellers Baldwin, Bambara,
Butler, Lamott, O'Brien, O'Connor and Walker in this
seminar and craft original short stories and creative
essays. Open to first-year students.

01 SEM T 10:00 a.m.-11:15 a.m. B216 E Maurice SEM TH 10:00 a.m.-11:15 a.m. D316 E Maurice

LCS-101Y Ain't I a Woman

Unpacked and Re-packed 3 credits
What does it mean to be a good, strong, loving and
successful woman? Women's rights activists Sojourner
Truth and bell hooks have each articulated, for their
time, a vision of what it means. Students in this course
will develop their own vision of what it means in
today's world. The course will include an examination
of the history and psychosocial forces that shape
identity, including biology, family, relationships and
social networks. Students will read, write, reflect,
discuss, create, collaborate and act. Open to first-year
students. This course is designed for women.

01 SEM M,W 11:30 a.m.-12:45 p.m. B127 L Benson

LCS-101YY Living Online: Media Literacy

in the 21st Century 3 credits
From television to film to social media and video
games, mass media influences how and what people
think, feel and believe. In this course, students
examine why the media influences society so strongly
by breaking down the images and messages sent and
received every day through the mass media. Topics
include gender and advertising, masculinity and
hip hop, bullying and social media, violence, ethics,
values and stereotyping. Students enrolled in this
class will become more media literate by creating
original media. Open to first-year students.

01 SEM T,TH 10:00 a.m.-11:15 a.m. H155 D Boudreau Class meets in the H Building

LCS-101ZZ Latinas: A Culture

of Empowerment 3 credits

What do Supreme Court Justice Sonia Sotomayor, writer Isabel Allende, Boston businesswoman Ivonne Garcia, and Celebrity Chef Evette Rios have in common? They are all Successful Latina women making significant contributions in their fields and in their communities. Through readings, writing assignments, collaborative projects and case studies of these accomplished women, students explore the social, historical and structural contexts defining the experiences of Latinas in the United States. Students learn how to utilize lessons from these stories to better understand their own identity, academic goals and career aspirations. Open to first-year students and designed for Latina students.

01 SEM M,W 11:30 a.m.-12:45 p.m. E451 A Hernandez-Fold

AHE-104 Vital Signs:

Understanding Human Behavior for Health Care Professionals 3 credits

This course introduces students to the challenges and responsibilities of healthcare professionals and college students. Discussions center on crosscultural issues, human growth and development; psychological and sociological factors involved in the patient healthcare professional relationship.

70 SEM M,W 1:00 p.m.-2:15 p.m. 121 R Alleyne-Holtzdaw 71 SEM T,TH 10:00 a.m.-11:15 a.m. 207TBA

Introduction to Business 3 credits This course is a survey of the purpose, role, and responsibility of business in a capitalistic society, including an introduction to the major areas of business such as: Finance, Management, Economics, and Marketing. This course provides a basic foundation for the student who will specialize in some aspect of business in college, and it also provides the opportunity for non-business majors to learn about the business in which they will someday be both producers and consumers. This course will also enable students to explore career options in business, define a career path, and make connections between classroom learning and the larger business community. This course will fulfill the Learning Community Seminar requirement for first time, full-time students, to assist the student in making a successful transition from our unique urban community into an academic environment. The course will aid students in learning insights, skills, and attitudes necessary to develop academic success strategies for personal and career goals achievement. Prerequisites: Grade of C or better in Academic Reading I (ESL098) and Academic Writing III (ESL099) or Reading Skills II (RDG095) and Writing Skills (ENG090) or exemption by placement testing.

CIT-113 Information Technology Problem Solving * 3 credits

This course will give students "hands-on" experience in a wide-range of modern information technology. Several IT concepts will be introduced that will provide a basis for further study in Information Technology. Students will work on a number of projects that will give perspectives on areas of IT including but not limited to: visual and/or robotic programming, social networking tools, web design and networking. Issues of security, privacy and ethics will also be examined. Students will leave the course with an understanding of the components of modern IT systems and the scope of knowledge needed to become an IT professional. Students are expected to have access to computer with internet access outside of class as there is a major web component to the course. Designed for first-time, full-time Computer Technology students, this course will fulfill the Learning Community Seminar requirement for the Computer Information Technology Department. First year students registering for this course should not register for Computer Applications/Concepts (CIT110). This course is not for Computer Science Transfer, Gaming or Web majors. Prerequisites: Grade of C or better in Reading Skills I (RDG090) and Writing Skills I (ENG090) or placement.

CIT-120 Introduction to Computer Science & Object Oriented Programming 4 credits

This is a first course in Object Oriented Programming (OOP) theory, logic and design. Taught in the College's "hands-on" computer classrooms, this course emphasizes the program design and

development process including concepts of variables and flow control, objects, classes, methods, and polymorphism. Students will use an Object Oriented Programming language as they design code, debug and implement several programs covering the topics presented. Students taking this course are expected to have solid knowledge of basic computer terminology, internet navigation and email, operating system and file management skills. Strong analytical skills are recommended for students enrolling in this course. Please note that this course is a four credit course with six contact hours and analogous homework. This course fulfills the Learning Community Seminar requirement for students in AA Computer Science, AS Computer Science, and AS Computer Engineering areas of study. Other departments may allow this course to be used as a learning community seminar for their students. Students in majors other than the ones listed above should obtain their advisor or the leading faculty members approval before registering in the course. Prerequisites: Intermediate Algebra (MAT099), Writing Skills II (ENG095), and Reading Skills II (RDG095) or placement. Pre/corequisite: College Algebra-STEM (MAT194). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CMT-101 Game Development Essentials 3 credits This course will present the principles, concepts, and components all of games and the gaming industry's processes, methodologies, and principles associated with the design, development, and distribution of computer-based games and computer-based simulations. This course is designed to provide the student with an overall comprehension of all the precepts and building blocks that are essential to every computer-based game and simulation. This course fulfills the Learning Community Seminar requirement for students in Computer Media Technology. Prerequisites: Writing Skills II (ENG095) and Reading Skills II (RDG095) or placement.

01 LEC T,TH 11:30 a.m.-12:45 p.m. D115 B Craven

CRJ-101 Introduction to Criminal Justice 3 credits A survey of the history, development and the role of American Criminal Justice System are presented. Included are the organizations and jurisdictions of the various agencies, a review of the court process, professional orientation, and the current trends in the criminal justice system. The course will offer students the ability to use state of the art technology and interactive instruction. It stresses the application of knowledge learned to real-life situations. Ethical behavior issues will be raised and students will develop strategies to set boundaries, understand differences among people, develop professional codes of conduct and behavior, and develop a professional moral code of conduct. The course fulfills the Learning Community Seminar requirement for students in AS Criminal Justice. Prerequisites: Writing Skills II (ENG095), Academic Reading III (ESL098) or Reading Skills II (RDG095), or placement.

CUL-101 If You Can't Stand the Heat 3 credits
This course introduces students to the challenges and
responsibilities encountered by culinary arts students.
It provides students with an in depth knowledge of
the options available within the culinary arts industry.
The course prepares students with skills necessary to
prepare a resume, gain interview skills and become
familiar with all of the resources that the college has
to offer. Topics covered will include: preparing for a
career in the food service field, resume preparation,
career options and specific skills necessary to
create a successful career, and discovering the
best use of resources available to students at
BHCC. Prerequisites: Writing Skills II (ENG095),
Fundamentals of Math (MAT093), and Reading Skills II
(RDG095). For Culinary Arts students only.

EDU-102 Becoming a Teacher-

A Learning Community Seminar 3 credits This learning community seminar is designed for education majors who are interested in making a difference in today's public schools. Inspired by the movie Waiting for Superman, this seminar looks at some of the pressing issues in today's public schools: overcrowding, lack of funding, outdated curriculum, classroom chaos, and shortage of good teachers (among many others). Sign up for this seminar and join students who want to join the next generation of super teachers. (Requirement: Must be an Education Major to enroll and should be in first two semesters of study at BHCC with 16 college credits or less completed).

01 SEM W 2:30 p.m.-5:10 p.m. H149 TBA Class meets in the H Building

FPS-111 Fire Service, This Century and the Next, What Should We Expect 3 credits

This course provides the student with the history of the fire service and its culture. The student will research the ways that the fire service has changed over the past century and how it is expected to change in the next century. Topics will include the history for the fire service, changes in the fire service past and future, the evolution of equipment in the fire service, firefighter deaths and statistics as they pertain to the National Fallen Firefighters Foundation and its 16 Firefighter Life Safety Initiatives, as well as a field trip to the NFPA (National Fire Protection Association) and the role of the state training centers and a field trip to the Massachusetts Firefighting Academy in Stow, MA. These topics will be discussed with particular focus on the National Fire Administration's Fire and Emergency Services Higher Education (FESHE) Professional Development Model and its explanation of how education, training, experience and individual development is needed for a successful job in the fire service. This course incorporates the learning outcomes of BHCC's Learning Community Seminar and fulfills the Seminar's requirements for first-time, college students.

T1 SEM T 6:00 p.m.-8:45 p.m. D120 M Smith

HRT-105 Hospitality Seminar 3 credits
This course provides students with an in depth,
experiential understanding of the options available
within the hospitality industry. Topics covered
include industry specific areas such as hotels, resorts,
cruises, tours, convention and visitors bureaus and
travel agencies with particular focus on the skills
and abilities that each individual needs to create a
successful career. Guest speakers and site visits are
an integral part of this course.

MAN-201 Management Seminar Engaged in diagnosing business issues and managerial problems posed through actual real life case studies, students conduct strategic analysis in a variety of individual and competitive situations. Teams identify strategic issues; propose workable plans of action; explain, present and defend their assessments; where applicable, drawing upon prior course study/life experiences and library and Internet research to convert a sound industry/business analysis into a sound, realistic, action agenda supported by evidence. Note: This course is a Capstone course and should be taken in the student's final semester. Prerequisite: Principles of Management (MAN111) and Principles of Marketing (MAN105).

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess L Robertie

MAN-207 Small Business Management 3 credits Starting and managing a small business requires strong leadership capabilities and unique business and management skills. The purpose of this course is to introduce students to the issues small business owners must understand to become a successful startup or to manage an existing business successfully. This practitioner oriented course focuses on helping students understand their leadership capabilities and to compare their capabilities with the necessary requirements. Students will prepare a business plan to help understand the importance of effective planning and conduct a field study that involves surveying successful small business owners to understand how these owners successfully manage their businesses will also be requirements of the course. Prerequisite: Principles of Accounting II (ACC102) or Accounting Information Systems (ACC105); Principles of Management (MAN111); Principles of Marketing (MAN105) or permission of instructor.

W1 LEC W 6:00 p.m.-8:45 p.m. WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess C Miller

MAN-213 Mutual Fund Industry This course introduces the myriad aspects of the mutual fund business including the way mutual funds are structured, regulated, marketed, and distributed. In addition, the course explores shareholder serving systems and technology. Prerequisites: Principles of Accounting II (ACC102) and Investments (ACC111).

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess M Collins

MAN-217 E-Commerce

Marketing Management 3 credits

This course provides an overview of the way E-Commerce is conducted, marketed, and managed, and describes its major opportunities, limitations, issues, and risks. E-Commerce is an interdisciplinary topic and, therefore, is of interest to managers and professional people in any functional area of the business world. The course describes the manner in which transactions take place over networks, mostly the Internet. The course covers descriptions and discussions of the process of electronically buying and selling goods, services, and information. It introduces specific applications, such as buying and selling stocks or books on the Internet, which are growing at a rate of several hundred percent a year. Prerequisite: Principles of Marketing (MAN105).

WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess

MAN-511 Principles of

Sports Management 3 credits

This course is an overview of the discipline of sports management. Time will be spent exploring the development and composition of the industry as well as future trends, at both the amateur and professional levels. Students will be introduced to the fundamental components of sports management including

personnel, marketing, promotions, leadership, ethics, and public relations. They will also identify the career options within the sports management profession. Prerequisites: Introduction to Business (BUS101) or permission of instructor.

H1 LEC TH 6:00 p.m.-8:45 p.m. E140 A Fontes

MATHEMATICS

MAT-093 Foundations of

Mathematics * 3 credits

Topics include solving applied problems with whole numbers, decimals and fractions; ratios and proportions; rates; percentages and applications in sales tax, interest, commissions, and discounts; determining numerical averages and medians; exponents and square roots; measurement; and geometry. Technology is incorporated to facilitate problem solving. This course does not satisfy degree requirements. Course requires an additional lab hour.

MAT-099 Intermediate Algebra 3 credits
This course is a continuation of Foundations of
Algebra (MAT097). Topics in this course include
polynomial arithmetic, introduction to functions,
factoring, roots and radicals, rational expressions,
absolute value inequalities, quadratic equations and
the quadratic formula, and solving applied problems.
This course does not satisfy degree requirements.
Prerequisite: Grade of C or better in Foundations of
Algebra (MAT097) or placement. Course may require
an additional lab hour.

MAT-133 Introduction to Metric System1 credit This course enables students to recognize and use metric terms, roughly measure using body parts, and use estimation within the metric system.

LC GSS 1 hour per credit attendance is required.
Flexible Schedule H165 A Kalokoh
Class meets in the H building

MAT-171 Finite Mathematics 3 cred

Set theory, coordinate systems and graphs, matrices and linear systems, linear programming, and probability are considered in this course. Applications to business and the social sciences are emphasized. This course meets General Education "Quantitative Thought" Requirement Area 4. Prerequisite: Grade of C or better in Foundations of Algebra (MAT097).

M1 LEC M 6:30 p.m.-9:15 p.m. D215 TBA

MAT-172 Contemporary Math I 3 credits This course covers varied mathematical topics that have applications in contemporary society. Topics include number theory (divisibility, Fermat's Theorem, characterization of primes, Diophantine equations), mathematical systems (base n and modular arithmetic, groups, rings, fields), logic(simple and compound statements, conditionals, symbolic logic, truth tables), and patterns and symmetries (Fibonacci sequence, Golden Ratio, natural and artistic illustrations, fractals). The course encourages students to interpret, analyze, and evaluate from a mathematical perspective. The course meets General Education "Quantitative Thought" Requirement Area 4. Prerequisite: Grade of C or better in Foundations of Algebra (MAT097) or placement.

MAT-193 Topics in Algebra and Trigonometry 3 credits

This course provides an intensive one-semester survey of topics in algebra and trigonometry. Topics include powers of ten, formulas, graphs, simultaneous equations, logarithms, right triangle trigonometry, vectors, sine waves, and complex numbers. Topics are illustrated by applications from electronics and other fields. Use of scientific calculator is required. Prerequisite: Placement or grade of C or better in Fundamentals of Algebra (MAT094).

01N LEC M,W 8:30 a.m.-9:45 a.m. D209 TBA Electric Power Utility Program students only

MAT-194 College Algebra for STEM 4 credits This course is designed for science, technology,

This course is designed for science, technology, engineering, computer science, and mathematics students and provides a solid preparation for precalculus. The course covers systems of linear equations, matrices, partial fractions, linear programming, algebra of functions, quadratic equations, polynomials, rational and radical functions, complex numbers, exponential and logarithmic functions, maximum and minimum problems, symmetry, lines, conic sections, graphs of relations and functions, and applications. A graphing calculator is required for this course. This course meets General Education "Quantitative Thought" Requirement Area 4. Prerequisite: Grade C or better in Intermediate Algebra (MAT099)(a grade of B or

better is recommended)or placement.

MAT-282 Calculus II 4 credits

This course is a continuation of Calculus I (MAT281) and begins with a study of numerical integration. Techniques of integration are applied to the following topics: transcendental functions (including their derivatives), area of region between two curves, volume, integration by parts, trigonometric substitution, partial fractions, and improper integrals. Sequences and series are examined with an emphasis on determining convergence or divergence. Taylor and Maclaurin series will also be studied. Graphing Calculator is required. Prerequisite: Grade of C or better in Calculus I (MAT281) or placement.

MAT-285 Ordinary Differential

Equations 4 credits
This course will include first and higher order
differential equations and applications, series
solutions of differential equations, Laplace transforms,
systems of linear first order differential equations and
numerical solutions of ordinary differential equations.
Emphasis will be placed on analytical techniques
and engineering applications aided by the use of
computer software. Material on linear systems will
be incorporated. Prerequisite: Grade of C or better in
Calculus II (MAT282).

01 LEC M,W 2:30 p.m.-4:10 p.m. D216 Y Rao

4 credits

MAT-291 Linear Algebra

This course will include linear systems of equations, matrix operations, determinants, linear dependency, vector spaces, linear transformations, eigenvalues and eigenvectors. Proofs by mathematical induction and contradiction will be incorporated. Emphasis will be placed on mathematical structure and axiomatic reasoning aided by the use of computer software. Pre/corequisite: Grade of C or better in Calculus I (MAT281).

MEDICAL IMAGING

CTC-111 Computed Tomography I 3 credits This interactive, web-based course presents principles and physics on conventional as well as spiral/helical CT. It begins with descriptions of the hardware configurations, and progresses to include the computer science of the system, including digital image processing, data acquisition, display, and reconstruction methods. Technical factors affecting

image quality, artifact, recognition and reduction, quality control and patient does will be discussed. Multislice technology will have particular emphasis, and 3D applications, CT angiography, CT fluoroscopy and other advanced applications will be presented. Radiation safety, dosimetry and contrast agents will also be included in this course. Prerequisite: Acceptance into CT Certificate Program.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess.D Misrati

MAC-111 Mammography Principles I 3 credits This interactive, web-based course presents the concepts of equipment design, technical factors and compares analog to digital mammography

concepts of equipment design, technical factors and compares analog to digital mammography equipment and techniques. Quality assurance and special patient situations, as well as interventional procedures will also be discussed. Prerequisite: Acceptance into Mammography Certificate Program.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess.T Millard

MIG-101 Introduction to Ultrasound 2 credits

This course provides introductory exposure to the field of diagnostic medical sonography. The history and development of the modality as well as relevant medical terminology and vocabulary will be presented. Other topics discussed include caring for patients across cultural lines, the role of a sonographer in the medical field, and the prevention of repetitive strain injuries. Prerequisite: Admittance into the Cardiac or General Sonography programs.

01 LEC W 8:30 a.m.-11:15 a.m. G218 M Gagnon

MIG-105 Ultrasound Physics and Instrument

3 credits

This course provides students with the theory of ultrasound physics and instrumentation. Topics will include the characteristics of sound waves and the way in which ultrasound is utilized in imaging. Propagation of sound, attentuation and acoustic impedance as well as reflection and scattering will be discussed. Ultrasound equipment components, including transducer construction and recording devices will be covered in great detail. Doppler principles including color Doppler will be examined. Prerequisite: Admission in to the Cardiac or General Sonography Program.

01 LEC T 8:30 a.m.-11:15 a.m. G218 MGagnon

MIG-107 Introduction to

Medical Radiography 2 credits

This course covers introductory exposure to the fields of medical radiography and ultrasound. The course covers the history of development of the two modalities, as well as an introduction to radiation protection. The importance of communication between the radiographer and the patient in a diverse environment will be stressed. Other topics will include legal and ethical issues in radiography and medical terminology. This will be a hybrid course, with a web-delivered component. Prerequisite: Admission to the Medical Radiography Program.

MIG-109 Patient Care for Medical Imaging 4 credits

This lab course covers organization and standards of the medical establishment: basic patient care procedures including vital signs, safety, immobility, body mechanics, and medical asepsis; CPR; and basic EKG, oxygen administration, and venipuncture skills. The importance of communication between the radiographer and the patient will be stressed. Simulated laboratory sessions offer students an opportunity to return demonstrated techniques. Co-requisite: Introduction to Medical Radiography (MIG107) or Introduction to Ultrasound (MIG101).

01 LEC F 8:30 a.m.-1:45 p.m. G218 T Millard H1 LEC TH 6:00 p.m. 11:00 p.m. G225 E Peterson

MIG-122 Positioning I 3 credits

This course covers basic principles of patient positioning as applied to medical radiography. The course provides both lecture and lab experiences to help students achieve competency in radiographic examination of the chest, abdomen, and upper and lower extremities. Co-requisite: Full-Time Medical Radiography Clinical I (MIG124F) or Part-Time Medical Radiography Clinical I (MIG124P).

01 LEC TH 8:45 a.m.-1:00 p.m. G225 L Pellecchia

MIG-124F Full-Time Medical

Radiography Clinical I 2 credits This course introduces students to the hospital and its

radiology department. The course centers activities on observation and assisting with various basic radiographic procedures. Students begin to develop competency in the performance of radiographic examinations of the chest, abdomen, and upper extremities. Additional expenses may include supplies, equipment, online tracking software, and/ or uniforms. Course meets two (2) days/week with 16 hours of clinical practice weekly.

CLIN M,W 8:00 a.m.-4:00 p.m. TBA L Pellecchia

MIG-201 Echo III 4 credits

This continuation course of Echo I and II covers advanced cardiac interpretation and echo features of coronary artery disease and valvular heart disease. Students discuss a basic overview of pediatric echo and congenital heart disease. The course reviews related echo material before placement in the clinical sites. Prerequisite: Echo II (MIG119).

01 LEC M 8:30 a.m.-12:05 p.m. G218 M Gagnon

MIG-207 Ultrasound Physics and Instrumentation for the

Cardiac Sonographer 2 credits This course is a continuation of Ultrasound for the

Cardiac Sonographer Physics and Instrumentation and is designed for the cardiac sonography student to integrate their knowledge of ultrasound physics and instrumentation with clinical practice of actually producing a high quality diagnostic image. Image quality will be stressed throughout this course through the use of hands-on applications in the ultrasound lab. Additional topics discussed will include: Spectral display, image artifacts, bioeffects and safety as well as discussions relating to 3D ultrasound and contrast agents. Prerequisite: Ultrasound Physics and Instrumentation (MIG105) and Echo II (MIG119).

LEC M 1:05 p.m.-2:45 p.m. G218 M Gagnon

MIG-211 Cardiac Sonography Clinical I

3 credits

This course covers the development of students' skills in the performance of echocardiograms at the clinical sites. Under supervision of their clinical instructor and the BHCC clinical coordinator, students gain knowledge through scanning patients in the clinical setting. Students' performances are evaluated through clinical competencies in each related echo area. Additional expenses may include supplies, equipment, and/or uniforms. Course meets: three (3) days/week. Prerequisite: Echo II (MIG119). Corequisite: Echo III (MIG201).

CLIN W,TH,F 8:00 a.m.-4:00 p.m. TBA M Jamacochian

MIG-220 Positioning III

This course applies the fundamentals of Positioning I and II to advanced level radiographic examinations. Lecture and lab sessions cover anatomy and radiography of the skull, facial bones, and sinuses, TMJ, mastoids, and other advanced skull exams. The course provides an introduction to advanced exams including arthrograms and myelograms. Prerequisite: Positioning II (MIG126).

LEC W 12:05 p.m.-3:55 p.m. G225 L Pellecchia LEC T 5:30 p.m.-9:30 p.m. G225 E Peterson

MIG-222P Part-Time Medical Radiography Clinical III 1 credit

This course allows students to expand upon skills developed during earlier clinical experience. Students assume more direct responsibility for specific radiographic examination. Additional expenses may include supplies, equipment, and/or uniforms. Course meets two (2) evenings/week, with 8 hours of clinical practice weekly. Prerequisite: Part-Time Medical Radiography Clinical II (MIG128P).

M1 CLIN M,W 6:00 p.m.-10:00 p.m. TBA D Misrati

MIG-224 Radiologic Technology II 3 credits

Using lecture and lab sessions, this course presents the x-ray circuit in form and function. Topics include, but are not limited to, characteristics of x-rays, wave-particle duality, x-ray production, target interactions, photon interactions with matter, digital and conventional fluoroscopy, and electronic imaging units. Prerequisite: Imaging Technology I (MIG111).

01 LEC M,W 8:30 a.m.-11:05 a.m. G225 Class meets 10/26/14-12/20/14

MIG-226 Radiologic Imaging II 3 credits Using lecture and lab sessions, this course explores the concepts of quality assurance, quality control and film critique. Additional topics include but are not limited to: advance digital concepts, cardiovascular and interventional techniques, computers in imaging, and special radiographic procedures. Prerequisite: Radiographic Imaging I (MIG120).

LEC M,W 8:30 a.m.-12:00 p.m. G225 D Misrati Class meets 09/02/14-10/25/14

M1 LEC M,W 6:00 p.m.-9:30 p.m. G225 E Peterson Class meets 09/02/14-10/25/14

MIG-227 Pharmacology of Radiology 1 credit

This course is designed to provide basic concepts of pharmacology to the medical radiography student. Content includes chemical, generic and trade names for select drugs; pharmacokinetic and pharmacodynamic principles of select drugs; classification of drugs; action, effects, uses and side effects of select drugs on imaging procedures; categories of contrast agents; pharmacology of barium and iodine compounds; dose calculations for adult and pediatric patients; legal and ethical status of the radiographer's role in drug administration; and the radiographer's professional liability concerning drug administration. This course has a web-based component. Prerequisites: Patient Care for Medical Imaging (MIG109) and Anatomy and Physiology II/ Lab (BIO204).

01 LEC M 11:15 a.m.-2:15 p.m. G225 D Misrati

MIG-228F Full-Time Medical Radiology Clinical IV

This course allows students to develop additional experience in the materials covered in Positioning I, Positioning II, and Positioning III, and further to expand their clinical skills. Additional expenses may include supplies, equipment, and/or uniforms. Course meets three (3) days/week with 24 hours of clinical practice weekly. Prerequisite: Full-time Medical Radiography Clinical III (MIG222F).

CLIN T,TH,F 8:00 a.m.-4:00 p.m. TBA L Pellecchia

MIG-230 Radiation Protection 3 credits This course covers an overview of the effects of

ionizing radiation on the human body and the protective measures available to minimize those effects. The course examines the effects that produce somatic as well as genetic changes. This course stresses methods of limiting and monitoring radiation exposure to personnel, patients, and the general population. Students gain a personal frame of reference regarding the importance of this issue today. Prerequisite: Radiologic Imaging II (MIG226) for day option only. Co-requisite: Radiologic Imaging II (MIG226) for evening option.

M1 LEC M,W 5:30 p.m.-8:30 p.m. G225 E Peterson Class meets 10/26/14-12/20/14

MIG-234 CT/Cross Sectional Anatomy 2 credits

This course introduces students to CT (Computerized Axial Tomography) history, the development of CT equipment configuration, and the basic scanning protocols. The course exposes students to crosssectional anatomy, which is necessary for proficiency in the areas of CT, Ultrasound, and MRI. Prerequisite: Anatomy/Physiology II/Lab (BIO204).

WB WEB For username and password, go to

www.bhcc.mass.edu/mycourseaccess. LPellecchia

MRC-111 MR Concepts I

This interactive, web-based course begins with MR screening and safety, legal and ethical principles, patient assessment, monitoring and management and interpersonal communications. Other content includes infection control, MR instrumentation, fundamental principles, data manipulation and sequence parameters and options. Prerequisite: Acceptance into MR Certificate Program.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. P Bamford

SON-113 Cross Sectional Anatomy This course focuses on detailed cross-sectional anatomy as it relates to sonographic imaging. This study of serial sectional anatomy helps sonographic

students gain knowledge of the human body needed for the practical application of ultrasound. In class scanning will occur on a routine basis. Prerequisite: Admission to General Sonography Program. Corequisite: Anatomy/Physiology/Lab II (BIO204).

01 LEC TH 8:30 a.m.-12:30 p.m. G218 C Seibert

SON-213 Ultrasound Physics and Instrumentation for

General Sonographer 2 credits

This hybrid course presents Physics of Ultrasound for the General Sonographer and its applications to the performance and instrumentation used in the general sonographic practice. A review of the basic laws and instruments are also discussed as they relate to the specific topics of the Doppler effect, sonographic artifacts. Special emphasis is placed on bioeffects and safety in the performance of General Sonography. The advancements in songoraphic applications and instrumentation such as harmonics, 3D are explored as well as the use of contrast agents; Review from Ultrasound Physics I is covered in the form of online assignments and testing. Prerequisite: Ultrasound Physics/ Instrumentation (MIG105). Corequisite: General Sonography Clinical III (SON223).

LEC M 12:05 p.m.-1:05 p.m. C Seibert LEC W 11:15 a.m.-3:45 p.m. G218 C Seibert Class meets09/02/14-10/25/14

SON-215 Advanced General Sonography I

2 credits

This hybrid course is a combination of classroom teaching and online learning experience. Course topics include a review of abdominal and subspecialty sonography. Interesting sonographic cases will be presented for review. Articles from the Journal of Ultrasound in Medicine and the Journal of Diagnostic Medical Sonography will be reviewed and discussed. Registry practice exams will be taken online on a regular basis. Prerequisite: Abdominal Ultrasound (SON115). Co-requisite: General Sonography Clinical III (SON223).

LEC M 8:30 a.m.-11:15 a.m. G220 C Seibert

SON-219 Obstetrical/Gynecological Sonography I

3 credits

This course familiarizes the student with interpretation of normal sonographic findings of gynecological and first, second and third trimester sonography. All measurement techniques including gestational dating will be discussed. Abnormal sonographic findings as they relate to gynecology and the first trimester will be covered. Related scanning techniques and associated Color Flow and Doppler are described. Sonographic/medical terminology,

pathophysiology, clinical presentation and associated laboratory findings as they relate to gynecology and the first trimester will be covered. Prerequisite: General Sonography Clinical II (SON123). Corequisite: General Sonography Clinical III (SON223).

01 LEC M 12:05 p.m.-1:05 p.m. G218 C Seibert LEC W 11:15 a.m.-3:45 p.m. G218 C Seibert Class meets 10/26/14-12/20/14

SON-223 General Sonography Clinical III 3 credits

This course is the hands on application of ultrasound in the hospital setting. Scanning skills are developed during this clinical. Students will be performing supervised ultrasounds and present daily cases to sonographers and or physicians. Students will become acquainted with the responsibilities needed to work in the ultrasound setting. Clinical will take place 3 days a week. Prerequisite: General Sonography Clinical II (SON123). Co-requisites: Obstetrical and Gynecological Sonography I (SON219), Advanced General Sonography (SON215), and Diagnostic Instrumentation (SON213).

01 CLIN T,TH,F 8:00 a.m.-4:30 p.m. TBA N Chernyak

MEDICAL LABORATORY TECHNICIAN

MLT-111 Intro Clinical Laboratory Sciences I 2 credits

This course explores the nature and scope of clinical laboratory work. The primary focus will be on the role of the laboratory in delivery of health care in various settings, emphasizing historical background, types of health care facilities, regulatory agencies affecting laboratory operations, responsibilities, duties and professional conduct expected of clinical laboratory technicians, safety in the laboratory, laboratory mathematics and quality control. A phlebotomy workshop will develop the fundamental skills required to procure and prepare blood specimens for testing. A field trip will be scheduled to an area hospital laboratory. Prerequisite: Admission to CLS Program.

01 LEC F 8:30 a.m.-9:45 a.m. B333 R Fortin LAB F 10:00 a.m.-11:15 a.m. B333 R Fortin

MLT-112 Urinalysis 2 credits

This course explores the principles and procedures of the routine urinalysis as well as the normal and abnormal physiological functions of the renal system. The course consists of didactic sessions and laboratory sessions where normal and abnormal cellular constituents will be reviewed. Prerequisite: Admission to CLS Program.

01 LEC F 11:30 a.m.-12:45 p.m. B333 R Fortin LAB F 1:00 p.m.-2:15 p.m. B333 R Fortin

MLT-211 Hematology & Hemostasis 4 credits This course consists exploring the theory and practice of routine hematology. Topics include the collection and handling of clinical specimens, the origin, development, and function of human blood cells in health and disease, hemostasis, and coagulation, automation, and quality control. Routine hematology and coagulation testing will be emphasized. Prerequisite: Introduction to Clinical Laboratory

MUSIC

MUS-113 Jazz Ensemble 3 credits

Designed for students with previous experience in music, this course concentrates on application of basic skills of reading, improvisation, and standard performance practices in the small jazz ensemble. Students must audition for admission. Students may repeat this course three times, earning 1 credit for each repetition.

01 LEC W 2:30 p.m.-5:10 p.m. A300 TMcLaughlin

MUS-118 Music Appreciation I 3 credits

An introduction to the history and development of music, this course covers basic questions dealing with the roles of the listener, performer, and composer, as well as representative samples from the first music of the medieval era to the end of the classical era. The course explores music's relationship to historical events and other art forms of the periods. This course meets General Education "Humanities" Requirement Area 6.

01 LEC F 8:30 a.m.-11:15 a.m. B124 K Bigelow W1 LEC W 6:00 p.m.-8:45 p.m. B124 K Bigelow WB WEB For username and password, go to

MUS-119 Music Appreciation II 3 credits

A continuation of the history and development of music, this course presents representative samples of music from the romantic era to the present. It explores music's relationship to historical events and other art forms of the periods. This course meets General Education "Humanities" Requirement Area 6. Prerequisite: Music Appreciation I (MUS118) or permission of the department chair.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess.R Lehmann

MUS-122 Foundation of Music 3 credits
This course covers the full spectrum of rhythm,
intervals, scales, key signatures, chords, triads and
sevenths, and cadences for beginning students.

The course fosters ear training, note reading, some keyboarding application, and much creative activity.

O1 LEC M,W 1:00 p.m.-2:15 p.m. B124 K Bigelow

MUS-129 Rock & Roll History 3 credits
Beginning with the roots of rock in the rockabilly and
blues traditions, continuing through the classical rock
of the 50's and 60's, this course covers all styles of
rock, current and past. The course covers listening

to and identifying specific idiosyncrasies of various performers that are central to the study. This course meets General Education "Humanities" Requirement Area 6.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess.R Lehmann

MUS-131 Piano I 3 credits

This course provides group instruction for the beginner in keyboard technique, including note reading, fundamentals of rhythm, intervals, chords and scales, and a variety of keyboard literature. Students progress at their individual pace.

01 LEC T,TH 2:30 p.m.-3:45 p.m. B124 C Fong 02 LEC T,TH 11:30 a.m.-12:45 p.m. B124 C Fong

MUS-151 Music in the US 3 credits

A survey of musical practice in the United States from the earliest colonial period to the present, this course is designed to give the student an understanding of the richness of our country's musical heritage, both popular (vernacular) and classical (cultivated). Students listen to and discuss old and new music of many styles - folk, symphonic, rock, opera, religious, ethnic, jazz, and pop.

01 LEC M 8:30 a.m.-11:15 a.m. B124 J Amon

MUS-157 Vocal Performance

Workshop 3 credits

This is a workshop class that offers instruction in basic vocal skills. Instruction in these techniques will lead students to develop their ability to sing accurately and with confidence in any style. This class is open to anyone with a sincere interest in becoming a better singer, regardless of past vocal experience. Each class begins with a group warm-up session that leads to individual performances before the instructor and the rest of the class.

01 LEC T,TH 2:30 p.m.-3:45 p.m. A300 E Moussally

MUS-159 Vocal Performance

Workshop II 3 credits

A continuation of Vocal Performance I, this class offers additional instruction in vocal skills. Instructions in these techniques will further develop the student's ability to sing accurately and confidently in any style. Prerequisite: Vocal Performance Workshop I (MUS157).

01 LEC T,TH 2:30 p.m.-3:45 p.m. A300 E Moussally

MUS-526 Instrumental Performance Workshop

3 credits

This is a performance workshop designed for instrumental musicians of varying levels. Students will work to strengthen their performance skills by playing regularly in class and out in public. In order to get the most out of this workshop, students must have a serious commitment to designing, preparing, and presenting actual live performances for concert, audition, and other live settings. Admission is contingent upon a DVD/CD or live audition showing of 2 pieces demonstrating your current performing level--any style of music is acceptable.

01 LEC T 10:00 a.m.-12:45 p.m. A300 TBA

MUS-541 Music of the Arab World and Related Cultures 3 credits

This course is an introduction to the music of selected Near Eastern and Arab cultures (such as Persian in the East and Ethiopic and Berber in Africa). The cantillation styles and practices of various chants of the Hebrew, Christian, and Islamic traditions are also included

01 LEC T,TH 3:55 p.m.-5:10 p.m. E140 E Moussally

NURSING

NUR-095 Success in Nursing

This introductory course focuses on assisting students to adapt to the upcoming challenges in the nursing curriculum. The course emphasizes test-taking skills, study skills, critical thinking, learning styles,

and therapeutic nurse-patient communication and beginning nursing concepts. The course is designed for nursing students accepted to the nursing program in the fall semester and those students planning to apply to the Nursing Program. Course meets: 3 hrs. lecture.

2 credits **NUR-099 Nursing Pathways**

This course is designed for students who are seeking readmission to the nursing program. This course will assist students in analyzing their study skills, and designing a path for successful completion of the nursing program. Topics include time management, stress reduction, adapting study skills, and test-taking techniques and practice. Students are encouraged to use introspection and critical thinking as they formulate a plan that will enable them to complete the nursing program and take the licensure exam after graduation. Computer software and small group work for problem solving in answering multiplechoice questions will be utilized.

NUR-101 Health Assessment and Basic Skills/Lab

This course introduces students to basic health assessment of the adult client using the body systems approach. Students acquire hands on physical assessment skills and then transfer these skills to the clinical setting. Students also learn the basic nursing skills necessary to provide care to the whole person in the clinical setting. Additional expenses may include supplies, equipment, and/or uniforms. Course meets: 1 hr. lecture; 3 hrs. simulation lab. Prerequisites: Acceptance into the Nursing Program and Anatomy/ Physiology I/Lab (BIO203), College Writing I (ENG111), and Drug Calculations (NUR100).

NUR-111 Nursing I

7 credits This course provides the foundation for the theory and practice of associate degree nursing. The concepts of optimal health, person, nurse, environment, and holistic nursing are introduced within the framework of health promotion, health restoration, and health maintenance. The student is introduced to the critical thinking skills required for nursing practice. The student learns and begins to apply the nursing process in the promotion of health for adult clients using functional health patterns categories. Additional expenses may include supplies, equipment, and/or uniforms. Course meets: 5 hrs. lecture; 6 hrs. clinical practice in selected health care facilities. Prerequisite: Acceptance into the Nursing Program and Anatomy/ Physiology I/Lab (BIO203), College Writing I (ENG111), and Drug Calculations (NUR100).

NUR-112 Nursing II

10 credits This course builds upon the concepts introduced in Nursing I (NUR111). Students apply the nursing process within the framework of health restoration, health maintenance, and health promotion in the care of adults with medical/surgical and mental health problems. Students use critical thinking skills to meet the health care needs of the adult client. Students also learn beginning acute care nursing skills necessary to provide care to the whole person. Additional expenses may include supplies, equipment, and/or uniforms. Class meets: 5 hrs. lecture; 3 hrs. simulation lab; 12 hrs clinical practice in selected health care facilities. Prerequisites: Anatomy/Physiology II/ Lab (BIO204), Health Assessment and Basic Skills/ Lab (NUR101), Nursing I (NUR111), and Principles of Psychology (PSY101).

OFFICE & INFORMATION MANAGEMENT

OIM-100 PC Keyboarding Techniques 1 credit

This is an introductory course in college keyboarding designed for students with little or no keyboarding proficiency as well as those looking to upgrade or refresh their skills. Learning to type properly has never been more important. Using state-of-the-art, handson, self-paced software, students proceed from basic lessons through accuracy and speed-building exercises designed to prepare them for careers requiring keyboarding proficiency. Taught through BHCC?s on-line eCollege, students submit handson progress reports to the course instructor as they proceed through each lesson. Upon completion of this course, students will gain the skill and knowledge necessary to type accurately based on one (1) minute timings at a minimum of 20 words per minute with one (1) error or less. For additional information and/ or a course syllabus, contact CITDepartment@bhcc.

OIM-101 Keyboarding: Document Generation I 3 credits

This course focuses on learning the keyboard and developing keyboarding technique, speed, and accuracy. It introduces the Windows environment and basic word processing skills, such as editing, saving, changing appearance, using spell check, and printing using Microsoft Office 2010. It covers formatting for basic business documents, such as resumes, letters and memorandums, and discusses health issues, and computer concepts as related to keyboarding. Note: The department schedules an exemption test each semester for students with previous keyboarding experience. Students should contact the Prior Learning Coordinator in the Center for Self-Directed Learning (CSDL) or department chair for more information.

01 LEC M,W 8:30 a.m.-9:45 a.m. D119 C Laidlaw 02 LEC M,W 10:00 a.m.-11:15 a.m. D119 C Laidlaw S1 LEC S 12:00 p.m.-2:45 p.m. D119 K Myers

OIM-102 Medical Computer

Applications 3 credits

This course includes keyboarding instruction with an emphasis on proper technique, speed building, and proofreading. Students learn the correct format for business letters, memorandums, business reports, and medical documents. Students use the Internet for e-mail and job searches. In addition, they create a resume, reference sheet, and cover letter. Note: For Allied Health students or by permission of department chair.

70 LEC M,W 10:00 a.m.-11:15 a.m. 207 B Briggs Class meets at the Chelsea Campus

OIM-106 Records & Information Management

Management 3 credits
This course provides an introduction to records
management, including alphabetic, subject,
numeric and geographic filing guidelines, as well as
storage media, space limitations, compliance and
risk management, and disaster recovery. Students
will complete hands-on projects using Outlook for
customizing and flagging e-mail, using search folders,
creating and using contacts/notes, scheduling
meetings, and integrating Word merge functions
using contacts. File management using Windows
Explorer and business research using Internet Explorer
are integrated with PowerPoint presentations to
tie together all the various professional skills using
a qualitative approach. Prerequisite: Keyboarding:
Document Generation I (OIM101).Pre/co-requisite:
Applications/Concepts (CIT110).

01HB HYB F 10:00 a.m.-11:15 a.m. D119 S Broughton Web component required

W1HB HYB W 6:00 p.m.-7:15 p.m. D119 S Broughton Web component required

OIM-110 Document Generation II 3 credits This course assists students in using Word to create common business documents such as business letters, memorandums, reports with footnotes and endnotes, bibliographies, tables of contents, tables, on-line forms, resumes and newsletters using current industry standards. Students learn to use accelerator keys, macros, templates, bullets and numbering, leaders, merging, sorting, hyperlinks, section breaks, styles, formulas, clip art, WordArt, and column layout. Diagnostic and speed-building exercises are used to improve keyboarding accuracy and speed. A minimal speed of 30 words per minute is strongly recommended. Students acquire skills that are recommended for preparation for MOUS (Microsoft Office User Specialist) certification. Prerequisites: Grade of C or better in Keyboarding Document Generation I (OIM101) and Applications & Concepts (CIT110) or department chair approval.

70 LEC M,W 8:30 a.m.-9:45 a.m. 207 B Briggs Class meets at the Chelsea Campus

OIM-115 Administrative Technology and Procedures 3 credits

This course introduces administrative skills vital for employment in business and industry, including telecommunications; mail and copy services; travel, meeting, and conference arrangements; teleworkers/ virtual assistants; customer service; and job application techniques. The class develops problem solving, critical thinking, organizational skills, and interpersonal skills while emphasizing work ethics, teamwork, and cultural diversity. To enhance these skills, students work individually and in teams to conduct library and Internet research and give presentations in class. Personnel from area corporations may participate in class discussions. Pre/co-requisites: Keyboarding: Document Generation I (OIM101) and Applications/ Concepts (CIT110).

01 LEC T.TH 10:00 a.m.-11:15 a.m. D119 B Steitz

OIM-130 Business Correspondence and Editing 3 credits

This course reviews English fundamentals and emphasizes proofreading and editing skills for Business documents. Students compose, edit, and produce business letters and memorandums that are commonly written by administrative assistants. This course utilizes current word processing software. Prerequisite: Writing Skills II (ENG095). Pre/corequisite: Keyboarding: Document Generation I (OIM101).

01 LEC T,TH 11:30 a.m.-12:45 p.m. D119 B Steitz
M1 LEC M 6:00 p.m.-8:45 p.m. D119 TBA

OIM-190 Medical Information Management

3 credits

This course covers the medical environment and staff patient and staff scheduling medical documents and computerized medical applications, professional activities and travel arrangements for medical staff, health insurance, and HIPPA standards, and ICD and CPT coding. Students use a computerized patient accounting software application to enter patient information, diagnostic and procedure codes, schedule and revise patient and staff appointments, process insurance claims, enter financial transactions, and generate financial reports. Students complete individual team projects that include Internet research as well as a written and oral presentation on an issue related to medical office administration. Pre/ co-requisite: Keyboarding: Document Generation I. (OIM101).

70 LEC S 9:00 a.m.-11:45 a.m. 207 C Jordan Class meets at the Chelsea campus

OIM-199 Office and Information Management: Technology on the Move 3 credits

Students explore career opportunities in medical, legal, and executive administration fields. This course includes critical thinking and teamwork projects to help students develop the ability to give and receive constructive criticism in a supportive environment. Students complete individual and team projects that use Internet research and library resources. Based on research related to office and information management issues, they develop written and oral presentation skills. Time management, listening, note-taking, and test-taking skills are emphasized. Security issues, legal and ethical issues, and cultural diversity are covered. Current students, alumni, and business personnel will provide perspectives on how to succeed in academia and in the business world. Prerequisites: Writing Skills II (ENG095) or placement and Academic Reading (ESL098) or Reading Skills II (RDG095) or placement. Pre/co-requisite: Keyboarding: Document Generation I (OIM101). Corequisite: Group Dynamics (PSY107). Note: This change will not affect PSY107 requirements.

01 SEM T,TH 8:30 a.m.-9:45 a.m. D119 B Briggs S1 SEM S 9:00 a.m.-11:45 a.m. D119 B Steitz

OIM-200 Introduction to Physicians' Billing

3 credits

This course presents the "revenue cycle" concept to students, which encompasses registration practices and the impact this process has on the billing function. The varied health care delivery systems and the history of the delivery of medical care are presented. The variety of prospective reimbursement systems on data collection, billing, and effective processes are defined and discussed. The principles of ICD and CPT coding, the management of data, and the constantly changing regulations of CMS and other external regulators is reviewed. Technicalities of managing all aspects of claims submission and denial are examined. The course is offered only in the evening. Pre/co-requisite: Medical Terminology (NHP180).

T1 LEC T 6:00 p.m.-8:45 p.m. D119 C Jordan

OIM-230 Administrative Business Communication

3 credits

This course reinforces written (letters, memos, faxes, e-mail, reports, and resumes); verbal (listening, note-taking, telephone messages, voice mail, intercom discussions, and video conferencing); and nonverbal communications (transmission of attitude, facial expressions, hand gestures, and body language). To enhance these skills, students use Internet research to investigate topics related to the office administration field. It includes human relation skills, diversity, cultural sensitivity, and global awareness. This course is offered fall semester only. Pre/co-requisites: Completion of or concurrent with Records and Information Management (OIM106), Document Generation II (OIM110), Administrative Technology and Procedures (OIM115), and Business Correspondence and Editing (OIM130).

01 LEC T,TH 8:30 a.m.-9:45 a.m. B221 KCedrone-Vaccaro

OIM-505 OIM Career Exploration 1 credit
This online class provides students with the tools
needed to evaluate their career goals and to explore
strategies for securing employment within the office
and/or medical office job market. Students will
complete modules that engage them in activities
designed to evaluate values, skills, and interests as
related to their prospective careers. Students will
use resources on the BHCC portal and elsewhere to
explore individual careers and research employers
and the local job market. Resumes and cover letters
will also be completed.

PARALEGAL

(PLG101).

PLG-101 Introduction to Law 3 credits

This course provides students with an understanding of the paralegal field. The course assists students to become familiar with all aspects of the legal system. The course emphasizes the role of the paralegal and the way that role complements that of the lawyer. The course explores the role of law in our society, the judicial system, contract law, tort law, equity, and criminal law. Prerequisites: Writing Skills II (ENG095), Reading Skills II (RDG095) or Academic Reading III (ESL098) or placement.

01 SEM T,TH 10:00 a.m.-11:15 a.m. H120 S Atlas Class meets in the H Building

T1 SEM T 6:00 p.m.-8:45 p.m. B128 A Buckley

PLG-102 Legal Research/Writing 3 credits This course covers an introduction to legal writing and proper use of legal terminology in developing and drafting a format for the legal memorandum, preparing briefs, and, in particular, formulating research skills. Prerequisite: Introduction to Law

S1 LEC S 9:00 a.m.-11:45 a.m. B129B TBA
W1 LEC W 6:00 p.m.-8:45 p.m. D217 A Grunder

PLG-103 Litigation 3 credits

Litigation is a core function of many law firms. Students will learn the rules and requirements necessary to provide effective litigation support in a law office. Topics include the organization and jurisdiction of federal and state courts, the preparation of pleadings, motions, interrogatories, judicial notice, preparation and admission of evidence, subpoenas, depositions and trial notebooks, interviewing clients, trial and appellate procedures, the rules of evidence, and the preparation of cases for hearing or trial. The roles of arbitration, mediation, and negotiation will also be covered. Prerequisites: Introduction to Law (PLG101).

01 LEC T,TH 2:30 p.m.-3:45 p.m. H155 Class meets in the H Building

PLG-104 Legal Ethics 3 credits

This course presents the major areas of legal ethics placing special and comprehensive emphasis on how the rules affect paralegals. It aids students in understanding how the legal profession is regulated generally and the impact that paralegals conduct has on the lawyers who employ them. Through case studies, geared specifically toward paralegals, demonstrations of the rules are introduced and applied. Prerequisite: Introduction to Law (PLG101).

H1 LEC TH 6:00 p.m.-8:45 p.m. B108 A Grunder

PLG-201 Family Law

This course covers the laws concerning family relationship, marriage, cohabitation, adoption, divorce, child custody, support, alimony, and the effects of wills and probate. Prerequisite: Introduction to Law (PLG101).

LEC T,TH 11:30 a.m.-12:45 p.m. H149 S Atlas Class meets in the H Building

PLG-202 Business Organizations 3 credits

Choosing the proper form of business organization can mean the difference between success and failure. Many attorneys are involved in advising their commercial clients regarding the appropriate form of business. This course covers the rules and requirements to establish sole proprietorships, partnerships, limited partnerships, limited liability companies, limited liability partnerships, business trusts, corporations and joint ventures. Practical considerations include the preparation and management of the documents necessary for the organization and maintenance of each business entity. Corporate materials are reviewed, as are corporate characteristics, formation procedures, structure, meetings, dividends, share ownership, amendments, dissolution, and Massachusetts incorporation procedures. Prerequisite: Business Law I (BUS201).

P Sullivan M1 LEC M 6:00 p.m.-8:45 p.m. E140

3 credits

PLG-203 Real Estate Law

This course thoroughly investigates the theory and practice of real estate transactions from the perspectives of both the buyer and the seller. The topics include examination of titles, estates in land, restrictions, easements, covenants, options, deeds, mortgages, and foreclosure proceedings. Prerequisites: Writing Skills II (ENG095), Reading Skills II (RDG095) or Academic Reading III (ESL098) or placement.

S1 LEC S 9:00 a.m.-11:45 a.m. B135B K Daley

PLG-299 Paralegal Internship

An internship in Paralegal Studies is a hands-on learning experience at law firms, public agency, corporation, or other law related organizations, under the direct supervision of a legal professional. It is intended to provide students the opportunity to gain practical experience in their field of study. Students perform 150 hours of internship service over the course of 10-15 weeks, during the spring, fall, or summer semesters. Prerequisites: Completion of all PLG required courses. Pre/co-requisite: a cumulative grade point average of at least 3.0 in the program and approval of the paralegal faculty internship

coordinator. Students meet bi-weekly with their advisor to prepare papers, work on related projects, and share experiences with other students. Students are responsible for following all guidelines in the BHCC Internship Handbook.

01 LEC F 1:00 p.m.-2:15 p.m. S Atlas

PHARMACY TECHNOLOGY

All Pharmacy Technology courses meet at the Chelsea Campus

PMT-111 Pharmacy Practice I

This course provides the student with a perspective on the role of the pharmacy technician, the genesis of the regulations governing the pharmaceutical industry and the current status of federal and state laws which must be followed. Emphasis will be placed on handling controlled substances and related record keeping. The roles of the FDA in the drug approval process and post-marketing surveillance, and the DEA in the daily operation of the pharmacy will be discussed. Students will be introduced to common medical terminology and weights and measures used routinely in the practice of pharmacy. Prerequisite: Writing Skills II (ENG095) or placement.

LEC M,W 8:30 a.m.-12:30 p.m. LEC F 8:30 a.m.-11:15 a.m. R Yost Class meets 09/02/14-10/03/14

PMT-112 Pharmacy Practice II

This course provides the student with the knowledge to be able to begin participation in prescription/ order processing in a pharmacy. The course includes an introduction to drug formulation, pharmacy operations, third party billing and inventory control that are essential to working in a pharmacy. A general introduction to biopharmaceutics and drug action will be provided. Prerequisite: Pharmacy Practice for Pharmacy Technicians I (PMT111).

70 LEC M.W 8:30 a.m.-12:30 p.m. 121 R Yost LEC F 8:30 a.m.-11:15 a.m. 12'
Class meets 10/06/14-11/07/14

PMT-113 Pharmacy Practice III 4 credits

This course provides the student with a basic introduction to the pharmacology of drugs in common use. The course will be taught by examining body systems, e.g. gastrointestinal, and will include discussion of the drugs commonly used in treating diseases affecting the system. Drugs will be discussed by grouping them into general classes and with important differences among group members being highlighted. The dosage, routes of administration, generic and trade names, common adverse reactions and important drug interactions will be emphasized. Calculation of patient dosage and patient days supply will be used when appropriate. Prerequisite: Pharmacy Practice for Pharmacy Technicians II (PMT112)

LEC M,W 8:30 a.m.-12:30 p.m. 121 F 8:30 a.m.-11:15 a.m. 121 R Yost Class meets 11/12/14-12/19/14

PMT-299 Pharmacy Practicum/

This course combines group discussion in a seminar setting with an internship program based in a live pharmacy setting. The practicum and seminar are designed to give the student practical experience in the basic roles the technician fulfills in the pharmacy and to complete their preparation fro transition to the workplace. The experience component encompasses the steps from customer service to prescription processing and prescription production. The shared learning experience in the weekly seminar will be used as a problem solving group discussion and to prepare the student to apply and compete for work. Prerequisites: Writing Skills II (ENG095) or placement.

70 LEC/LAB F 11:30 a.m.-12:30 p.m. Class meets 9/02/14-12/19/14

PHILOSOPHY

PHL-101 Introduction to Philosophy 3 credits This introductory course acquaints students with the

philosophic method, the problems and living issues of philosophy, and the great philosophers. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095); or exemption by placement testing.

PRACTICAL NURSING

PNP-111 Practical Nursing I

This course provides the foundation for theory and practice of practical nurses. The concepts of optimal health, person, nurse, environment, and holistic nursing are introduced within the framework of health promotion, health restoration and health maintenance. The student is introduced to critical thinking skills required for the practical nurse. The student learns and begins to apply the nursing process in the promotion of health for adult clients, using functional health patterns categories. The student is introduced to vocational trends and issues in the practical nursing field. Additional expenses may include supplies, equipment and uniforms. Course meets 6 hours of lecture/lab 1-2 days per week and 6 hours of clinical practice (in the college or in selected health care facilities) each week.

Corequisites include: Drug Calculations (NUR100) and Principles of Psychology (PSY101). Prerequisite: acceptance into the Practical Nursing Certificate Program, Foundations of Algebra or placement testing (MAT097), College Writing (ENG 111), Anatomy & Physiology/Lab I(BIO 203), Anatomy & Physiology/Lab II (BIO204).

PSY-131 Psychology of Popular Culture

This course is designed to facilitate the development of critical thinking, reading, and writing skills through the psychological study of popular culture. Issues of social psychology, cross-cultural communication,

identity development, creativity, violence, and psychological health will be analyzed in a variety of domains of popular culture. Psychological theory and analysis will be applied to youth culture, consumer culture, political campaigns, contemporary music and visual arts, tourism, stand-up comedy, advertising, and the internet. This course meets General Education "Individual and Society" Requirement Area 2.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. MSchernwetter

PSY-203 Psychology of Personal Adjustment

This course explores the development and expression of the personality through an examination of processes by which the self-concept is formed. The course surveys the theories of behavioral scientists that have contributed to the study of adjustment. Scientific study of the effects of stress and stress management techniques are included in this curriculum. The course prepares students for advanced study in psychology and places emphasis on critical thinking skills, especially as applied to scientific research. Prerequisite: Grade of C or better in Principles of Psychology (PSY101) or permission of instructor.

PSY-215 Counseling 3 credits This course explores theories and practices in counseling individuals and groups. It explores various theoretical approaches to counseling, and provides practical exercises in counseling. This course is restricted to those students enrolled in the Human Services, Education, Early Childhood, Psychology, or Sociology programs or by permission of the department chair of Education, Early Childhood, and Human Services or the department chair of Behavioral Sciences. Prerequisite: Grade of C or better in Principles of Psychology (PSY101).

01	LEC	M,W 10:00 a.m11:15 a.m.	B135A	T Cao

PSY-223 Personality

This course covers distinctive patterns of behavior, including the thoughts and emotions that characterize individuals' adaptation to life. It examines four major approaches to the study of personality: psychoanalytic, behavioral, trait dispositional, and humanistic. Students study varying degrees of emphasis on processes or forces impinging on individuals' interaction with their environment. Prerequisite: Grade of C or better in Principles of Psychology (PSY101).

PSY-235 Introduction to

Behavioral Research 3 credits

This course is an introduction to the ways of discovering, describing, and making warranted assertions about aspects of people and social life. The chief objectives are 1) to help students develop the skills and knowledge necessary to become intelligent critics of research in the behavioral and social sciences, and 2) to give them a rudimentary understanding of the design and evaluation of scientific research. Statistical material is treated in a conceptual manner. Prerequisite: Grade C or better in Principles of Psychology (PSY101).

READING

RDG-090 Reading Skills I

This course develops basic reading skills necessary for success with college level material. The course will focus on improving comprehension and vocabulary. In particular, students will improve ability to recognize and articulate main ideas, supporting details, and patterns of organization. Students will also improve vocabulary skills using context clues and the dictionary. Note: Students must meet exit-level requirements or pass a departmental reading final in order to earn a passing grade of C in this course.

SCIENCE

AST-102 Astronomy/Lab

4 credits
This course covers an introductory study of basic astronomy, including the planets, the apparent motions of celestial objects, the seasons, constellations, comets and meteors, stars, galaxies, and the large-scale structure of the universe. The course includes current events in space exploration. The course meets General Education "Science and Technology" Requirement Area 5. Course meets: 3 hrs. lecture; 1.5 hrs. lab. Prerequisites: Writing Skills II (ENG095) and a grade of C or better in Foundations of Algebra (MAT097) or placement equivalency.

BIO-105 Introduction to Biology 4 credits This course will investigate the major biological concepts that connect all forms of life and is designed for students with little or no background in science. Topics will include the process of scientific inquiry, the cell as the basic unit of life, metabolism, cellular reproduction, genetics, evolutionary theory and principles of ecology. Laboratory work will introduce students to the basic investigative techniques used to study life's processes. There will be no animal dissection in this course. This course will satisfy the General Education "Science & Technology" Area 5 requirement for all programs and may be used to satisfy the biology prerequisite for Anatomy and Physiology I (BIO203). This course will not satisfy the general biology requirement of the Associate in Science: Biological Science program. Prerequisites: Writing Skills (ENG095), a grade of C or better in Foundations of Mathematics (MAT093), and Reading Skills II (RDG095) or placement equivalence.

BIO-108 Human Biology/Lab 4 credits

This course is designed to introduce students pursuing careers in the health fields to the structure and function of the human body. It is intended to help students with a limited scientific background grasp the fundamental concepts of biology as well as human anatomy and physiology. Pathophysiology, genetics and relevant clinical aspects are discussed with each system so that students can apply their clinical learning. This course does not substitute for programs that require BIO203 and BIO204. Open to all students and satisfies General Education "Science and Technology" Requirement Area 5. Course meets 3 hrs. lecture; 1.5 hrs. lab. Note: May be used as a prerequisite for Anatomy & Physiology I/ Lab (BIO203). Prerequisites: Writing Skills II (ENG095), a grade of C or better in Foundations of Mathematics (MAT093), and Reading Skills II (RDG095) or placement equivalent.

BIO-111 Food and Nutrition 3 credits
This course covers a study of plant and animal sources
of human food, their nutritional values, and the way
they are utilized by the body in health and disease.
Topics include the selection of an adequate diet,
evaluation of nutrition status, nutrition in pregnancy
and lactation, nutrition in infancy and in aging, weight
control, alternate food patterns, ethnic foods, and
nutrition-related health problems. The department
recommends this course for students in Allied Health
programs. The course is offered in the Center for SelfDirected Learning only.

BIO-115 Nutrition Science/Lab 4 credits

This course covers a study of plant and animal sources of human food, their nutritional values, and the way they are utilized by the body in health and disease. Topics include chemistry and biology of food, personal nutrition evaluation, nutrition-related health problems, and global food and nutrition issues. Laboratory exercises introduce students to the diagnostic procedures used by nutritionists and to reinforce I earning of nutritional theory. A background in biology or chemistry is not required. The course meets General Education "Science and Technology" Requirement Area 5. Course meets: 3 hrs. lecture; 1.5 hrs. lab. Prerequisites: Writing Skills II (ENG095), a grade of C or better in Foundations of Mathematics (MAT093), Academic Reading III (ESL098) or Reading Skills II (RDG095) or placement equivalency.

BIO-120 Introduction to Biotechnology 4 credits

This course offers an introduction to the field of biotechnology designed for students in all programs of study. General principles of biology, their applications in biotechnology and the concepts and work practices of the biotechnology industry will be presented. The medical, social, political, and ethical implications of recombinant DNA technology and the Human Genome Project will be discussed. Career opportunities in biotechnology will also be presented. Students will be introduced to basic investigative techniques and procedures used in Biotechnology research. Labs are designed to reinforce lecture concepts. This course meets General Education "Science and Technology" Requirement Area 5. Course meets: 3 hrs. lecture; 1.5 hrs. lab. Prerequisites: Writing Skills II (ENG095), Foundations of Mathematics (MAT093), and Reading Skills (RDG095) or placement equivalency.

BIO-195 Gen Biology I/Lab * 4 credits

The course will examine the cell as the basic unit of life. Topics will include cell chemistry, cell structure and function, metabolism, cellular respiration, photosynthesis, and cell division. The course will conclude with an examination of the genetic and chromosomal basis of inheritance. Laboratory work will provide students with the basic skills necessary to work in advanced biology laboratory courses. This is the first required biology course in the AS Biological Science program. Students planning to enroll in a health science program should enroll in Principles of Biology I/Lab (BIO101) or Human Biology/Lab (BIO108). This course meets General Education Science and Technology Requirement Area 5.Prerequisites: Writing Skills II (ENG095) and Reading Skills II (RDG095) or placement and a grade of C or better in College Algebra-STEM (MAT194).

BIO-196 Gen Biology II/Lab * 4 credits

As a continuation of General Biology I/Lab (BIO195), the course begins with a study of chemical basis of inheritance and protein synthesis. The course then investigates the mechanisms of adaptive evolution, speciation, phylogeny, and the history of life on earth. The course concludes with a survey of the three domains of life and an introduction to the structure of populations and ecosystems. Laboratory work will continue to develop the student's critical thinking and problem solving skills. Prerequisite: Grade of C or better in General Biology I/Lab (BIO195).

BIO-203 Anatomy/Physiology I/Lab 4 credits
This is the first course in a two-semester sequence
that will examine the systems of the human body
using an integrated approach. Areas of study will
include the structure and function of cells, histology,
the physiological and anatomical aspects of support
and movement systems and the nervous system.
Laboratory activities will enhance the students'
comprehension of the structure and function of the
human body. Course meets: 3 hrs. lecture; 3 hours.
Lab. Prerequisite: Grade of C or better in Principles
of Biology I/Lab (BIO101), Human Biology (BIO108) or
General Biology I/Lab (BIO195).

BIO-204 Anatomy & Physiology II/Lab 4 credits As a continuation of Anatomy/Physiology I (BIO203) this course will again use an integrated approach to examine the human systems not covered in Anatomy/Physiology I. Areas of study will include the endocrine system, the cardiovascular system, lymphatic and immune systems, respiratory system, digestive system, urinary system and reproductive system. Laboratory activities will enhance the students' comprehension of the structure and function of the human body. Course meets: 3 hrs. Lecture; 3 hrs. lab. Prerequisite: Grade of C or better in Anatomy/Physiology I/Lab (BIO203).

BIO-205	Microbiology/Lab		4 cradits

BIO-205 Microbiology/Lab

This course is intended for students entering health care careers and the biotechnology industry. This course will provide a solid foundation of basic physiological and biochemical activities of bacteria, viruses, fungi, and protozoa. The fundamentals of microbial physiology, genetics, and immunology will be presented with emphasis placed on virulence factors and the mechanisms in which these microorganisms establish disease. Microbiology in the workplace will be covered through a discussion of methods of physical and chemical control of microorganisms, microbial growth and enumeration. The use of anti-viral drugs, and antibiotics, the host immune response to infection, and the effectiveness of various vaccination strategies will also be discussed. The course will be completed by investigating the importance of human pathogens in patient care and nosocomial infection while looking at several major diseases. Exercises in the laboratory portion of the course deal with aseptic techniques, microbial cultivation and growth characteristics, staining and bacterial isolation techniques, differential biochemical tests, identification of unknown bacterial species, and testing effectiveness of antimicrobial agents. Course meets 3 hrs lecture and 3 hrs lab. Prerequisite: Anatomy and Physiology I/Lab(BIO203) or General Biology I/Lab (BIO195) or admission to the Nursing Program.

BIO-207 Cell Biology/Lab 4 credits A study of cell structure and function including the following topics: organelles, membrane function, metabolism, gene action, communication, and regulation of growth. Some specialized cells will be discussed. The laboratory will include biotechnological, molecular, and cellular experiments. Class meets: 3 hrs. lecture; 3 hrs. lab. Prerequisite: A grade of C or better in General Biology I/Lab (BIO195), a grade of C or better in General Chemistry I/Lab (CHM201) or permission of the science and engineering department.

BIO-208 Genetics and Lab 4 credits

This course offers a broad understanding of classical, molecular and evolutionary genetics. Highlighted topics will include the molecular and chromosomal basis of inheritance, extranuclear inheritance, gene mapping and analysis, control of gene expression in pro- and eukaryotes, Chi square analysis, probability theory, DNA mutation and repair, genetics of cancer, population and human genetics. Experimental work will focus on the theory and practice of current techniques in genetics. Prerequisite: A grade of C or better in General Biology II/Lab (BIO196) or permission of science and engineering department.

BIO-210 Population Ecology * 4 credits

This course is designed to give students an overview of the science of population biology. The course covers topics related to: distribution and abundance of species; mathematical models of logistic and exponential growth; the application of the Hardy-Weinberg principle to describe changes in gene frequencies via natural selection or other processes on populations; life-history strategies, inter specific interactions; population regulation and sustainable ecosystems; and human impact on the sustainability of wild populations. Laboratory activities include basic field techniques for collection and estimation of populations, basic statistical analysis, computer simulation, and formal lab exercises. Lab experiments are designed to facilitate an understanding of basic scientific field research and principles of population ecology. This course is designed for advanced science students and may be taken as an elective for the general biology transfer program. Prerequisite: General Biology II/Lab (BIO196) or permission of the science and engineering department.

BIO-260 Molecular Biotechnology 5 credits
This capstone course presents the major concepts of
molecular biology and their relationship to the field of
biotechnology. The course will focus on recombinant
DNA technology, genetically engineered organisms,
sequencing, gene expression in prokaryotes and
eukaryotes, protein expression and analysis, and
genomics. Advanced to pics will include Bioinformatics,

Protein engineering, RNA interference and biological products as therapeutic agents. Laboratory activities will emphasize proper laboratory protocol and documentation, inquiry based investigations, formal laboratory report writing, and standard laboratory skills used in biotechnology research. The course will also focus on career opportunities and hiring trends in the biotechnology industry and require that students work on their job readiness skills. Upon completion of this course, students will be qualified for entry level employment or internships in the biotechnology field. Course meets: 3 hrs. lecture, 4 hrs. lab. Prerequisites: grade of C or better in Introduction to Biotechnology (BIO120), Cell Biology and Lab (BIO207) and Genetics and Lab (BIO208) or department approval.

01 LEC M 9:00 a.m.-11:15 a.m. D318 B Kadambi LAB W 9:30 a.m.-2:00 p.m. D318 B Kadambi

BME-100 Biomedical Engineering I 4 credits
A first course in Biomedical Engineering (BME),
this course introduces students to preliminary
Biomedical Engineering topics. Topics include:
the BME profession, morals and ethics, anatomy
and physiology, static biomechanics, rehabilitation
engineering, static bioinstrumentation, biosensors,
biosignal processing, and models of neurons. MATLAB
is used for ease in problem solving. Laboratory
involves using a virtual instrument (Biopac) to record
and analyze signals from the body. Class meets: 3
hrs. lecture; 2 hrs. laboratory. Prerequisites: Grade of
C or better in Calculus I (MAT281) and a grade of C
or better in General Chemistry I/Lab (CHM201). Corequisite:Calculus II (MAT282).

CHM-120 Principles of Inorganic Chemistry & Lab 4 credit

This course is an introduction to the basic concepts of inorganic chemistry. Topics include measurement theory, methods of scientific investigation, atomic theory, nuclear radiation, compound formation, chemical nomenclature, chemical reactions, the mole concept, solution chemistry, acid-base chemistry, and the relevance of chemistry in health professions. Laboratory work will introduce students to basic laboratory techniques, safety regulations, and chemical hygiene. This course does not satisfy the chemistry requirement of the AS Biological Sciences or AS Engineering programs or the AA Chemistry/ Physics concentrations. Course meets 3 hrs. lecture; 3 hrs. lab. Prerequisites: Writing Skills II (ENG095), Reading Skills II (RDG095), and Foundations of Algebra (MAT097) or placement equivalencies.

W1 LEC/LAB W 6:00 p.m.-10:00 p.m. CHM-121 Principles of Organic

& Biochemistry/Lab 4 credits
This course serves as an introduction to organic and biochemistry. The naming and reactivity patterns of common organic functional groups will be presented. A study of biochemistry will introduce students to the chemical structures and reactions of lipids, carbohydrates, proteins, and nucleic acids and their role in metabolism. The standard length three hour laboratory session will serve to reinforce the concepts discussed during lectures and will provide students with practical experience in organic synthesis reactions and organic compound identification methods. This course does not satisfy the Organic Chemistry requirement of the AA Chemistry Concentration. Prerequisites: Grade of C or better in Chemical Science I & Lab (CHM110) or Principles of Inorganic Chemistry & Lab (CHM120).

CHM-151 Basic Chemistry (Non-Lab) 3 credits This course is an introduction to basic concepts of inorganic chemistry. The course is designed primarily for students who have not previously studied chemistry. Topics, which are presented in a multi-media, modular format, include measurement, chemical symbols and equations, physical and chemical properties, atomic structure, chemical compounds, solutions, and an overview of chemical reactions. The course is offered in the Center for Self-Directed Learning only. Prerequisite: A grade of C or better in Foundations of Algebra (MAT097).

LC GSS 1 hour per credit attendance is required.
Flexible Schedule H165 E Lapo
Class meets in the H building

CHM-201 General Chemistry I/Lab 4 credits
This course is a rigorous introductory course as
part of a two-semester sequence that studies
chemical principles. Topics include atomic structure,
reaction types and equations, stoichiometry,

gas laws, termochemistry and bonding theory. Students are required to purchase approved safety goggles. Course meets: 3 hours lecture; 3 hours lab. Prerequisites: Grade of C+ or better in Precalculus (MAT197) or exemption by placement testing and a grade of C or better in College Writing I (ENG111). Note: This course is intended for students planning to major or transfer as science or engineering majors. Pre-allied health students or students requiring a one semester overview of chemistry should enroll in Principles of Inorganic Chemistry & Lab (CHM120).

SUSundaySustainability within Curriculum

Courses marked with a leaf symbol are part of BHCC's ongoing efforts to integrate sustainability into the College's curriculum. These courses emphasize the importance of environmental responsibility and contribute significantly to students, understanding and practice of sustainability. Not all sections may be sustainable, please check with the Academic Records Office if you have questions.

lecture; 3 hours lab. Prerequisites: Grade of C or better in General Chemistry II and lab (CHM202) and a grade of C or better in College Writing II (ENG112).

ENR-265 Engineering Dynamics 3 credits

The course covers Kinematics and Kinetics of particles and rigid bodies, with the application of Newton's Second Law and the principles of workenergy and impulse. The course enables students to distinguish statics problems from dynamics problems and to identify inertial effects. The course also enables students who are interested in Engineering Mechanics or related disciplines to comprehend the vast applications of the principles of dynamics ranging from structural design of vehicles, electromechanical devices such as motors and movable tools, biomedical devices such as artificial heart and bladder, to predictions of the motions of satellites, spacecraft, etc. Course meets 3 hours lecture. Prerequisite: Grade of C or better in Engineering Statics (ENR260). Corequisite: Ordinary Differential Equations (MAT285).

ENV-105 Environmental Science I/Lab

ence I/Lab * 4 credits

This course covers an introduction to the physical and biological structure of the natural environment within a global perspective. The course emphasizes both a local and global perspective on the study of natural systems and the impacts of human society on these systems. Topics include: ecosystem dynamics, international conservation biology, biodiversity, evolution and adaptation, population dynamics, climate, and the role of science and technology in business and society, and sustaining ecosystems and wildlife. Laboratory investigations develop critical thinking and formal report writing skills. The department recommends this course for A.S. degree students as the General Education "Science and Technology" Requirement Area 5. Course meets 3 hrs. lecture; 1.5 hrs. lab. Prerequisites: Writing Skills II (ENG095), a grade of C or better in Foundations of Mathematics (MAT093), and Reading Skills II (RDG095) or placement.

www.bhcc.mass.edu/mycourseaccess. ENV-106 Environmental Science II/Lab 4 credits

This course examines the global and local impact of human culture upon the natural systems. Students investigate both destructive and constructive elements of human action within the natural environment. Also, students learn the role of science and technology in the environment and society. Topics include: air and water pollution; toxicity; ozone depletion; global warming; hazardous waste; the role of science and technology in business and society; and renewable and nonrenewable energy resources. Laboratory investigations develop students' critical thinking skills and formal report writing skills. Course meets 3 hrs. lecture; 1.5 hrs. lab. Prerequisites: Writing Skills II (ENG095), a grade of C or better in Fundamentals of Math (MAT091) or placement and Academic Reading III (ESL098) or Reading Skills II (RDG095), or placement.

ENV-110 Sustainability & Resource Conservation/Lab 4 credits

This course is an introduction to fundamental concepts of sustainability and resource conservation as related to the human environment. Through lectures, laboratories and dialogue, students develop literacy in sustainability topics found in local, regional and global spheres and study a collaborative approach to reducing ecological impact of individuals and organizations. The course provides an opportunity for in-depth exploration of three topics related to sustainability: energy and conservation, renewable energy sources and climate action planning. Assigned readings illustrate the impact of resource conservation on quality of life. Laboratory work demonstrates concepts such as heat transfer principles and technologies such as solar, wind and fuel cells. Assignments support the College's pursuit of climate neutrality. This course meets the General Education Requirement Area 5 Course meets 3 hours lecture; 1.5 hours lab. Prerequisites: Foundations of Algebra (MAT097), Writing Skills II (ENG095), Reading Skills II (RDG095) or placement equivalency.

ENV-111 Survey of Renewable Energy *

3 credits

This course investigates the potential of renewable energy technologies to help solve environmental and economic problems within society. Areas of investigation include solar energy, wind power, hydropower, geothermal, fuel cells, biomass, ocean wave power, and alternative transportation options. Also addressed are conventional energy sources Also addressed are conventional energy sources including oil, coal, natural gas, and nuclear energy. Consideration will be given to related issues such as costs, externalities, system efficiencies, emissions and other environmental impacts, financing incentives, and the regulatory and market forces impacting the alternative energy industry. Students will learn how to assess the viability of incorporating renewable technology, such as solar or wind power, for residential and commercial applications. Course meets 3 hours lecture; 1.5 hours lab. This course meets General Education "Science and Technology" Area 5 requirement. Prerequisites: Foundations of Mathematics (MAT093), Writing Skills II (ENG095), Reading Skills II (RDG095) or placement equivalency.

PHY-201 General Physics I/Lab 4 credits

PHY-201 General Physics I/Lab 4 credits This introductory course covers the principles of physics, using a problem-solving approach. Laws of motion, forces, work and energy, momentum and harmonic motion will be covered. For the biology student this course will provide him or her with an enhanced understanding of the physical aspects of living systems. Laboratory work will reinforce the understanding of physical concepts and promote the development of problem solving skills. This course satisfies the physics requirement of the AS Biological Science program. This course does not satisfy the physics requirement of the AA Chemical Science or Physics/Engineering concentrations or the AS Engineering program. Prerequisite: Grade of C or better in Precalculus (MAT197).

PHY-202 General Physics II/Lab 4 credits

This continuation course of General Physics I/Lab (PHY201) covers the following topics: waves and sound, elasticity, fluids, heat, electricity, magnetism, electromagnetic radiation, light and optics and modern physics. As in General Physics I this course will continue to relate principles of physics to living systems. Laboratory work will further develop the student's skills in data collecting and analysis. This course satisfies the physics requirement of the AS Biological Science program. This course does not satisfy the physics requirement of the AA Chemical Science or Physics/Engineering concentrations or the physics requirement of the AS Engineering program. Prerequisite: Grade of C or better in General Physics I/Lab (PHY201).

SCI-221 Interpret of Science Research 3 credits

This course will introduce students to the major aspects of formal scientific communication. Students will learn how to read scientific papers or posters, listen to conference presentations, search primary sources, write lab reports in the style of a scientific paper, and to present experimental results in both poster and oral presentation formats. Students will use assignments from previous science courses as the foundation for their own paper, poster and oral presentations. This course is recommended for all STEM majors and will provide students with the communication skills required for research internships. This course may be used as a career elective for all science and engineering programs. Course meets: 3 hour lecture. Prerequisites: Completion of at least two college-level science or engineering courses (BIO 195 or above, CHM 201 or above, PHY 201 or above, ENR 101 or above) or permission of instructor.

01 LEC M 2:30 p.m.-5:10 p.m. B216K Atkinson

SOCIOLOGY

SOC-101 Principles of Sociology 3 credits
This course covers an introduction to the concepts
and theories of society and social institutions. The
course meets General Education "Individual and
Society" Requirement Area 2. Prerequisite: Academic
Reading III (ESL098) or Reading Skills II (RDG095) or
co-enrollment in integrated courses or exemption
from reading requirement by placement testing.

VB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. Y Vissing

SOC-206 Juvenile Delinquency 3 credits
The course analyzes the nature and types of juvenile
behavior that violate the law. Students study issues
such as socialization, deviant roles, social processes,
the special attributes of youth, and historical attributes
toward childhood and adolescence. Topics include
family juvenile court, correctional institutions,
causes of delinquency, the female delinquent, and
prevention and treatment of delinquency.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. L Sarpy

SOC-207 Criminology 3 credits

This course examines various aspects of crime from the perspective of the sociologist. The course emphasizes social structure/social process theories of social disorganization and crime causation. Other topics include the history of criminology, the nature and extent of crime, the measurement of crime, criminal typologies, public order crime, victims, and victimization. Prerequisite: Principles of Psychology (PSY101) or Principles of Sociology (SOC101).

SOC-225 Sociology of Homosexuality 3 credits This survey course examines issues dealing with homosexuality from the perspective of the sociologist. The course emphasizes the essentialist/constructionist debate; facts and myths about homosexuality; the influence of prejudice and discrimination on the lives of gay men, lesbians and their families; and the homosexual culture/community/lifestyle. Other topics include coming out issues, development of gay and lesbian identities,

the needs of a gay family member, gay history, gay spirituality, the AIDS crisis, and the gay liberation movement and its impact on contemporary culture.

W1 LEC W 6:30 p.m.-9:15 p.m. B104

SOC-227 Race, Class, and Gender 3 credits This course explores issues of color, gender, class, and caste as they exit in contemporary American society. The impact of "hate" groups on American life and culture will be explored through the concept of "difference" and the ideas of superiority and inferiority. Topics to be discussed include racism, sexism, multiculturalisms and Eurocentrism. Prerequisite: Principles of Sociology (SOC101) or Principles of Psychology (PSY101) or Cultural Anthropology (SOC109).

THE-108 Acting II

3 credits

(VMA102).

This scene study class covers intensive work with imagery and improvisation to heighten actors' abilities to perform roles dynamically. The course focuses on students' discovering their strengths as they learn to trust their impulses and create characters that are vulnerable and compelling. Each participant works on two scenes. Prerequisite: Acting I (THE107).

01 LEC T 2:30 p.m.-5:10 p.m. C202 D Sorbello

THE-115 Playwriting

3 credits This course introduces students to various approaches to writing for the stage. Components of playwriting, which include narrative, structure, plot, character, dialogue, and setting, as well as the

concept of "theatre", will be explored. Through reading and discussion of short works by a selection of playwrights, students will garner a sense of the development of playwriting while also being exposed to various playwriting genres. During the semester, students will create short works for the stage. Weekly writing exercises will be shared and discussed in class.

01 LEC M 2:30 p.m.-5:10 p.m. A300 D Sorbello

VISUAL AND MEDIA ARTS

VMA-100 VMA Freshman Seminar 3 credits This interdisciplinary course builds a connection to the aesthetic historical and intellectual aspects of an artist community and creative work while helping students navigate through some of the logistical hurdles of the first year experience. Students participate in a variety of group activities, discussions and presentations with faculty and visiting artists. Field trips include local galleries/studios and museums. A journal/ sketchbook is required. The course is required for all Visual and Media Arts majors. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics

VMA-103 Three-Dimensional Design 3 credits This course introduces the student to the elements, principles, terminology and materials of Three-Demensional Design, as well as expand upon the graphic design techniques and principle introduced in Two-Dimensional Design. Students work on problem sequences dealing with modeled and constructed forms, both in relief and free-standing. Other problems introduce students to more conceptual and site-specific approaches to sculpture. There is emphasis on writing and communication skills for

and critique. Prerequisite: Two-Dimensional Design 01 LEC T 11:30 a.m.-2:15 p.m. E Petitti

mastery of basic vocabulary and process of evaluation

VMA-104 Drawing I 3 credits

An introductory studio course designed to examine basic vocabulary and drawing skills and concepts. Using a wide range of drawing media, students work primarily from observation mastering the concepts of objective drawing. While concentrating on the formal visual elements: line, shape, value, texture and (limited) color, students explore such concepts as figure/ground, scale, positive and negative space, proportion, perspective, volume, light, compositional issues and pictorial unity. There is an emphasis on writing and communication skills for mastery of basic vocabulary, and process of evaluation and critique. This course meets General Education "Humanities" Requirement Area 6. Prerequisite: Writing Skills II

VMA-105 Digital Imaging with Photoshop

The Adobe Photoshop workspace reflects the technical basis of the digital image. Understanding the structure of this important application enables the student to systematically build confidence and skill in its use, and also apply its principles in related applications. This course surveys the breadth and depth of the Photoshop workspace and toolset through lecture presentations and lab exercises. An overview of the digital imaging workflow will be presented, with emphasis on image processing. Students must have basic computer literacy. Prerequisite: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-111 Introduction to Mass Media 3 credits

This course covers an overview of the history and theory of mass media, including print, radio, television, the Internet, movies, advertising and public relations. The course covers general concepts of mass media, the media industries, and practical methods to analyze and understand the influence of the mass media on social, cultural, and political life, not only in the United States, but also around the globe. In addition, the course looks at ways individuals themselves can influence the media. The course

meets General Education World View Requirement Area 3. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-112 Art History:

Prehistoric-Medieval 3 credits

The course is a broad multicultural survey of the art and architecture of Egypt, Rome, Greece, the Near, Mid, and Far East, and Europe, from the Paleolithic Era through the Moyen Age. The course stresses the understanding of art through examining visual concepts such as composition, space, rhythm, symmetry, perspective, and subject matter, as well as its social, political, and cultural contexts. Students will experience and analyze works of art through lectures, written assignments, journal entries, identification and essay exams, presentations, group projects, and visits to museums. The course meets General Education "Humanities" Requirement Area 6. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-124 Printmaking I 3 credits

An introduction to a variety of printmaking processes, this course includes woodcut, monotype, engraving, and drypoint. The course encourages experimentation in a self-motivated workshop environment. Class time includes one-on-one instruction and group critiques. Some drawing experience is desirable, although not required. The course meets General Education "Humanities" Requirement Area 6. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT092).

01 LEC F 10:00 a.m.-12:45 p.m. E148 A Freiberg

VMA-131 Digital Publishing

w/InDesign

3 credits This course introduces students to the fundamental knowledge required to operate Macintosh computers for use in digital publishing. Students become computer literate by learning the basic principles of digital publishing. Through an introduction to the word processing program Microsoft Word and the page layout program InDesign, students are directed in the production of documents that require the application of those principles. Students are also exposed to Adobe Illustrator and Adobe Photoshop as they are used in conjunction with Adobe InDesign. Students without previous computer experience are encouraged to take Applications/ Concepts (CIT110). Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-141 Elements of

Video Production 3 credits

This course gives students an overview of the theoretical, aesthetic, and practical elements of digital video pre-production, production, and postproduction. Through a series of creative exercises, lectures, and classroom critiques, students will gain an understanding of the fundamental skills required in planning, scripting, directing, shooting, lighting, and editing digital video productions for a variety of purposes and audiences. The course provides a special emphasis on understanding and using visual storytelling techniques to relate information and emotion. Recommended prerequisite: Digital Imaging with Photoshop (VMA105). Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-151 Introduction to

Audio Technology 3 credits

This course will provide the student with the basic knowledge and skills required for audio production. Through lectures and hands-on lab work, students will learn the technical and aesthetic aspects of microphones, tape decks, and mixing consoles. Both digital and analog production media will be covered, with greater emphasis on the digital realm. In addition to technical abilities, students will also examine the nature of the acoustic environment, and will be introduced to digital audio editing software. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-161 Introduction

Digital Photography 3 credits

Digital photography has made it technically possible to generate countless photographs at virtually no cost, yet the formal problems of picture-making remain. How is it possible to create photographs with power and significance? This course explores basic technical issues of the digital photography workflow joined with a formal exploration of seeing photographically, using both shooting assignments and lab exercises. Examples from the photographic tradition will be examined. Adobe Photoshop is used to adjust and manipulate images for printing. Inkjet printers are used to create photographic quality output. Students must have a digital camera and basic computer literacy. This course fulfills General Education Humanities Requirement Area 6. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-204 Figure Drawing

Students draw from the model as a means of understanding form, shape, and line gaining experience with a variety of drawing medias. Figure Drawing emphasizes shorter poses as training in immediate response to gesture and form. course serves as a requirement and preparation for intermediate level and concept-based studio courses such as Ideas in Art: Fine Arts Studio, Observational Drawing, and Multi-Level Studio classes. Prerequisite: Drawing I (VMA104).

LEC T 8:30 a.m.-12:45 p.m. D213 Y Chen

VMA-221 Painting I for Fine Arts 3 credits

This course introduces students to the fundamentals of painting with heavy body paints and mediums. Working from observation students will gain the basic skills necessary to control the value, color, texture and composition of the paintings they create. They will develop visual problem solving skills and critical vocabulary through group critiques and

individual meetings. This course will leave them with a basic understanding of how to build a personalized, sustainable painting practice. Prerequisite: Drawing I (VMA104).

01 LEC W 8:30 a.m.-12:45 p.m. D2

D219 C Faust

3 credits

VMA-223 Water Color II 3 credits
Focusing on developing one's personal sense of
aesthetics and style, this course explores various
techniques used in watercolor. The course places
emphasis on creating cohesive, well-composed
paintings, while it develops an understanding of the
elusive properties of spontaneity and transparency
as they relate to the medium of watercolor paint.
Prerequisite: Watercolor I (VMA123) or permission of
instructor.

WB WEB For username and password, go to www.bhcc.mass.edu/mycourseaccess. Y Chen

VMA-226 Observational Drawing
This course provides students with intermediate to advance instruction in drawing from direct observation. Working from life students will master the relationship between value, form, and space while experimenting with various drawing materials, implements, techniques and strategies. Through group critiques and individual meetings they will exercise their visual problem solving skills and increase their critical vocabulary. This course will provide the necessary foundation upon which to build a sustainable drawing practice. Prerequisite: Figure Drawing (VMA204).

01 LEC TH 8:30 a.m.-12:45 p.m. D213 J Flores

VMA-231 Digital Illustration w/Illustrator

This course explores the use of the computer as a design tool. Instruction emphasizes the mastery of fundamental computer functions and software operations. It prepares graphic design students in computer software and technology used in graphic design. Students explore the creative potential, solve design and layout problems, and exhibit an understanding of the professional requirements of document preparation and production. The course uses Adobe InDesign and Adobe Illustrator software. Prerequisite: Digital Publishing with InDesign (VMA131).

01 LEC W 10:00 a.m.-12:45 p.m. E167 A Carter

VMA-232 Design Communication I 3 credits This course explores the use of the computer as a design tool. Instruction emphasizes the mastery of fundamental computer functions and software operations. It prepares graphic design students in computer software and technology used in graphic

design. Students explore the creative potential, solve design and layout problems, and exhibit an understanding of the professional requirements of document preparation and production. The course uses Adobe InDesign and Adobe Illustrator software. Prerequisite: Introduction to Desktop Publishing (VMA131).

01 LEC M 10:00 a.m.-12:45 p.m. E167 A Carter

VMA-241 Advanced Video Production 3 credits This course focuses on development of the skills and

This course focuses on development of the skills and concepts necessary for digital video production. Students learn the advanced use of the HDV digital camcorder microphones, the field audio mixer and lighting techniques. The course uses images and materials acquired in the course in its co-requisite class, Video Post Production (VMA242), in order to complete a final project counting for both courses. Topics covered include fiction and non-fiction production techniques, including research, script development and interviewing. Discussion of theoretical issues in applied media aesthetics will be an integral and essential part of the class. Prerequisite: Elements of Video Production (VMA141) or permission of instructor. Co-requisite: Video Post Production (VMA242).

01 LEC M 10:00 a.m.-12:45 p.m. E171 H Phillips

VMA-242 Video Post-Production 3 credits This course delivers an intensive workshop in digital nonlinear post-production software, theory and techniques. Students work in-depth with Final Cut Pro and will also explore other aspects of the Final Cut Studio package, including Live Type, Soundworks Pro, and Motion. The course also provides a solid foundation in the theory and aesthetics of film and video editing by examining the history and development of the editing process. The course uses images and materials acquired in its co-requisite course, Advanced Video Production (VMA241) in order to complete a Final Project counting for both courses. Prerequisite: Elements of Video Production (VMA141) or permission of instructor. Co-requisite: Advanced Video Production (VMA241).

01 LEC W 10:00 a.m.-12:45 p.m. E169 D Pastel

VMA-244 Media Project Planning 3 credits This course is an intensive survey of all aspects of pre-production planning for video and multimedia productions. Special emphasis is given to the process of writing for the media, including idea development, preparation of proposals, treatments, storyboards and scripts that clearly define message, intent and audience. A variety of storytelling methods and approaches to the creative process will be explored, including the dramatic, educational, corporate and documentary formats. In addition, the fundamentals

of production management will be presented, including script breakdown, production scheduling, resource planning, and budgeting. Students will be expected to utilize skills gained in this class in subsequent media production classes. Prerequisite: Elements of Video Production (VMA141).

01 LEC T,TH 10:00 a.m.-11:15 a.m. E152 D Paste

VMA-276 Interactive Design II 3 credits
This is a practical class teaching interactive visual design from conception to completion. Students start by coming up with an idea for and examining the needs of their design projects, then define the target audience and behavior, page layouts, project planning/site maps, and techniques to smooth their workflow. Students will choose their digital applications(s) (e.g., website, Apple IPhone) for their projects. The final visual designs are ready to be delivered for development and implementation. Prerequisites: Interactive Design I (VMA275), or the

01 LEC M,W 8:30 a.m.-9:45 a.m. E165 Y Chen

permission of the instructor.

VMA-503 Video for Social Media 3 credits Learn how to powerfully communicate your message for the condensed format of social media. In this course students will create their own professional quality video for actual distribution. We will cover camera technique using DSLRs, sound recording, effective planning, creative editing, and publication to the web. Prerequisite: Writing Skills II (ENG095) or placement into College Writing I (ENG111). This course may substitute for Elements/Video Production (VMA141) for Media Communications majors.

Courses marked with a leaf symbol are part of BHCC's ongoing efforts to integrate sustainability into the College's curriculum. These courses emphasize the importance of environmental responsibility and contribute significantly to students, understanding and practice of sustainability. Not all sections may be sustainable, please check with the Academic Records Office if you have questions.

MASSACHUSETTS COMMUNITY COLLEGE IN-STATE TUITION ELIGIBILITY FORM

Bunker Hill Community College requires all students claiming in-state tuition eligibility to submit documentation. An eligible person shall mean (A) a U.S. Citizen, lawful immigrant, permanent resident, or holder of another legal immigration status, (B) who has satisfied the durational residency requirement and can demonstrate his/her intent to remain in Massachusetts.

PROVIDE ONE DOCUMENT FROM LIST- A

refugee/asylum status

U.S. Citizen (student must submit birth certificate or U.S. passport)
Resident Alien (student must submit copy of resident alien card)
U.S. permanent resident with I-151, I-551, and I-551C forms (students must submit INS documentation)
I-94 from the U.S. Immigration and Naturalization Service with one of the following designations stamped on the card: refugee; Cuban-Haitian entrant status pending; asylum granted; indefinite parole; or humanitarian parole (student must submit passport or INS documentation).
Non-citizen who is in (or who is eligible to apply and who has applied for)

PROVIDE TWO DOCUMENTS FROM THE DOCUMENT LIST IN THE BOX ON THE OTHER SIDE OF THIS FORM

Please present the two documents you selected from the other side of this form. The documents must be dated at least 6 months prior to the first day of classes for the semester/session you are enrolling, but not more than one year prior to that date.

Documentation must be provided to Admissions and Enrollment Services at the time of registration or upon submission of your admission application, whichever comes first. For questions concerning residency requirements, please contact the Office of Admissions at 617-228-3398.

NOTES:		

REGISTRATION FORM **FALL 2014**

BHCC fax-in **Registration Form** for Credit and Non-Credit courses

Students taking credit courses may use this form to register if:

- they are registering for one or two classes (8 credit maximum);
- they are willing to accept responsibility for their own course selection on the basis of published program requirements for credit courses under their curriculum year;
- they either have taken the College Placement Test (CPTs) or have completed an English or mathematics course at an accredited institution (if they are signing up for a course in these subjects);
- they fax a copy of their transcript from another institution if they are taking a course which requires a prerequisite;
- they are paying in full at the time of registration;
- they are providing or have provided a completed Application for Massachusetts In-State Tuition form and all supporting documentation to receive the in-state tuition rate;

Register by Fax:

Fax the form and related documents with your credit card information to: 617-228-3481.

The deadline to register for Fall 2014 credit courses by fax is August 14, 2014.

Students may register for non-credit courses throughout the semester.

Register Online (for Non-Credit courses only) http://www.bhcc.mass.edu/CE

The deadline to register for Fall 2014 online courses by fax is August 29, 2014.

For the cost of credit courses, refer to the Tuition and Fee Schedule listed in this publication

To calculate the cost of credit courses: multiply the tuition and fees by the total number of credits you are taking.

NON-CREDIT COURSES: Fill in the TOTAL COST line.

Tuition & Fees* ___

x Credits

= TOTAL COST _____

NOTE: You may register for a maximum of 8 credits when registering by mail, phone or fax.

* For Health Courses, add an additional \$35 per credit.
